Climate Change Research at Universities Jan 11 2021 This unique book provides a multidisciplinary review of current, climate-change research projects at universities around the globe, offering perspectives from all of the natural and social sciences. Numerous universities worldwide pursue state-of-the-art research on climate change, focussing on mitigation of its effects as well as human adaptation to it. However, the 2015 Paris 21st Conference of the Parties of the United Nations Framework Convention on Climate Change (UNFCCC) (COP 21)" demonstrated that there is still much room for improvement in the role played by universities in international negotiations and decision-making on climate change. To date, few scientific meetings have provided multidisciplinary perspectives on climate change in which researchers across the natural and social sciences could come together to exchange research findings and discuss methods relating to climate change mitigation and adaptation studies. As a result the published literature has also lacked a broad perspective. This book fills that gap and is of interest to all researchers and policy-makers concerned with global climate change regardless of their area of expertise.

India Migration Report 2012 Nov 08 2020 This volume is a collection of articles dealing with various dimensions of the Global Financial Crisis and its economic and social impact in terms of governance, emigration, remittances, return migration and re-integration. The crisis, which had its origin in the United States in 2008, spread its economic effects on developed as well as developing countries. Some of these countries were able to recover in the short run while some are in the process of recovery, with continuous efforts by both national governments and international agencies. The third volume in the annual series 'India Migration Report' answers the question through rigorous quantitative and qualitative analyses and fieldwork both in the Gulf region and South Asia, and concludes that both emigration and remittances are more resilient than expected. This report: contains findings based on an extensive survey conducted in Kerala; has additional evaluations based on other surveys and case studies conducted in different parts of India, Pakistan, Bangladesh, Nepal and Sri Lanka to reflect on the consequences of the global crisis on the countries of origin, as well as a quick assessment and site visits to the United Arab Emirates, Kuwait, Qatar and Malaysia; includes essays that examine the linkages between emigration and remittances based on international data from the World Bank, the International Labour Organization, the International Organization of Migration, the United Nations and other organizations that closely deal with international migration. It will be of interest to students and scholars of migration studies, sociology, law, economics, gender studies, diaspora studies, international relations and demography, apart from non-governmental organizations, policy-makers and government institutions working in the field of migration.
