Student Writing Oct 04 2019 Student Writing presents an accessible and thought-provoking study of academic writing practices. Informed by 'composition' research from the US and 'academic literacies studies' from the UK, the book challenges current official discourse on writing as a 'skill'. Lillis argues for an approach which sees student writing as social practice. The book draws extensively on a three-year study with ten non-traditional students in higher education and their experience of academic writing. Using case study material - including literacy history interviews, extended discussions with students about their writing of discipline specific essays, and extracts from essays - Lillis identifies the following as three significant dimensions to academic writing: * Access to higher education and to its language and literacy representational resources * Regulation of meaning making in academic writing * Desire for participation in higher education and for choices over ways of meaning in academic writing. Student Writing: access, regulation, desire raises questions about why academics write as they do, who benefits from such writing, which meanings are valued and how, on what terms 'outsiders' get to be 'insiders' and at what costs.

The Formation of Professional Identity Jan 19 2021 Becoming a lawyer is about much more than acquiring knowledge and technique. As law students learn the law and acquire some basic skills, they are also inevitably forming a deep sense of themselves in their new roles as lawyers. That sense of self - the student's nascent professional identity - needs to take a particular form if the students are to fulfil the public purposes of lawyers and find deep meaning and satisfaction in their work. In this book, Professors Patrick Longan, Daisy Floyd, and Timothy Floyd combine what they have learned in many years of teaching and research concerning the lawyer's professional identity with lessons derived from legal ethics, moral psychology, and moral philosophy. They describe in depth the six virtues that every lawyer needs as part of his or her professional identity, and they explore both the obstacles to acquiring and deploying those virtues and strategies for overcoming those impediments. The result is a straightforward

guide for law students on how to cultivate a professional identity that will allow them to make a meaningful difference in the lives of others and to flourish as individuals.
