**Understanding Business Statistics** Jul 18 2021 Understanding Business Statistics is a highly student-oriented business statistics product that makes statistics understandable for students with a wide variety of statistics backgrounds. The authors provide an intuitive discussion of basic statistical principles rather than a mathematically rigorous development. They use simple examples to introduce and develop concepts and procedures. For ease of reading, chapter sections are designed to ensure easy-to-follow continuity from one section to the next. This text provides students with frequent opportunities to check their understanding of topics as they move through the chapters, with exercises included at the end of most sections. In many cases, the exercises have been designed to extend chapter discussions rather than solely provide opportunities for drill and repetition. Understanding Business Statistics is written using a modular approach, allowing students to approach the subject step-by-step with very clear instructions.

**The Mercenary Mediterranean** Aug 19 2021 Over the course of the thirteenth and fourteenth centuries, the Christian kings of Aragon recruited thousands of foreign Muslim soldiers to serve in their armies and as members of their royal courts. Based on extensive research in Arabic, Latin and Romance sources, 'The Mercenary Mediterranean' explores this little-known and misunderstood history.

**An Anglo-Norman Reader** Aug 31 2022 This book is an anthology with a difference. It presents a distinctive variety of Anglo-Norman works, beginning in the twelfth century and ending in the nineteenth, covering a broad range of genres and writers, introduced in a lively and thought-provoking way. Facing-page translations, into accessible and engaging modern English, are provided throughout, bringing these texts to life for a contemporary audience. The collection offers a selection of fascinating passages, and whole texts, many of which are not anthologised or translated anywhere else. It explores little-known byways of Arthurian legend and stories of real-life crime and punishment; women's voices tell history, write letters, berate pagans; advice is offered on how to win friends and influence people, how to cure people's ailments and how to keep clear of the law; and stories from the Bible are retold with commentary, together with guidance on prayer and confession. Each text is introduced and elucidated with notes and full references, and the material is divided into three main sections: Story (a variety of narrative forms), Miscellany (including letters, law and medicine, and other non-fiction), and Religious (saints' lives, sermons, Bible commentary, and prayers). Passages in one genre have been chosen so as to reflect themes or stories that appear in another, so that the book can be enjoyed as a collection or used as a resource to dip into for selected texts. This anthology is essential reading for students and scholars of Anglo-Norman and medieval literature and culture. Wide-ranging and fully referenced, it can be used as a springboard for further study or relished in its own right by readers interested to discover Anglo-Norman literature that was

written to amuse, instruct, entertain, or admonish medieval audiences.

**Satires II** Oct 28 2019 The poems of Horace's second book of Satires, for the most part written in the newly-adopted dialogue form, display great literary and intellectual sophistication, artistic skill and charm. The intention of this edition is to supply sufficient background information to enable the text to be read with understanding. The emphasis is on the social context, the history of satire in Rome, and the ethical-philosophical content. Text and translation with commentary and notes.

**Toddler Discipline for Every Age and Stage** May 16 2021 Toddler Discipline for Every Age and Stage offers practical, age-appropriate toddler discipline strategies for managing the everyday challenges of toddlerhood and guiding your child to becoming their best self. Toddlers are constantly changing, and they can easily become overwhelmed by it all. When faced with the meltdowns that toddlers are famous for, it can be difficult to know which toddler discipline techniques will best help your child grow into a stronger, kinder person. Toddler Discipline for Every Age and Stage delivers essential toddler discipline tools for dealing with day-to-day difficulties, and supporting your toddler as they learn the important lessons that will set them up for success. Written by child development expert Aubrey Hargis, Toddler Discipline for Every Age and Stage will help you understand your toddler's behavioral challenges while fostering important life skills such as curiosity, respect, independence, and confidence. Drawing on Aubrey's years of coaching parents through the rocky terrain of toddler discipline, as well as her own experience as a mother of two, Toddler Discipline for Every Age and Stage delivers proven toddler discipline techniques that will help you grow closer as parent and child during each stage of your toddler's first formative years. Inside the pages of Toddler Discipline for Every Age and Stage you'll find: An overview of your child's development—including physical, cognitive, and social-emotional—and how this affects their behavior. Age-appropriate toddler discipline strategies that will help you manage common behavioral issues by building upon each stage of progress. Helpful toddler discipline sidebars and tips for dealing with tricky situations, guidance on how best to communicate with your child, and advice from parents who've been there. While child development is not a linear process, Toddler Discipline for Every Age and Stage provides you with a practical, effective toddler discipline toolkit for navigating the ups and downs of your little one's toddlerhood and thereafter.

**Greece in the Twentieth Century** Jan 24 2022 This collective study examines the transformation (metamorphosis) that Greece has experienced over the course of the 20th century by exploring its gradual evolution into a consolidated democracy, an advanced economy in the Eurozone and a balanced partner in the EU and NATO promoting a stabilizing role in southeastern Europe. The book examines the variables contributing to the profiling of contemporary Greece, emphasizing the conceptual inertia bedeviling the studies of Greece in recent years by focusing on the elements that indicated the slow pace in the country's modernization. In conclusion, there is a need for Greece's constant commitment to functional adjustments regarding the country's economic, political and strategic priorities in order to promote effectively the role of regional stabilizer acting in concert with NATO and EU partners.

**The Pomegranate** Jun 28 2022 The pomegranate, *Punica granatum* L., is one of the oldest known edible fruits and is associated with the ancient civilizations of the Middle East. This is the first comprehensive book covering the botany, production, processing, health and industrial uses of the pomegranate. The cultivation of this fruit for fresh consumption, juice production and medicinal purposes has expanded more than tenfold over the past 20 years. Presenting a review of pomegranate growing, from a scientific and horticultural perspective, this book provides information on how to increase yields and improve short- and medium-term grower profitability and sustainability.

**The History of al-Manʿar? Vol. 28** Nov 21 2021 The initial years (126-145) of al-Manʿar's reign presented several significant challenges to nascent ʿAbbʿsid hegemony, and the resulting confrontations constitute the central focus of this section of ʿabar's Tarikh. After Abu Jafar succeeded his brother Abʿ Al-ʿabbʿs as caliph, the second of the ʿAbbʿsid dynasty, he moved against his recalcitrant uncle, ʿAbd Allʿh ibn ʿAlʿ, and against the potential threat that he perceived in the person of the commander in Khurasan, Abu Muslim. Eliminating the latter and containing the former freed the caliph to address a series of other onslaughts and insurrections. Starting with the year 144, however, ʿabar? turned to this volume's principal preoccupation, to which half of the book is devoted. Judging by the attention given to it, he clearly perceived the Hasanid rebellions of Muhammad b. Abdallah (the Pure Soul) and of his brother Ibrahim to be the most substantial attack on Abbasid authority to arise in the first years of that dynasty. ʿabar?'s description of the prolonged search for Muhammad and Ibrahim and of the caliphal vengeance visited upon their father and family provides an extended prelude to the vivid battle and death scenes in Medina and Bakhamra. Yet, elaboration of these events does not eclipse mention of all other Abbasid activity. To bridge the account of Muhammad's defeat and that of Ibrahim's uprising, ʿabar? inserted a narrative interlude depicting the site selection and preliminary construction of al-Manʿar's most celebrated achievement, the City of Peace, Baghdad.

**Enzymes in the Environment** Sep 27 2019 The need to understand the biological processes that are important for essential aquatic and terrestrial ecosystem function has prompted much research into the field of ecological enzymology. This book presents the two broad areas of application in a compilation of reviews by 21 international experts in their respective fields. The first explores enzymatic activities to assess the processes or mechanisms that operate in a given system, such as the rhizosphere, plant leaves and

shoots, soil surfaces, and biofilms. The second considers enzymes or microbial cells as sensors to detect microbial activity and stresses due to pollution, management, or climatic change in both aquatic and terrestrial ecosystems.

Adaption of Microbial Life to Environmental Extremes Feb 10 2021 This entirely updated second edition provides an overview on the biology, ecology and biodiversity of extremophiles. Unusual and less explored ecosystems inhabited by extremophiles such as marine hypersaline deeps, extreme cold, desert sands, and man-made clean rooms for spacecraft assembly are presented. An additional focus is put on the role of these highly specialized microorganism in applied research fields, ranging from biotechnology and nanotechnology to astrobiology. Examples such as novel psychrophilic enzymes, compounds from halophiles, and detection strategies for potential extraterrestrial life forms are discussed in detail. The book addresses researchers and advanced students in the fields of microbiology, microbial ecology and biotechnology.

*The Sand Sea* Sep 07 2020 "An astounding epic novel of J.R.R. Tolkien proportions!" — Steven Pressfield, Bestselling author of *Gates of Fire* and *The War of Art* Raiders of the Lost Ark playing *A Game of Thrones* *The Sand Sea* takes place on an alternative Earth roiled by war and conquest that mirrors our own Gilded Age. The treasure that ignites greed and folly in this parallel world is not petroleum, but beserite—a mineral of immeasurable value. Captivated by an ancient prophecy and the call of adventure, inexperienced nobleman and scholar Peter Harmon (think of a young Winston Churchill-like naif) joins an expedition to stake his nation's claim to a global empire. Harmon's destination is a vast and inhospitable desert halfway around the world, dominated by the iron-fisted Grand Vizer Jemojeen Jongdar. A tyrant on a mission to secure the ancient and supernatural Staff of the Ram, the Lion, and the Serpent, Jongdar knows the truth that others can only imagine: The one who controls the staff will possess the power to rule the world. Before he can seize his destiny, Jongdar must find and destroy the one person capable of thwarting his ambition, the rightful heir to the Sand Sea realm, an innocent woman named Selena Savanar. Can the brave and indomitable Selena accept her true destiny and rally her people in the eye of a gathering storm? To do so will require her to outwit the man who burned her father alive and left her an orphan and beggar a lifetime ago. Or will Peter Harmon and the cadre of opportunists he rides with conquer the divided empire? With the mythic structure of J.R.R. Tolkien's *The Lord of the Rings* trilogy in a world as rich and real as George R.R. Martin's Westeros, *The Sand Sea* is an immersive experience made to order for epic fantasy fans and anyone who enjoys grand-scale historical fiction.

Tau oligomers Mar 14 2021 Neurofibrillary tangles (NFTs) composed of intracellular aggregates of tau protein are a key neuropathological feature of Alzheimer's Disease (AD) and other neurodegenerative diseases, collectively termed tauopathies. The abundance of NFTs has been reported to correlate positively with the severity of cognitive impairment in AD. However, accumulating evidences derived from studies of experimental models have identified that NFTs themselves may not be neurotoxic. Now, many of tau researchers are seeking a "toxic" form of tau protein. Moreover, it was suggested that a "toxic" tau was capable to seed aggregation of native tau protein and to propagate in a prion-like manner. However, the exact neurotoxic tau species remain unclear. Because mature tangles seem to be non-toxic component, "tau oligomers" as the candidate of "toxic" tau have been investigated for more than one decade. In this topic, we will discuss our consensus of "tau oligomers" because the term of "tau oligomers" [e.g. dimer (disulfide bond-dependent or independent), multimer (more than dimer), granular (definition by EM or AFM) and maybe small filamentous aggregates] has been used by each researchers definition. From a biochemical point of view, tau protein has several unique characteristics such as natively unfolded conformation, thermo-stability, acid-stability, and capability of post-translational modifications. Although tau protein research has been continued for a long time, we are still missing the mechanisms of NFT formation. It is unclear how the conversion is occurred from natively unfolded protein to abnormally mis-folded protein. It remains unknown how tau protein can be formed filaments [e.g. paired helical filament (PHF), straight filament and twisted filament] in cells albeit in vitro studies confirmed tau self-assembly by several inducing factors. Researchers are still debating whether tau oligomerization is primary event rather than tau phosphorylation in the tau pathogenesis. Inhibition of either tau phosphorylation or aggregation has been investigated for the prevention of tauopathies, however, it will make an irrelevant result if we don't know an exact target of neurotoxicity. It is a time to have a consensus of definition, terminology and methodology for the identification of "tau oligomers".

**Archaeological Theory in Practice** Mar 02 2020 Many students view archaeological theory as a subject distinct from field research. This division is reinforced by the way theory is taught, often in stand-alone courses that focus more on logic and reasoning than on the application of ideas to fieldwork. Divorcing thought from action does not convey how archaeologists go about understanding the past. This book bridges the gap between theory and practice by looking in detail at how the authors and their colleagues used theory to interpret what they found while conducting research in northwest Honduras. This is not a linear narrative. Rather, the book highlights the open-ended nature of archaeological investigations in which theories guide research whose findings may challenge these initial interpretations and lead in unexpected directions. Pursuing those novel investigations requires new theories that are themselves subject to refutation by newly gathered data. The central case study is the writers' work in Honduras. The interrelations of fieldwork, data,

theory, and interpretation are also illustrated with two long-running archaeological debates, the emergence of inequality in southern Mesopotamia and inferring the ancient meanings of Stonehenge. The book is of special interest to undergraduate Anthropology/Archaeology majors and first- and second-year graduate students, along with anyone interested in how archaeologists convert the static materials we find into dynamic histories of long-vanished people.

*Severe Asthma* Oct 01 2022 Severe asthma is a form of asthma that responds poorly to currently available medication, and its patients represent those with greatest unmet needs. In the last 10 years, substantial progress has been made in terms of understanding some of the mechanisms that drive severe asthma; there have also been concomitant advances in the recognition of specific molecular phenotypes. This ERS Monograph covers all aspects of severe asthma – epidemiology, diagnosis, mechanisms, treatment and management – but has a particular focus on recent understanding of mechanistic heterogeneity based on an analytic approach using various 'omics platforms applied to clinically well-defined asthma cohorts. How these advances have led to improved management targets is also emphasised. This book brings together the clinical and scientific expertise of those from around the world who are collaborating to solve the problem of severe asthma.

*Nothing Left to Steal* Apr 14 2021 This tell-all memoir reveals the details behind Sunday Times journalist Mzilikazi wa Afrika's exposure of the R1.7 billion lease scandal between police commissioner Bheki Cele and property tycoon Roux Shabangu, for which he was infamously arrested in 2010. It is also the riveting account of how a neglected boy in an unknown village became one of South Africa's most awarded investigative reporters and found himself at the receiving end of the corruption that had defeated those he helped put in power. Fearless in the face of corrupt authorities with sinister political motives, and fervent about justice, Wa Afrika's life was characterised by resistance to oppression and inequality from an early age. Destined to defend and uphold the principles of democracy, his story is the inspiring tale of an ordinary man, armed with a pen, who challenged the proverbial giant.

*Reporting the First World War in the Liminal Zone* Dec 31 2019 This book deals with an aspect of the Great War that has been largely overlooked: the war reportage written based on British and American authors' experiences at the Western Front. It focuses on how the liminal experience of the First World War was portrayed in a series of works of literary journalism at different stages of the conflict, from the summer of 1914 to the Armistice in November 1918. Sara Prieto explores a number of representative texts written by a series of civilian eyewitness who have been passed over in earlier studies of literature and journalism in the Great War. The texts under discussion are situated in the 'liminal zone', as they were written in the middle of a transitional period, half-way between two radically different literary styles: the romantic and idealising ante bellum tradition, and the cynical and disillusioned modernist school of writing. They are also the product of the various stages of a physical and moral journey which took several authors into the fantastic albeit nightmarish world of the Western Front, where their understanding of reality was transformed beyond anything they could have anticipated.

*Medieval Spain* Aug 07 2020 This volume of essays contains contributions from a very wide range of British, American and Spanish scholars. Its primary concern is the relationships between the various ethnic, cultural, regional and religious communities that co-existed in the Iberian peninsula in the later Middle Ages. Conflicts and mutual interactions between them are here explored in a range of both historical and literary studies, to expose something of the rich diversity of the cultural life of later medieval Spain.

**Community Seed Banks** Dec 11 2020 Community seed banks first appeared towards the end of the 1980s, established with the support of international and national non-governmental organizations. This book is the first to provide a global review of their development and includes a wide range of case studies. Countries that pioneered various types of community seed banks include Bangladesh, Brazil, Ethiopia, India, Nepal, Nicaragua, the Philippines and Zimbabwe. In the North, a particular type of community seed bank emerged known as a seed-savers network. Such networks were first established in Australia, Canada, the UK and the USA before spreading to other countries. Over time, the number and diversity of seed banks has grown. In Nepal, for example, there are now more than 100 self-described community seed banks whose functions range from pure conservation to commercial seed production. In Brazil, community seed banks operate in various regions of the country. Surprisingly, despite 25 years of history and the rapid growth in number, organizational diversity and geographical coverage of community seed banks, recognition of their roles and contributions has remained scanty. The book reviews their history, evolution, experiences, successes and failures (and reasons why), challenges and prospects. It fills a significant gap in the literature on agricultural biodiversity and conservation, and their contribution to food sovereignty and security.
