highlight boxes in each chapter gives the main points in bullet format for ease of access to students new to the area Well referenced [World History through Case Studies](#) Mar 05 2020 This innovative textbook demystifies the subject of world history through a diverse range of case studies. Each chapter looks at an event, person, or place commonly included in comprehensive textbooks, from prehistory to the present and from across the globe - from the Kennewick Man to gladiators and modern-day soccer and globalization - and digs deeper, examining why historians disagree on the subject and why their debates remain relevant today. By taking the approach of 'unwrapping the textbook,' David Eaton reveals how historians think, making it clear that the past is not nearly as tidy as most textbooks suggest. Provocative questions like whether ancient Greece was shaped by contact with Egypt provide an entry point into how history professors may sharply disagree on even basic narratives, and how historical interpretations can be influenced by contemporary concerns. By illuminating these historiographical debates, and linking them to key skills required by historians, World History through Case Studies shows how the study of history is relevant to a new generation of students and teachers.

Social Work Skills Oct 12 2020 "The second edition is very welcome and represents an extremely useful addition to theory/models texts. Pam brings a very lively style of debate to these issues and, extremely importantly, adds a critical edge which is what students require within the realm of contemporary practice." Professor Jonathan Parker, Head of Department of Social Work, University of Hull. What skills do social workers need to become effective practitioners? How can these skills be perfected and made transferable across different service user and carer groups, contexts, and countries? How can these skills be used to enhance multi-agency co-operation and collaboration? Written by an experienced academic-practitioner, the new edition of this best-selling text is updated to include the current educational, policy and practice context of social work. It includes descriptions of over fifty social work skills, with case examples to illustrate their creative use in practice. Giving a name to these skills, and being able to identify and demonstrate their effective use in contemporary social work practice, highlights the importance of an evidence based and research led approach to practice. In particular, this edition contains new material on: Social work methods, practice approaches and perspectives The knowledge base of social work and the importance of the relationship between theory and practice How the terms skill and intervention are defined and effectively applied in practice The starting point for this text is that social work is - and has to be - a highly skilled activity. It is important to stress this fact because social work practitioners work with some of the most complex, unpredictable and troubling areas of human experience. For this reason, social work practice is also an intellectual activity. This calls for practitioners to acquire a 'toolbox' of skills that can be used to enable people to move forward. Social Work Skills is essential reading for all social work students and a valuable reference text for practising social workers and human service professionals.
