**Families Caring for an Aging America** Feb 19 2022 Family caregiving affects millions of Americans every day, in all walks of life. At least 17.7 million individuals in the United States are caregivers of an older adult with a health or functional limitation. The nation's family caregivers provide the lion's share of long-term care for our older adult population. They are also central to older adults' access to and receipt of health care and community-based social services. Yet the need to recognize and support caregivers is among the least appreciated challenges facing the aging U.S. population. Families Caring for an Aging America examines the prevalence and nature of family caregiving of older adults and the available evidence on the effectiveness of programs, supports, and other interventions designed to support family caregivers. This report also assesses and recommends policies to address the needs of family caregivers and to minimize the barriers that they encounter in trying to meet the needs of older adults.

**The Road to America's Economic Meltdown** Dec 28 2019 This is a story about one of our own, a US Army Sergeant who returns home after serving many years overseas. He had been to two different wars and, after 14 years overseas, this was to be his first duty assignment inside the United States. He encountered great difficulty from his home state when he tried to obtain his local driver's license, and only with the aid of a state senator, was he able to obtain his license. Then, when he went to register his car, in the new state where he was assigned, he noticed that he was being required to pay for unusual things before he was allowed to register his car. After going through all the local government's money making schemes, he, along with his wife and children, bought a house, using a mortgage, not far from where they were renting. They did so just in time to get caught up in the developing housing crisis that may affect his family's ability to hold on to their beautiful home. The sergeant had to do some quick thinking and find out everything he could about what was really going on; was there a conspiracy for the rich to get richer-at the expense of everyone else-was he the subject of predatory lending, and would his family suffer through the embarrassment of the foreclosure

process? The sergeant began researching the history of land development, mortgaging, foreclosure, the economic crisis, and the government's involvement in all of this—and this is what he learned.

*The Armed Forces: Instrument of Peace, Strength, Development and Prosperity* May 13 2021 Across the ages, technological developments have been accelerated by the military. This results from the fact that able-bodied vibrant youths are generally involved and are also exposed to high-tech training prevailing at their times for assignments (defence and security) that are essential but not desired. They form the Armed Forces for the nations. Such brilliant military officers like Caesar and Napoleon made their marks; and, in contemporary times, the Armed Forces of United States, France, Britain, Australia, etc are making remarkable contributions to technological developments. Such infrastructure as the Internet, the GPS and the cell phones are products that have significant military contributions. This book scans across the major regions of the world, highlights the efforts of representative countries in the regions and observes that nations that have harnessed the efforts of their Armed Forces have progressively developed. It is also observed that developments in America and Europe, though not entirely dependent on their Armed Forces, have been greatly affected by their efforts. In Asia, such countries as the People's Republic of China, Brazil, India, Pakistan and Singapore utilise the human and material resources within the Armed Forces for national growth and cohesion. Development effort is least in the African Region, except South Africa and Egypt; notwithstanding the high potentials as exhibited by Nigeria's Armed Forces. Although attempts to industrialise through the Armed Forces may be able to create economic development for developing nations, such factors as historical background, economic resources, political climate, government policies and infrastructure are equally important. Economic development programme of an aspiring country should: i. promote education and access to knowledge ii. aspire to economic self-sufficiency in economic power iii. allow and promote private sector and foreign participation in defence production, research and development iv. commit itself to the establishment and support of defence industries v. indigenise defence programmes, establish a balance between military and economic development and vi. mobilise the nation's economy through technology partnership with the private sector and foreign investors.

**Social Capital in American Life** Mar 23 2022 Embarking from a model of social capital hinging upon four social structures—work, family, social networks, and voluntary associations—Brian Jones empirically examines the widespread claims that American society is becoming less sociable, trusting, and cooperative. Breaking down datasets drawn from the General Social Survey (conducted 27 times from 1972 to 2008), *Social Capital in American Life* depicts the social values drawn from the four established social structures, as well as their interrelationships, their determinants, and ultimately their social capital, through a series of statistical and econometric methods. This rigorous, empirically driven analysis reveals how American society both confirms and repudiates fears about decreased cooperation given different cases and parameters.

**Math Education for America?** Jan 09 2021 *Math Education for America?* analyzes math education policy through the social network of individuals and private and public organizations that influence it in the United States. The effort to standardize a national mathematics curriculum for public schools in the U.S. culminated in 2010 when over 40 states adopted the Common Core State Standards for Mathematics. Rather than looking at the text of specific policy documents, this book complements existing critical reviews of the national math education curriculum by employing a unique social network analysis. Breaking new ground in detailing and theorizing the politics of math education, Wolfmeyer argues that the private interests of this network are closely tied to a web of interrelated developments: human capital education policy, debates over traditional and reform pedagogy, the assumed content knowledge deficit of math teachers, and the proliferation of profit-driven educational businesses. By establishing the interconnectedness of these interests with the national math education curriculum, he shows how the purported goals of math education reform are aligned with the prevailing political agendas of this social network rather than the national interest.

**Africa Speaks, America Answers** Jan 01 2023 In Bedford-Stuyvesant, Brooklyn, pianist Randy Weston and bassist Ahmed Abdul-Malik celebrated with song the revolutions spreading across Africa. In Ghana and South Africa, drummer Guy Warren and vocalist Sathima Bea Benjamin fused local musical forms with the dizzying innovations of modern jazz. These four were among hundreds of musicians in the 1950's and '60's who forged connections between jazz and Africa that definitively reshaped both their music and the world. Each artist identified in particular ways with Africa's struggle for liberation and made music dedicated to, or inspired by, demands for independence and self-determination. That music was the wild, boundary-breaking exultation of modern jazz. The result was an abundance of conversation, collaboration, and tension between African and African American musicians during the era of decolonization. This collective biography demonstrates how modern Africa reshaped jazz, how modern jazz helped form a new African identity, and how musical convergences and crossings altered politics and culture on both continents. In a crucial moment when freedom electrified the African diaspora, these black artists sought one another out to create new modes of expression. Documenting individuals and places, from Lagos to Chicago, from New York to Cape Town, Robin Kelley gives us a meditation on modernity: we see innovation not as an imposition from the West but rather as indigenous, multilingual, and messy, the result of innumerable exchanges across a breadth of cultures.

*The Encyclopedia of Civil Liberties in America* Aug 04 2020 Driven by the growing reality of international terrorism, the threats to civil liberties and individual rights in America are greater today than at any time since the McCarthy era in the 1950s. At this critical time when individual freedoms are being weighed against the need for increased security, this exhaustive three-volume set provides the most detailed coverage of contemporary and historical issues relating to basic rights covered in the United States Constitution. The *Encyclopedia of Civil Liberties in America* examines the history and hotly contested debates surrounding the concept and practice of civil liberties. It provides detailed history of court cases, events, Constitutional amendments and rights, personalities, and themes that have had an impact on our freedoms in America. The *Encyclopedia* appraises the state of civil liberties in America today, and examines growing concerns over the limiting of personal freedoms for the common good. Complete with selected relevant documents and a chronology of civil liberties developments, and arranged in A-Z format with multiple indexes for quick reference, *The Encyclopedia of Civil Liberties in America* includes in-depth coverage of: freedom of speech, religion, press, and assembly, as outlined in the first amendment; protection against unreasonable search and seizure, as outlined in the fourth amendment; criminal due process rights, as outlined in the fifth, sixth, seventh, and eighth amendments; property rights, economic liberties, and other rights found within the text of the United States Constitution; Supreme Court justices, presidents, and other personalities, focusing specifically on their contributions to or effect on civil liberties; concepts, themes, and events related to civil liberties, both practical and theoretical; court cases and their impact on civil liberties.

**The Long Game** Oct 30 2022 In *The Long Game*, Rush Doshi demonstrates that China is in fact playing a long, methodical game to replace America as a global hegemon. Drawing from a rich base of Chinese primary sources, including decades worth of party documents and memoirs by party leaders, he traces the basic evolution of Chinese strategy, showing how it evolved in response to changes in US policy and the US's position in the world order.

**Religious Freedom in America** Nov 18 2021 This truly interdisciplinary volume brings together respected historians, social scientists, legal scholars, and advocates. As their contributions attest, understanding religious freedom demands taking multiple perspectives. The historians guide us through the contested legacy of religious freedom, from the nation's founding and the rise of public education, to the subsequent waves of immigration that added successive layers of diversity to American society.

**The Negro Motorist Green Book** Oct 18 2021 The idea of "The Green Book" is to give the Motorist and Tourist a Guide not only of the Hotels and Tourist Homes in all of the large cities, but other classifications that will be found useful wherever he may be. Also facts and information that the Negro Motorist can use and depend upon. There are thousands of places that the public doesn't know about and aren't listed. Perhaps you know of some? If so send in their names and addresses and the kind of business, so that we might pass it along to the rest of your fellow Motorists. You will find it handy on your travels, whether at home or in some other state, and is up to date. Each year we are compiling new lists as some of these places move, or go out of business and new business places are started giving added employment to members of our race.

**Reconfiguring Global Climate Governance in North America** Jul 03 2020 Global climate governance has presented problems that have led to failures, yet it has also opened the door to new transregional governance schemes, especially in North America. This book introduces an environmental dimension into the concept of governance. Almost fifteen years after the climate global governance concept emerged, results worldwide have not been as favorable as expected. This book details previous discussions about the concept of global climate governance and its limits. It highlights how the Kyoto Protocol has a limited design taking into account a national approach to global, regional, and transnational problems, had no obligatory mechanisms for implementation and explains the emergence of new polluters not committed under it such as China and India. Furthermore this book explores other levels of authority such as regional institutions - the North American agreement on trade (NAFTA) and on environment (NAAEC), as well as the regional energy working group (NAEWG). The author puts forward a theoretical proposal for re-territorialization and coordination of policies for climate change into new forms of articulating interests in what she terms transnational green economic regions (TGERs) and tests this on two case studies - the Regional Greenhouse Gas Initiative (RGGI) and the Western Climate Initiative (WCI). This study presents the challenges and opportunities of a transregional approach in North America.

**Justice in America** May 01 2020 As reactions to the O. J. Simpson verdict, the Rodney King beating, and the Amadou Diallo killing make clear, whites and African Americans in the United States inhabit two different perceptual worlds, with the former seeing the justice system as largely fair and color blind and the latter believing it to be replete with bias and discrimination. The authors tackle two important questions in this book: what explains the widely differing perceptions, and why do such differences matter? They attribute much of the racial chasm to the relatively common personal confrontations that many blacks have with law enforcement - confrontations seldom experienced by whites. More importantly, the authors demonstrate that this racial chasm is consequential: it leads African Americans to react much more cynically to incidents of police

brutality and racial profiling, and also to be far more skeptical of punitive anti-crime policies ranging from the death penalty to three-strikes laws. **The Future of Disability in America** Sep 04 2020 The future of disability in America will depend on how well the U.S. prepares for and manages the demographic, fiscal, and technological developments that will unfold during the next two to three decades. Building upon two prior studies from the Institute of Medicine (the 1991 Institute of Medicine's report *Disability in America* and the 1997 report *Enabling America*), *The Future of Disability in America* examines both progress and concerns about continuing barriers that limit the independence, productivity, and participation in community life of people with disabilities. This book offers a comprehensive look at a wide range of issues, including the prevalence of disability across the lifespan; disability trends the role of assistive technology; barriers posed by health care and other facilities with inaccessible buildings, equipment, and information formats; the needs of young people moving from pediatric to adult health care and of adults experiencing premature aging and secondary health problems; selected issues in health care financing (e.g., risk adjusting payments to health plans, coverage of assistive technology); and the organizing and financing of disability-related research. *The Future of Disability in America* is an assessment of both principles and scientific evidence for disability policies and services. This book's recommendations propose steps to eliminate barriers and strengthen the evidence base for future public and private actions to reduce the impact of disability on individuals, families, and society.

**Connecting America** Jun 01 2020 Broadband is the great infrastructure challenge of the early 21st century. Broadband is a foundation for economic growth, job creation, global competitiveness and a better way of life. The number of Americans who have broadband at home has grown from 8 million in 2000 to nearly 200 million last year. But, 100 million Americans do not have broadband at home. In early 2009, Congress directed the FCC to develop a National Broadband Plan to ensure that every American has access to broadband capability. This plan must also include a strategy for achieving affordability and maximizing use of broadband. The plan presented here ensures that the entire broadband ecosystem, networks, devices, content and applications, is healthy. Illus.

*Telling America's Story to the World* Apr 11 2021 Telling America's Story to the World argues that state and state-affiliated cultural diplomacy contributed to the making of postwar US literature. Highlighting the role of liberal internationalism in US cultural outreach, Harilaos Stecopoulos contends that the state mainly sent authors like Ralph Ellison, Robert Frost, William Faulkner, Langston Hughes, and Maxine Hong Kingston overseas not just to demonstrate the achievements of US civilization but also to broadcast an American commitment to international cross-cultural connection. Those writers-cum-ambassadors may not have helped the state achieve its propaganda goals-indeed, this rarely proved the case-but they did find their assignments an opportunity to ponder the international meanings and possibilities of US literature. For many of those figures, courting foreign publics inspired a reevaluation of the scope and form of their own literary projects. Testifying to the inadvertent yet integral role of cultural diplomacy in the worlding of US letters, works like *The Mansion* (1959), *Life Studies* (1959), "Cultural Exchange" (1961, 1967), *Tripmaster Monkey: His Fake Book* (1989), and *Three Days Before the Shooting...* (2010) reimagine US literature in a mobile, global, and distinct political register.

*China's Grand Strategy* Dec 20 2021 To explore what extended competition between the United States and China might entail out to 2050, the authors of this report identified and characterized China's grand strategy, analyzed its component national strategies (diplomacy, economics, science and technology, and military affairs), and assessed how successful China might be at implementing these over the next three decades.

**Encyclopedia of Political Communication** Apr 23 2022 "Political communication began with the earliest studies of democratic discourse by Aristotle and Plato. However, modern political communication relies on an interdisciplinary base, which draws on concepts from communication, political science, journalism, sociology, psychology, history, rhetoric, and others. This two-volume resource considers political communication from a broad interdisciplinary perspective, encompassing the many different roles that communication plays in political processes in the United States and around the world. The *Encyclopedia of Political Communication* discusses the major theoretical approaches to the field, including direct and limited effects theories, agenda-setting theories, sociological theories, framing and priming theories, and other past and present conceptualizations. With nearly 600 entries, this resource pays considerable attention to important political messages such as political speeches, televised political advertising, political posters and print advertising, televised political debates, and Internet sites. The audiences for political communications are also central, necessitating concentration on citizen reactions to political messages, how the general public and voters in democratic systems respond to political messages, and the effects of all types of media and message types. Key Features: Encompasses several channels of political communication including interpersonal and public communication, radio, television, newspapers, and the World Wide Web Provides news media coverage and journalistic analysis of politics, political issues, political figures, and political institutions Concentrates on the field of political communication since the middle of the 20th century Emphasizes political communication from the point of view of the United States, but there is substantial and important research and scholarship on political communication in international contexts Considers the role of communication in governing, incorporating communication activities that influence the operation of executive, legislative, and judicial bodies, political parties, interest groups, political action committees, and other participants in political processes Key Themes: Biographies Books, Films, Journals, Television Democracy, Democratization Education and Nonprofit Organizations Elections Government Operations and Institutions Legal and Regulatory Media Events Media Outlets and Programs Role of Media in Political Systems News Media Coverage of Politics, Political Affairs Theoretical Approaches Types of Political Media Political Attitudes Political Campaigns Political Events Political Groups and Organizations Political Issues Political Journalism Theoretical Concepts Women in Politics The *Encyclopedia of Political Communication* is designed for libraries, undergraduates, and members of the public with an interest in political affairs. Media and political professionals, as well as government officials, lobbyists, and participants in independent political organizations, will find these volumes useful in developing a better understanding of how the media and communication function in political settings." <http://catdir.loc.gov/catdir/enhancements/fy0828/2007026514-d.html>.

**Smart Women: The Search for America's Historic All-Women Study Clubs** Feb 28 2020 Hiding in plain sight throughout America are historic, highly private women's self-education groups. These clubs are fascinating survivors from an era following the Civil War when women couldn't apply to most colleges and were told they shouldn't leave the home. In their earliest days, the study groups also contributed to the welfare of their towns - often by helping to found their town's first library-and served to get women out of the house and into the world. Today's all-women study clubs have no civic component but still fashion their meetings as their founding great-grandmothers did, with members taking turns giving original papers. In *Smart Women*, author Ann Dodds Costello discusses her four-year quest to locate, often visit, and describe today's 100-year-old, all-women study clubs, all over America, even though they do not publicize and have no central organization or knowledge of each other. Included: an invaluable, first-ever directory of most of the book's ninety-plus clubs.

**American Colonies** Jun 25 2022 "The *American Colonies*" provides a detailed and richly illustrated overview of the trials of Europeans in the New World. From the earliest primitive encampments on the Atlantic seacoast to the settled societies of the later colonial period, this book vividly describes the disastrous first years, the strained reliance on native peoples, the horrors of the African slave trade, and deteriorating relations with England, which stand in marked contrast to the hope, strength, resilience, and determination with which colonialists carved a nation

out of the North American wilderness. Challenging review questions encourage meaningful reflection and historical analysis. Maps, tests, answer key, and extensive bibliography are included.

**How America Stacks Up** Aug 28 2022 American leadership in the world is built on the foundation of its economic strength. Yet the United States faces enormous economic competition abroad and threats to its economy at home. In *How America Stacks Up: Economic Competitiveness and U.S. Policy*, Edward Alden, Bernard L. Schwartz senior fellow at the Council on Foreign Relations and director of the Renewing America initiative, and Rebecca Strauss, associate director of Renewing America, focus on those areas of economic policy that are the most important for reinforcing America's competitive strengths. Covering education, transportation, trade and investment, corporate tax, worker retraining, regulation, debt and deficits, and innovation, *How America Stacks Up* shows how, in a highly competitive global economy, these seemingly domestic issues are all crucial to U.S. success in the global economy. The line between domestic economic policy and foreign economic policy is now almost invisible, and getting these policies right matters for more than just U.S. living standards. The United States' ability to influence world events rests on a robust, competitive economy. But without further investment in education, infrastructure, and innovation, Alden and Strauss show, the United States runs the risk of endangering its greatest competitive advantage. Through insightful analysis and engaging graphics, *How America Stacks Up* outlines the challenges faced by the United States and prescribes solutions that will ensure a healthy, competitive U.S. economy for years to come.

Outdoor Recreation in America Aug 16 2021 *Outdoor Recreation in America* is back - fully revised and updated, with significant new material based on current statistics from a number of sources, including the latest U.S. Census Bureau and the National Survey on the Environment. Now in its sixth edition, this book continues to lead the way in its comprehensive coverage of issues and challenges in this growing field. *Outdoor Recreation in America, Sixth Edition*, offers the big-picture view of outdoor recreation, delves into the current issues with the latest statistics, describes the roles of the various natural resource managers, discusses the trends that affect outdoor recreation, addresses economic issues, describes funding options, and provides the most comprehensive coverage available in a single text. In short, it is the book for current and future outdoor recreation professionals to use in learning about the past and present status as well as the future of outdoor recreation in America.
