The Ancient Mysteries And Modern Masonry Sep 08 2020 This interesting compilation of lectures was delivered to a Unitarian and Masonic congregation by the well known Charles Vail; a political, social, and religious figure, also a Mason, among other things. The topics vary from lecture to lecture; the brief history of Freemasonry, the symbols it employs, their meaning, and the older, sometimes pre-Christian traditions intertwined with the same. With plenty of remarks on the Knights Templar and other intriguing topics, Vails' work is one of the best of its kind.

Greece in the Twentieth Century Apr 03 2020 This collective study examines the transformation (metamorphosis) that Greece has experienced over the course of the 20th century by exploring its gradual

evolution into a consolidated democracy, an advanced economy in the Eurozone and a balanced partner in the EU and NATO promoting a stabilizing role in southeastern Europe. The book examines the variables contributing to the profiling of contemporary Greece, emphasizing the conceptual inertia bedeviling the studies of Greece in recent years by focusing on the elements that indicated the slow pace in the country's modernization. In conclusion, there is a need for Greece's constant commitment to functional adjustments regarding the country's economic, political and strategic priorities in order to promote effectively the role of regional stabilizer acting in concert with NATO and EU partners.

Scars, Marks & Tattoos Mar 15 2021 I have physical scars from past surgeries, however, I have emotional scars as well. They were buried deep inside (hidden). It wasn't until my mother died was I able to "catch my breath" and to make sense of or process the emotional pain I had endured due to her prescription drug addiction, resulting in my own addictions.

An Anglo-Norman Reader Sep 01 2022 This book is an anthology with a difference. It presents a distinctive variety of Anglo-Norman works, beginning in the twelfth century and ending in the nineteenth, covering a broad range of genres and writers, introduced in a lively and thought-provoking way. Facing-page translations, into accessible and engaging modern English, are provided throughout, bringing these texts to life for a contemporary audience. The collection offers a selection of fascinating passages, and whole texts, many of which are not anthologised or translated anywhere else. It explores little-known byways of Arthurian legend and stories of real-life crime and punishment; women's voices tell history, write letters, berate pagans; advice is offered on how to win friends and influence people, how to cure people's ailments and how to keep clear of the law; and stories from the Bible are retold with commentary, together with guidance on prayer and confession. Each text is introduced and elucidated with notes and full references, and the material is divided into three main sections: Story (a variety of narrative forms), Miscellany (including letters, law and medicine, and other non-fiction), and Religious (saints' lives, sermons, Bible commentary, and prayers). Passages in one genre have been chosen so as to reflect themes or stories that appear in another, so that the book can be enjoyed as a collection or used as a resource to dip into for selected texts. This anthology is essential reading for students and scholars of Anglo-Norman and medieval literature and culture. Wide-ranging and fully referenced,

it can be used as a springboard for further study or relished in its own right by readers interested to discover Anglo-Norman literature that was written to amuse, instruct, entertain, or admonish medieval audiences.

Severe Asthma Oct 22 2021 Severe asthma is a form of asthma that responds poorly to currently available medication, and its patients represent those with greatest unmet needs. In the last 10 years, substantial progress has been made in terms of understanding some of the mechanisms that drive severe asthma; there have also been concomitant advances in the recognition of specific molecular phenotypes. This ERS Monograph covers all aspects of severe asthma - epidemiology, diagnosis, mechanisms, treatment and management - but has a particular focus on recent understanding of mechanistic heterogeneity based on an analytic approach using various 'omics platforms applied to clinically well-defined asthma cohorts. How these advances have led to improved management targets is also emphasised. This book brings together the clinical and scientific expertise of those from around the world who are collaborating to solve the problem of severe asthma.
