Profit and Loss Dec 22 2021 Celebrated as an unusually original poet - nervy, refreshing, deceptively simple - Leontia Flynn has quickly developed into a writer of assured technical complexity and a startling acuity of perception. In her third collection, Flynn examines and dismantles a fugitive life. The first sequence moves through a series of rooms, reflecting on aspects of the author's personal and family history. Using the idea of the haunted house or the house with a sealed-off room, and Gothic tropes of madness, doubles, revenants and religious brooding, the poems consider ideas of inheritance and legacy. The second section comprises a magnificent long poem written in the months leading up to the banking crisis and presidential election of October 2008. Taking as its occasion a flat-clearing, it assumes a more public voice (inspired partly by Auden's 'Letter to Lord Byron'), and reflects on aspects of the rapid social and technological change of the last decade. An extraordinarily moving reflection on mutability and mortality prompted by the spring-cleaning of a life's detritus, 'Letter to Friends' evolves from a private reliquary to a public obsequy. Its collapse back into private griefs, including the poet's father's decline into Alzheimer's disease, is pursued in the third section of the book. Here the theme of a tallying of private and public balance sheets, of different kinds of profit and loss, widens to include poems of motherhood and marriage, the possibilities of hope and repair.

Songs of Profit, Songs of Loss: Private Equity, Wealth, and Inequality Jan 11 2021 Since the early 1980s, private equity investors have heralded and shepherded massive changes in American capitalism. From outsourcing to excessive debt taking, private equity investment helped normalize once-taboo business strategies while growing into an over \$3 trillion industry in control of thousands of companies and millions of workers. Daniel Scott Souleles opens a window into the rarefied world of private equity investing through ethnographic fieldwork on private equity financiers. Songs of Profit, Songs of Loss documents how and why investors buy, manage, and sell the companies that they do; presents the ins and outs of private equity deals, management, and valuation; and explains the historical context that gave rise to private equity and other forms of investor-led capitalism. In addition to providing invaluable ethnographic insight, Songs of Profit, Songs of Loss is also an anthropological study of inequality as Souleles connects the core components of financial capitalism to economic disparities. Souleles uses local ideas of “value” and “time” to frame the ways private equity investors comprehend their work and to show how they justify the prosperity and poverty they create. Throughout, Souleles argues that understanding private equity investors as contrasted with others in society writ large is essential to fully understanding private equity within the larger context of capitalism in the United States.
