*Neurosciences - From Molecule to Behavior: a university textbook* Oct 27 2019 Neurosciences – a comprehensive approach This textbook covers neuroscience from cellular and molecular mechanisms to behavior and cognitive processing. We also address evolution of the nervous system, computational neuroscience, the history of neuroscience as a discipline and neurophilosophy – to name but a few. The book provides the newest state-of-the-art knowledge about neuroscience from across the animal kingdom, with particular emphasis on model species commonly used in neuroscience labs across the world: mouse, zebra fish, fruit fly, honeybee, and nematode worm. We aim at university students of neuroscience, psychology, biological sciences, and medical sciences, but also computer scientists, philosophers, or anybody interested in understanding how brains work.

*Don't Go to Sleep in the Dark* Jan 23 2022 Don't Go to Sleep in the Dark (1972) was the first gathering of Celia Fremlin's short fiction, a form in which she had published prolifically - for the likes of She, Playmen, and Ellery Queen's Mystery Magazine - while building her reputation as a novelist of psychological suspense. Female characters predominate in these tales, as does the doom-filled atmosphere that was Fremlin's metier. She explores her familiar theme of strained mother-child relations, but she also delves into the supernatural realm as well as the psychological. As ever, her capacities for making the everyday unnerving and keeping the reader guessing are richly in evidence. 'Here are thirteen harrowing tales by the indisputable mistress of horror.' Chattanooga Times 'An outstanding collection...all are well-written and all are possible and none should be read when alone in a dark house.' Savannah Morning News

**Metallic Glasses** Jun 15 2021 Metallic glasses are very promising engineering and functional materials due to their unique mechanical, chemical, and physical properties, attracting increasing attention from both scientific and industrial communities. However, their practical applications are greatly hindered due to three main problems: dimensional limit, poor tension plasticity, and difficulty in machining and shaping. Therefore, further investigation of these issues is urgently required. This book provides readers with recent achievements and developments in the properties and processing of metallic glasses, including mainly thermoplastic forming of metallic glasses (Chapter 2), atomic-level simulation of mechanical deformation of metallic glasses (Chapter 3), metallic glass matrix composites (Chapter 4), and tribo-electrochemical applications of metallic glasses (Chapters 5 and 6).

**Math for the Digital Factory** Nov 28 2019 This volume provides a unique collection of mathematical tools and industrial case studies in digital manufacturing. It addresses various topics, ranging from models of single production technologies, production lines, logistics and workflows to models and optimization strategies for energy consumption in production. The digital factory represents a network of digital models and simulation and 3D visualization methods for the holistic planning, realization, control and ongoing improvement of all factory processes related to a specific product. In the past ten years, all industrialized countries have launched initiatives to realize this vision, sometimes also referred to as Industry 4.0 (in Europe) or Smart Manufacturing (in the United States). Its main goals are • reconfigurable, adaptive and evolving factories capable of small-scale production • high-performance production, combining flexibility, productivity, precision and zero defects • energy and resource efficiency in manufacturing None of these goals can be achieved without a thorough modeling of all aspects of manufacturing together with a multi-scale simulation and optimization of process chains; in other words, without mathematics. To foster collaboration between mathematics and industry in this area the European Consortium for Mathematics in Industry (ECMI) founded a special interest group on Math for the Digital Factory (M4DiFa). This book compiles a selection of review papers from the M4DiFa kick-off meeting held at the Weierstrass Institute for Applied Analysis and Stochastics in Berlin, Germany, in May 2014. The workshop aimed at bringing together mathematicians working on modeling, simulation and optimization with researchers and practitioners from the manufacturing industry to develop a holistic mathematical view on digital manufacturing. This book is of interest to practitioners from industry who want to learn about important mathematical concepts, as well as to scientists who want to find out about an exciting new area of application that is of vital importance for today's highly industrialized and high-wage countries.

**Lose Your Breath** Dec 22 2021 David Kane's completely gripping origin story. Find out how he went from Black Ops to Black Rock Falls in this short 150-page read you won't be able to put down. She pulls the door of her office closed and hurries over to her beaten-up old Toyota parked in a deserted alley. Slipping into the driver's seat, she checks the rear-view mirror, and her heart stops. Staring back at her are the dark eyes of a stranger. She opens her mouth to scream, but it's already too late... When secretary Annie Parkes is snatched from the street outside of her workplace, David Kane is tasked with finding her. Strong, highly skilled, and secretive, he's a loner and an outsider; the only man the military trust to find Annie before her kidnappers make good on their promise to kill her. But as Kane pulls Annie from a derelict building, gunshots ringing through the deserted streets around them, he realizes rescuing her is just the beginning. He needs to keep her close to find out who is behind her capture, and to keep her safe. Hiding out in a remote part of town, Kane feels the walls he put up around himself many years ago begin to slip in front of Annie. Could she be more than just a job? With an old enemy hot on his tail, showing any weakness could be fatal—but when Annie is dragged back into danger once again, could he already be too late? Fans of the USA Today bestselling Detectives Kane and Alton series will finally find out the truth behind Deputy David Kane's secret past. If you enjoy Lisa Regan, Melinda Leigh and Kendra Elliot you will love this gripping short read. What readers are saying about Lose Your Breath: "Just WOW. I absolutely LOVED this book... **From Design Into Print** Jun 27 2022 A designer in New York creates a beautiful design but when she prints it the colors become muddy. An art director in Seattle sends a file to the print shop, and they call him to say the job won't print. The editor of a college paper can't figure out why all the

pictures in the paper are jagged. And a freelance designer in Chicago needs to bid on her first print job. Linescreen, DPI, CMYK, RIPs, bleeds, spots, and spreads: Why didn't they teach this stuff in design school? Sandee Cohen comes to the rescue, whether you're producing your first newsletter or you're an experienced graphic designer who needs to come up to speed on professional-level printing. She'll tell you how to make your desktop printer behave, and will take the mystery out of dealing with print providers. You'll learn all the necessary techniques, the terminology, and the rules of printing (and when you can break them). It's like having your own production manager standing over your shoulder. The copious information in *From Design Into Print* will have your designs looking as stunning in print as they do on your monitor. This book will help you: Choose the right desktop printer for your needs Finally understand resolution Get the results you want from page-layout and image-editing applications Find the best stock images Know what to expect when RGB colors convert to CMYK Figure out your fonts Preflight your work Sound smart when talking to a print shop
