Ireland's Professional Amateurs Nov 16 2021 When American sportswriter Andy Mendlowitz took a summer vacation to Ireland, his itinerary included visiting medieval castles and drinking dark beer. He soon discovered a world where big-time sports aren't yet a business, but still a game. Ireland's rough-and-tumble pastimes of hurling and Gaelic football attract crowds of up to 80,000 fans a contest. The high-profile players, though, are amateurs. They train as professionals but must work fulltime jobs to pay the bills. The Gaelic Athletic Association (GAA) also lacks free agency or trades—you simply play for your hometown team, even if you move away. Amazed by this concept, and burned out at work, Mendlowitz quit his job and moved to Ireland for eight months. His aim was to get excited again by understanding what drives these athletes. Along the way, he met interesting characters and learned how the sports intersect with the ancient Irish language, burgeoning economy and the Troubles in Northern Ireland. From big cities like Belfast, Dublin and Cork to tiny rural parishes, Mendlowitz paints a vivid picture of Ireland and the joy of competing.

Pharmacy on a Bicycle Dec 25 2019 Every four minutes, over 50 children under the age of five die. In the same four minutes, 2 mothers lose their lives in childbirth. Every year, malaria kills nearly 1.2 million people, despite the fact that it can be prevented with a mosquito net and treated for less than \$1.50. Sadly, this list goes on and on. Millions are dying from diseases that we can easily and inexpensively prevent, diagnose, and treat. Why? Because even though we know exactly what people need, we just can't get it to them. They are dying not because we can't solve a medical problem but because we can't solve a logistics problem. In this profoundly important book, Eric G. Bing and Marc J. Epstein lay out a solution: a new kind of bottom-up health care that is delivered at the source. We need microclinics, micropharmacies, and microentrepreneurs located in the remote, hard-to-reach communities they serve. By building a new model that "scales down" to train and incentivize all kinds of health-care providers in their own villages and towns, we can create an army of on-site professionals who can prevent tragedy at a fraction of the cost of top-down bureaucratic programs. Bing and Epstein have seen the model work, and they provide example after example of the extraordinary results it has achieved in Africa, Asia, and Latin America. This is a book about taking health care the last mile—sometimes literally—to prevent widespread, unnecessary, and easily avoided death and suffering. *Pharmacy on a Bicycle* shows how the same forces of innovation and entrepreneurship that work in first-world business cultures can be unleashed to save the lives of millions.

The Collected Papers of R.h. Bing Dec 17 2021 A powerful mathematician and a great problem solver, R. H. Bing laid the foundation for a number of areas of topology. Many of his papers have continued to serve as a source of major theoretical developments and concrete applications in recent years. One outstanding example was Michael H. Freedman's use of Bing's Shrinking Criterion to solve the four-dimensional Poincaré Conjecture. This two-volume set brings together over one hundred of Bing's research, expository, and miscellaneous papers. These works range over a great variety of topics in topology, including the topology of manifolds, decomposition spaces, continua, metrization, general topology, and geometric topology. In addition, there are a number of papers in the areas of convex functions, linearity, and conformal varieties. The introductory section in the first volume provides historical background on Bing's life and achievements. This collection will appeal to mathematicians in all areas, and especially those in topology, as well as students, historians, and educators in the mathematical sciences, for it provides a complete historical summary of the mathematical events in the life of the man and the mathematician, R. H. Bing.

The Medical World Jun 23 2022

Understanding Medical Terms Jan 18 2022 PREFACE TO THE SECOND EDITION The need for a thorough understanding of medical terminology has not diminished in the least for pharmacists and other health care practitioners in the five years between the publication of the first edition of this book and this second edition. If anything, it has become greater. The pharmacy profession has further solidified its clinical role in patient care, and pharmacists are more entrenched than ever before in the role of counselor and advisor to both patients and practitioners alike. For more than a few pharmacists, what not long ago was an occasional question from a physician about appropriate drug therapy has become regular consultation concerning the interaction of drugs with the patient, his life, and the many other therapies he may be facing. Pharmacy chains, which not long ago installed glass walls to separate the pharmacist from customers, have asked technicians to count pills while pharmacists are in continuous contact with the patient. Such practice changes have increased the demand for clinical knowledge among pharmacists, including a knowledge of medical terminology, and those demands have been passed on to the authors in preparation of the second edition of this book. While the role of the text is still to help pharmacists be more effective interpreters and counselors, some changes have been made in response to reader requests.

Chinese Ibsenism Jul 24 2022 This book is a study of the relation between theatre art and ideology in the Chinese experimentations with new selfhood as a result of Ibsen's impact. It also explores Ibsenian notions of self, women and gender in China and provides an illuminating study of Chinese theatre as a public sphere in the dissemination of radical ideas. Ibsen is the major source of modern Chinese selfhood which carries notions of personal and social liberation and has exerted great impacts on Chinese revolutions since the beginning of the twentieth century. Ibsen's idea of the self as an individual has led to various experimentations in theatre, film and fiction to project new notions of selfhood, in particular women's selfhood, throughout the history of modern China. Even today, China is experimenting with Ibsen's notions of gender, power, individualism and self. Kwok-kan Tam is Chair Professor of English and Dean of Humanities and Social Science at the Hang Seng University of Hong Kong. Solutions Galore May 10 2021 Most of us see the world as a mess of Problems. There's Global Warming, or more politically correct, Global Climate Change, or more technically correct, Comprehensive Climate Chaos. And besides, that last one is alliterative – each word starts with the same letter. There's overpopulation. There's increasing homelessness (houselessness) and poverty. There's disparity, job loss, and permanent unemployment. The ocean's becoming a garbage dump, the Great Barrier Reef is dying, and the seas are overfished. There are wars. The political parties are at each other's throats. And there are too many guns in the hands of dangerous criminals. I could keep going. However, you are probably already suffering from mild depression having just read the above. And I'm now a basket case. Yes, the world is full of Problems. Notwithstanding, the world is also full of Solutions. It's hard to find Solutions in the news. The media focuses on Problems. For some reason they think that will drive readership / viewership up. So you really have to search for any good news. And Solutions are even harder to spot. In spite of that, good things are happening in the world. Enough Electric Vehicles are being sold in the US that in 2019, incentives for buying a Tesla started to be phased out. Renewable Energy is on the rise. Even though the world population continues to rise, several countries are seeing population decline. Miracles are being discovered to help restore the Great Barrier Reef and to extract plastic from the ocean. Solutions are even being unearthed which can prevent Comprehensive Climate Chaos. Feeling a little better? Great! It's daybreak. It's time for us to start seeing a world of Solutions Galore. It's time to jump onto the Solutions Bandwagon. For every Problem, there are a myriad of Solutions. Quite often, you only need to discover one. The purpose of Solutions Galore is to present methods to Solve Problems. There are Solutions in this book, mostly by way of example. But that is not the main purpose of this book. The purpose is to help you more easily Create Solutions to any Problem.

Sourcing and Recruitment Handbook Oct 15 2021 The sourcing and recruitment community has come a long way from what it used to be 20 years back and as recently as 5 years back and the amount of technology changes has kept everyone on the tenterhooks. The methods that you would adopt or Boolean strings that used to work today may not work tomorrow and there is a constant learning curve to keep oneself updated and also brings a healthy level of competition among individuals eager to show their wares. The volume based or niche skills hiring has become a race to the finish. The individuals with the super sourcing as well as relationship management skills tend to be more often than not the winners in the end. The recruitment community looks to find the needle in the haystack every day to find the right candidate to fulfill the hiring manager mandate. The ever bulging stock of search strings, productivity tricks and their ways of thinking they implement are a stuff of legend. The tools do not make a Sourcer or recruiter but they should always be seen as an assistant to free up their time for more productive conversations with prospective candidates. This exercise is an attempt to equip the Talent Acquisition community with the various ways and methods to optimize their time and find the relevant information (trends, movers and shakers etc.) to be better prepared to find relevant candidates for their clients (internal or external). It is by no means an exhaustive list but a start nonetheless.
