Crime and Power Sep 19 2021 This textbook makes a concerted effort to expose crimes committed by those wielding unfettered personal power and crimes by corporations, business and states, crimes against human and non-human species and the environment. It examines an increasingly complex interplay of issues which surely should be at the heart of any criminology programme. This text adopts a fresh and innovative approach to exposing the crimes of the powerful, situating and understanding crimes and victimisations as it does within a framework where questions of structural and personal power in society are key. Fourteen case studies are threaded throughout the book and this methodology is used as a teaching resource for studying and uncovering the crimes of the powerful. The first three chapters comprehensively contextualise the problems of crime and power and establish the importance of power to understanding crime and victimisation in society. The chapters within Part I and Part II of the book then explore individual and group power respectively. Each of these chapters explore a case study or case examples followed by 'Pause for Thought' questions. Bigger 'Go Further' study questions are posed at the close of these chapters challenging students to engage in their own case study research to investigate the dynamics of crime and power.

War Crimes and the Culture of Peace Feb 10 2021 In 1996, Louise Arbour was appointed by the Security Council of the United Nations as Chief Prosecutor for the International Criminal Tribunals for the former Yugoslavia and Rwanda. Reflecting on these experiences, she argues in *War Crimes and the Culture of Peace* that the level of public awareness and understanding of the significance of these events is minimal in part as a result of the way in which international criminal law is practiced. Justice Arbour contends that previous efforts to unite concepts of international law and criminal law in the practice of these tribunals are evolving, and suggests that the ties between personal criminal accountability and peace should be central to the decisions made in the future concerning procedural models for the permanent International War Crimes Tribunals. As a result, the public might better understand the context and causes of such crime, and the notion of crime as a breach of the peace would be made central to these trials. Justice Arbour delivered *War Crimes and the Culture of Peace* as the fifth annual Senator Keith Davey Lecture at Victoria University at the University of Toronto in January 2001.

Criminal Conversations Dec 11 2020 "The essays in this book set out to explore the ways in which Victorians used newspapers to identify the causes of bad behavior and its impacts, and the ways in which they tried to "distance" criminals and those guilty of "bad" behavior from the ordinary members of society, including identification of them as different according to race of sexual orientation. It also explores how threats from within "normal" society were depicted and the panic that issues like "baby-farming" caused." "Victorian alarm was about crimes and bad behavior which they saw as new or unique to their period - but which were not new then and which, in slightly different dress, are still causing panic today. What is striking about the essays in this collection are the ways in which they echo contemporary concerns about crime and bad behavior, including panics about "new" types of crime. This has implications for modern understandings of how society needs to understand crime, demonstrating that while there are changes over time, there are also important continuities."--

The Torture Doctors Oct 28 2019 Torture doctors invent and oversee techniques to inflict pain and suffering without leaving scars. Their knowledge of the body and its breaking points and their credible authority over death certificates and medical records make them powerful and elusive perpetrators of the crime of torture. In *The Torture Doctors*, Steven H. Miles fearlessly explores who these physicians are, what they do, how they escape justice, and what can be done to hold them accountable. At least one hundred countries employ torture doctors, including both dictatorships and democracies. While torture doctors mostly act with impunity—protected by governments, medical associations, and licensing boards—Miles shows that a movement has begun to hold these doctors accountable and to return them to their proper role as promoters of health and human rights. Miles's groundbreaking portrayal exposes the thinking and psychology of these doctors, and his investigation points to how the international human rights community and the medical community can come together to end these atrocities.

Crime and Punishment in Islamic Law Jan 12 2021 In *Crime and Punishment in Islamic Law: A Fresh Interpretation*, Mohammad Kamali considers problems associated with and proposals for reform of the hudud punishments prescribed by Islamic criminal law, and other topics related to crime and punishment in Shariah. He examines what the Qur'an and hadith say about hudud punishments, as well as just retaliation (qisas), and discretionary punishments (ta'zir), and looks at modern-day applications of Islamic criminal law in 15 Muslim countries. Particular attention is given to developments in Malaysia, a multi-religious society, federal state, and self-described democracy, where a lively debate about hudud has been on-going for the last three decades. Malaysia presents a particularly interesting case study of how a reasonably successful country with a market economy, high levels of exposure to the outside world, and a credible claim to inclusivity, deals with Islamic and Shariah-related issues. Kamali concludes that there is a significant gap between the theory and practice of hudud in the scriptural sources of Shariah and the scholastic articulations of jurisprudence of the various schools of Islamic law, arguing that literalism has led to such rigidity as to make Islamic criminal law effectively a dead letter. His goal is to provide a fresh reading of the sources of Shariah and demonstrate how the Qur'an and Sunnah can show the way forward to needed reforms of Islamic criminal law.

Christianity and Criminal Law Nov 29 2019 This collection, by leading legal scholars, judges and practitioners, together with theologians and church historians, presents historical, theological, philosophical and legal perspectives on Christianity and criminal law. Following a Preface by Lord Judge, formerly Lord Chief Justice of England and Wales, and an introductory chapter, the book is divided into four thematic sections. Part I addresses the historical contributions of Christianity to criminal law drawing on biblical sources, early church fathers and canonists, as far as the Enlightenment. Part II, titled Christianity and the principles of criminal law, compares crime and sin, examines concepts of mens rea and intention, and considers the virtue of due process within criminal justice. Part III looks at Christianity and criminal offences, considering their Christian origins and continuing relevance for several basic crimes that every legal system prohibits. Finally, in Part IV, the authors consider Christianity and the enforcement of criminal law, looking at defences, punishment and forgiveness. The book will be an invaluable resource for students and academics working in the areas of Law and Religion, Legal Philosophy and Theology.

Little Book of Crime and Punishment May 16 2021 The English criminal justice system has come a long way since the days when noses were cut off, heretics burned at the stake and rebels were hung, drawn and quartered. Yet the Common Law, which emerged from Henry II's conflict with Thomas a Becket, survives in England (and much of the English-speaking world) and magistrates still deal with 95 per cent of crimes as they have done for at least 650 years. We no longer duck scolds and witches but we still follow Magna Carta in the way we try people; and we no longer cut off hands or heads; instead we impose curfews, 'tag' persistent offenders and, where necessary, lock them up. This book shows how our system of justice, crime and punishment has evolved and suggests where we go from here.

On Crimes and Punishments Apr 14 2021 Cesare Beccaria's influential Treatise on Crimes and Punishments is considered a foundational work in the field of criminology. Three major themes of the Enlightenment run through the Treatise: the idea that the social contract forms the moral and political basis of the work's reformist zeal; the idea that science supports a dispassionate and reasoned appeal for reforms; and the belief that progress is inextricably bound to science. All three provide the foundation for accepting Beccaria's proposals. It is virtually impossible to ascertain which of several versions of the Treatise that appeared during his lifetime best reflected Beccaria's thoughts. His use of many Enlightenment ideas also makes it difficult to interpret what he has written. While Enlightenment thinkers advocated free men and free minds, there was considerable disagreement as to how this might be achieved, except in the most general terms. The editors have based this translation on the 1984 Francioni text, the most exhaustive critical Italian edition of *Dei delitti e delle pene*. This edition is the last that Beccaria personally oversaw and revised. This translation includes an outstanding opening essay by the editors and is a welcome introduction to Beccaria and the beginnings of criminology.

Safety Crimes Feb 22 2022 Every year in the UK, hundreds of workers are killed just doing their jobs, thousands more die of illnesses caused by their work and tens of thousands suffer major injuries such as amputations, loss of sight, serious burns, and so on. Worldwide, two million people are killed by work each year. Yet with the exception of high profile cases such as the gas leak at Bhopal, India, which killed tens of thousands, this crime wave fails to attract the interest of the politicians, the media or - least forgivably of all - the knowledge industry of criminology. This book is concerned with crimes against worker and public safety, providing an account and analysis of this increasingly important field, and setting this within the broader context of corporate and white-collar crime. It uses case studies and original analyses of official data to illustrate key points and themes, drawing upon both well known and high profile instances of safety crimes as well the mass of ubiquitous 'mundane' or 'routine' deaths and injuries. Thus the book examines how much safety crime is there, how are such offences rendered invisible, and how can their extent be unearthed accurately? Throughout the book the authors analyse the social, legal and political processes that ensure that safety crimes remain subject to under-enforcement and under-criminalisation. This analysis identifies key moments in the historical development of criminal law and regulation, and assesses the prospects for criminalising safety crimes in the context of contemporary neo-liberal regulatory policies. The theoretical and political justifications for dominant approaches to the regulation and sanctioning of safety criminals are subject to critique in order to develop alternative, more effective, means of criminalisation and punishment. The book concludes with an original analysis of safety crimes that allows us to understand the complexities of the conditions of their production, and develop a more realistic appraisal of the prospects for their amelioration.

On Crimes and Punishments Jun 24 2019 *On Crimes and Punishments* is a seminal treatise on legal reform written by the Italian philosopher and thinker Cesare Beccaria between 1763 and 1764. The essays proposed many reforms for the criminal justice system, including prompt administration of clearly prescribed and consistent punishments, well-publicized laws made by the legislature rather than individual courts or judges, the abolition of torture in prisons and the use of the penal system to deter would-be offenders, rather than simply punishing those convicted. It is also one of the earlier, and most famous, works against death penalty. The main reason put forward against that measure is that the State, by putting people to death, was committing a crime to punish another one. *On Crimes and Punishments* is widely considered one of the founding texts of Classical Criminology.

'Hate Crime' and the City Jul 30 2022 This title widens understanding by demonstrating that many offenders are just ordinary people who offend in the context of their everyday lives.

Crime and Punishment Sep 27 2019 This classic, begun as a novel concerned with the psychology of a crime and the process of guilt, surpasses itself to take on the tragic force of myth.

Crime and Victimization of the Elderly Aug 07 2020 *Crime and Victimization of the Elderly* provides a "state-of-the-art" review of the social scientific literature relating to the crime problems of older persons. Building upon a broad interdisciplinary base, the volume addresses a wide range of issues that will prove to be of interest and value to criminology and gerontology students and to practicing professionals. The book is divided into two major sections. The first focuses upon elderly offenders and the second is devoted to a discussion of elderly victims. All of the major topics normally covered in the criminology and victimology courses are given detailed consideration. These include: the nature and types of crimes committed by the elderly, theories of elderly crime, criminal justice reactions to the older offender, patterns of elderly victimization, explanations of elderly victimization patterns, fear of crime among older persons and the abuse of the elderly in domestic settings. The chapters provide a critical assessment of the formative as well as the most recent empirical research conducted in the United States, Canada and elsewhere. Each chapter includes lists of suggested readings and each major section includes an extensive list of bibliographic references. This book is an invaluable resource to criminologists, gerontologists and social service professionals as it raises questions and defines issues vital to an understanding of the elderly and their association with various aspects of crime.

Crime, Justice and the Media Apr 26 2022 *Crime, Justice and the Media* examines and analyzes the relationship between the media and crime, criminals and the criminal justice system. It considers how crime and criminals have been portrayed by the media over time, applying different theoretical perspectives on the media to the way crime, criminals and justice is reported. It focuses on a number of specific areas of crime and criminal justice in terms of media representation - these areas include moral panics over specific crimes and criminals (including youth crime, cybercrime and paedophilia), the media portrayal of victims of crime and criminals and the way the media represent criminal justice agencies. The book offers a clear, accessible and comprehensive analysis of theoretical thinking on the relationship between the media, crime and criminal justice and a detailed examination of how crime, criminals and others involved in the criminal justice process are portrayed by the media. A key strength of the book is its interactive approach - throughout the text students are encouraged to respond to the material presented and think for themselves.

Future Crimes Jul 26 2019 NEW YORK TIMES and WALL STREET JOURNAL BESTSELLER ONE OF THE WASHINGTON POST'S 10 BEST BOOKS OF 2015 One of the world's leading authorities on global security, Marc Goodman takes readers deep into the digital underground to expose the alarming ways criminals, corporations, and even countries are using new and emerging technologies against you—and how this makes everyone more vulnerable than ever imagined. Technological advances have benefited our world in immeasurable ways, but there is an ominous flip side: our technology can be turned against us. Hackers can activate baby monitors to spy on families, thieves are analyzing social media posts to plot home invasions, and stalkers are exploiting the GPS on smart phones to track their victims' every move. We all know today's criminals can steal identities, drain online bank accounts, and wipe out computer servers, but that's just the beginning. To date, no computer has been created that could not be hacked—a sobering fact given our radical dependence on these machines for everything from our nation's power grid to air traffic control to financial services. Yet, as ubiquitous as technology seems today, just over the horizon is a tidal wave of scientific progress that will leave our heads spinning. If today's Internet is the size of a golf ball, tomorrow's will be the size of the sun. Welcome to the Internet of Things, a living, breathing, global information grid where every physical object will be online. But with greater connections come greater risks. Implantable medical devices such as pacemakers can be hacked to deliver a lethal jolt of electricity and a car's brakes can be disabled at high speed from miles away. Meanwhile, 3-D printers can produce AK-47s, bioterrorists can download the recipe for Spanish flu, and cartels are using fleets of drones to ferry drugs across borders. With explosive insights based upon a career in law enforcement and counterterrorism, Marc Goodman takes readers on a vivid journey through the darkest recesses of the Internet. Reading like science fiction, but based in science fact, *Future Crimes* explores how bad actors are primed to hijack the technologies of tomorrow, including robotics, synthetic biology, nanotechnology, virtual reality, and artificial intelligence. These fields hold the power to create a world of unprecedented abundance and prosperity. But the technological bedrock upon which we are building our common future is deeply unstable and, like a house of cards, can come crashing down at any moment. *Future Crimes* provides a mind-blowing glimpse into the dark side of technological innovation and the unintended consequences of our connected world. Goodman offers a way out with clear steps we must take to survive the progress unfolding before us. Provocative, thrilling, and ultimately empowering, *Future Crimes* will serve as an urgent call to action that shows how we can take back control over our own devices and harness technology's tremendous power for the betterment of humanity—before it's too late.

Crimes of the Powerful Aug 19 2021 As politicians and the media perpetuate the stereotype of the "common criminal," crimes committed by the powerful remain for the most part invisible, or are reframed as a "bad decision" or a "rare mistake." This is a topic that remains marginalized within the field of criminology and criminal justice, yet crimes of the powerful cause more harm, perpetuate more inequalities, and result in more victimization than street crimes. *Crimes of the Powerful: An Introduction* is the first textbook to bring together and show the symbiotic relationships between the related fields of state crime, white-collar crime, corporate crime, financial crime, organized crime, and environmental crime. Dawn L. Rothe and David Kauzlarich introduce the many types of crimes, methodological issues associated with research, theoretical relevance, and issues surrounding regulations and social controls for crimes of the powerful. Themes covered include: media, culture, and the Hollywoodization of crimes of the powerful; theoretical understanding and the study of the crimes of the powerful; a typology of crimes of the powerful with examples and case studies; victims of the crimes of the powerful; the regulation and resistance of elite crime. An ideal introductory text for both undergraduate and postgraduate students taking modules on the crimes of the powerful, white-collar crime, state crime, and green criminology, this text includes chapter summaries, activities and discussion questions, and lists of additional resources including films, websites, and additional readings.

Women and Crime Jul 06 2020 This text provides a comprehensive and unique view into the world of women interacting with the criminal justice system.

Crimes of Dissent Mar 02 2020 From animal rights to anti-abortion, from tax resistance to anti-poverty, activists from across the political spectrum often deliberately break the law to further their causes. While not behaviors common to hardened or self-seeking criminals, the staging of civil disobedience, non-violent resistance, and direct action can nevertheless trigger a harsh response from law enforcement, with those arrested risking jail time and criminal records. *Crimes of Dissent* features the voices of these activists, presenting a fascinating insider's look at the motivations, costs and consequences of deliberately violating the law as a strategy of social change. *Crimes of Dissent* provides readers with an in-depth understanding of why activists break the law, and what happens to them when they do. Using dynamic examples, both historic and recent, Jarret Lovell explores how seasoned protesters are handled and treated by the criminal justice system, shedding light on the intersection between the political and the criminal. By adopting the unique vantage of the street-level activist, *Crimes of Dissent* provides a fascinating view of protest from the ground, giving voice to those who refuse to remain silent by risking punishment for their political actions.

Honour Based Crimes and the Law Nov 09 2020 Honour-related violence and abuse manifests itself in different forms and this book offers a comprehensive understanding of this phenomenon. This book argues that the limits of honour crimes must be defined more widely so that they include conducts and behaviours that originate from the patriarchal notion of honour, such as honour-related oppression and breast ironing. The book provides a critical analysis and synthesis of the law in England and Wales and in the international human rights sphere. The relevant domestic legislation and cases are examined to reflect on whether adequate protection is provided for the victims and potential victims of honour-based violence and abuse. Since honour-based violence is a violation of human rights, the relevant international human rights law is examined to illustrate the perception of such crimes in the international arena. The effectiveness of any remedy for victims of honour-based violence and abuse depends on its capability to change deep rooted behaviours in communities with honour-related patriarchal values. This book argues that the law does not provide the effective impact required, in part due to patriarchal structures, and that more efforts should be dedicated to changes in education. It is held that there is a need for an educational programme that is especially designed to tackle violence and promote gender equality. The book will be essential reading for academics, researchers and policy-makers working in the areas of Human Rights Law, Criminal Law and Gender Studies.

Criminology Jun 16 2021 This highly acclaimed criminology text presents an up-to-date review of rational choice theories, including deterrence, shaming, and routine activities. It also incorporates current examples of deterrence research regarding domestic violence, drunk driving, and capital punishment, and features thought-provoking discussion of the relativity of crime. The authors explore the crime problem, its context, and causes of crime. The organization of the text reflects the fact that the etiology of crime must be at the heart of criminology. It examines contemporary efforts to redefine crime by focusing on family violence, hate crimes, white-collar misconduct with violent consequences, and other forms of human behavior often neglected by criminologists. Extensive discussion of evolving laws is included, and while the prevalence of the scientific method in the field of criminology is highlighted, the impact of ideology on explanations of crime is the cornerstone of the book. Comprehensive introductory textbook that looks at competing answers to the question, "Why do people commit crimes?" Student-friendly figures, features, highlights, and full-color photos. Each chapter includes learning objectives, discussion questions, and lists of key terms and concepts, key criminologists, and important legal cases. The eighth edition includes updates throughout and expanded coverage of biosocial theories of crime and life-course criminology.

Victims and Viragos Oct 01 2022 This book considers the experiences of eighteenth-century women, in the Metropolitan area, as both the victims and perpetrators of a variety of crimes, and as participants, in different forms, in the era's criminal justice system. In doing so, it makes extensive use of primary as well as secondary sources. The book is written so as to be readily accessible to the general reader as well as to academics, and eschews the more arcane language that sometimes surrounds gendered subjects. The eight chapters are broad enough to cover an extensive range of crimes while remaining manageable in size. Vitality, the book considers the impact of what was largely an urban, rather than rural, environment on women's lives, and how this affected their offending and victimisation patterns.

Crime And Punishment Jan 30 2020 A few words about Dostoevsky himself may help the English reader to understand his work. Dostoevsky was the son of a doctor. His parents were very hard-working and deeply religious people, but so poor that they lived with their five children in only two rooms. The father and mother spent their evenings in reading aloud to their children, generally from books of a serious character. Though always sickly and delicate Dostoevsky came out third in the final examination of the Petersburg school of Engineering. There he had already begun his first work, "Poor Folk." This story was published by the poet Nekrassov in his review and was received with acclamations. The shy, unknown youth found himself instantly something of a celebrity. A brilliant and successful career seemed to open before him, but those hopes were soon dashed. In 1849 he was arrested.

Crime and Art Nov 21 2021 This volume brings together work by authors who draw upon sociological and criminological methods, theory, and frameworks, to produce research that pushes boundaries, considers new questions, and reshape the existing understanding of "art crimes", with a strong emphasis on methodological innovation and novel theory application. Criminologists and sociologists are poorly represented in academic discourse on art and culture related crimes. However, to understand topics like theft, security, trafficking, forgery, vandalism, offender motivation, the efficacy of and results of policy interventions, and the effects art crimes have on communities, we must develop the theoretical and methodological models we use for analyses. The readership of this book is expected to include academics, researchers, and practitioners in the fields of criminology, sociology, law, and heritage studies who have an interest in art and heritage crime.

Interpersonal Criminology Apr 02 2020 Based on peer-reviewed articles from the Second International Conference of the South Asian Society of Criminology and Victimology, Interpersonal Criminology investigates the roots of crime and victimization, rather than dissecting criminal behavior after the fact. The book divides crime by type, covering crimes against women, crimes against children and youths, culture conflict and victimization of groups, and interpersonal cybercrimes. Perfect for criminal justice practitioners and advanced human rights, criminology, and victimology students, Interpersonal Criminology explores the complexities of crime and interpersonal events in both established and emerging fields of criminology, including those concerning women and minorities.

Sex Crimes and the Criminal Justice System (First Edition) Jul 18 2021 The anthology *The Hidden World of the Sex Offender: Readings on Sex Crimes and the Criminal Justice System* gives readers insight into the hidden world of the sex offender. This carefully curated selection of readings examines deviant sexual behaviors from historical and geographical perspectives, and discusses how some of them were not only permitted, but encouraged in certain societies and eras. Students

learn about types of sex offenders and differences between nuisance sex offenders and dangerous sex criminals. Specific chapters are devoted to the characteristics of offenders, aberrant forms of sexual behavior, paraphilias, pedophilia, child pornography, and cyber-predators, and sex trafficking. Most notable is the text's attention to the often overlooked topics of female sex offenders and the forms, extent, victimology, and future of male prostitution. The Hidden World of the Sex Offender asks students to thoughtfully consider issues such as the role of fantasy in aberrant forms of behavior, and how both ritualism and symbolism play integral parts in sexual practice. The anthology can be used in courses in sex crimes and sexual deviancy, and those devoted to how the criminal justice system deal with them. Crime and the American Dream Aug 26 2019 Authored by Steven Messner and Richard Rosenfeld, both highly respected scholars and researchers, CRIME AND THE AMERICAN DREAM, 5th Edition is the seminal work in a major segment of criminological theory. The foundation of the book is institutional anomie theory (an offshoot of Mertonian anomie theory), which the authors posit helps to explain why America's over-emphasis on the pursuit of materialistic gain contributes to the country's high rate of violent crime. Featuring a very clear and accessible writing style, this is a theory book that students will actually understand.
