So Long, Marianne Sep 06 2022 The story of the enigmatic beauty who captured the hearts of two extraordinary men At 22, Marianne Ihlen travelled to the Greek island of Hydra with writer Axel Jensen. While Axel wrote, Marianne kept house, until Axel abandoned her and their newborn son for another woman. One day while Marianne was shopping in a little grocery store, in walked a man who asked her to join him and some friends outside at their table. He introduced himself as Leonard Cohen, then a little-known Canadian poet. p.p1 (margin: 0.0px 0.0px 0.0px 0.0px; font: 16.0px Times; -webkit-text-stroke: #000000) span.s1 {font-kerning: none} Complemented by previously unpublished poems, letters, and photographs, So Long, Marianne is an intimate, honest account of Marianne's life story — from her youth in Oslo, her romance with Axel, to her life in an international artists colony on Hydra in the 1960s, and beyond. The subject of one of the most beautiful love songs of all time, Marianne Ihlen proves to be more than a muse to Axel and Leonard; her journey of self-discovery, romance, and heartache is lovingly recounted in So Long, Marianne.

The Original Crowd (Hardcover) May 02 2022 This is the original version of A Whole New Crowd. It has only gone through one round of edits so it is rough. I make no apology for this. The edited version was released as A Whole New Crowd. This is being published at readers' requests. They want to own the original version as well so here it is in all its gritty and monstrously long glory. There is lots of sex so the reader is forewarned.

Crafting The Personal Essay Oct 07 2022 Award winning essayist Scott Russell Sanders once compared the art of essay writing to "the pursuit of mental rabbits"—a rambling through thickets of thought in search of some brief glimmer of fuzzy truth. While some people persist in the belief that essays are stuffy and antiquated, the truth is that the personal essay is an ever-changing creative medium that provides an ideal vehicle for satisfying the human urge to document truths as we experience them and share them with others—to capture a bit of life on paper. Crafting the Personal Essay is designed to help you explore the flexibility and power of the personal essay in your own writing. This hands-on, creativity-expanding guide will help you infuse your nonfiction with honesty, personality, and energy. You'll discover: • An exploration of the basics of essay writing • Ways to step back and scrutinize your experiences in order to separate out what may be fresh, powerful, surprising or fascinating to a reader • How to move past private "journaling" and write for an audience • How to write eight different types of essays including memoir, travel, humor, and nature essays among others • Instruction for revision and strategies for getting published Brimming with helpful examples, exercises, and sample essays, this indispensable guide will help your personal essays transcend the merely private to become powerfully universal.

Heavy Brain Dec 05 2019 We know we need to eat better. We know we should be more active. And we know we should be living an all around healthier lifestyle. So why is it so hard to stick to your diet and exercise efforts when we want to lose weight and take back control of our health? Is there a better way to succeed in our health and fitness goals? 'Heavy Brain' is the new release from the MetFlex-Rx Diet creators Tommy Caldwell and Dr.Laura Caria, M.D., and inside the pages of their new book they address how the mind is the root of all fitness failure. This eye opening book teaches the reader how to address and correct foundational issues in the way we think about our health. A task that must be accomplished in order for your diet and exercise efforts to 'stick' and give you long term results. Caldwell and Caria argue that the automatic thought patterns we do not address when trying to lose weight are the true root of the unhealthy habits and behaviours (overeating, snacking, technological distractions, and laziness for example) that we can't seem to gain control over and the real cause of most repeated fitness failures and weight problems. The formula for success that the pair of authors teach inside 'Heavy Brain' is quickly changing the face (and success rate) of the weight loss industry. With insightful weight loss principles and simple step by step instructions for how to set yourself up for life-long success, Heavy Brain may just be the last 'diet' book you ever have to read.

Biodeconstruction Dec 17 2020 Analyzes Derrida's 1975 seminar "La vie la mort" as a deconstruction of biology with relevance to his work more broadly. In Biodeconstruction, Francesco Vitale demonstrates the key role that the question of life plays in Jacques Derrida's work. In the seminar La vie la mort (1975), Derrida engages closely with the life sciences, especially biology and evolution theory. Connecting this line of thought to his analysis of cybernetics in Of Grammatology, Vitale shows how Derrida develops a notion of biological life as itself a sort of text that is necessarily open onto further articulations and grafts. This sets the stage for the deconstruction of the traditional opposition between life and death, conceiving of death as an internal condition of the constitution of the living rather than being the opposite of life. It also provides the basis for the deconstruction of the rigidly deterministic concept of the genetic program, an insight that anticipates recent achievements of biological research in epigenetics and sexual reproduction. Finally, Vitale argues that this framework can enrich our understanding of Derrida's late work devoted to political issues, connecting his use of the autoimmunitarian lexicon to the theory of cellular suicide in biology. Francesco Vitale is Professor of Aesthetics at the University of Salerno, Italy. He is the author of The Last Fortress of Metaphysics: Jacques Derrida and the Deconstruction of Architecture, also published by SUNY Press, and the author and editor of several books in Italian on Derrida and contemporary French philosophy. Mauro Senatore is a British Academy Fellow at Durham University in the United Kingdom and Adjunct Professor of Contemporary French Philosophy at the Instituto de Humanidades, Universidad Diego Portales, Santiago, Chile. He is the author of Germs of Death: The Problem of Genesis in Jacques Derrida, also published by SUNY Press.

Advanced Thermodynamics Engineering, Second Edition Feb 16 2021 Advanced Thermodynamics Engineering, Second Edition is designed for readers who need to understand and apply the engineering physics of thermodynamic concepts. It employs a self-teaching format that reinforces presentation of critical concepts, mathematical relationships, and equations with concrete physical examples and explanations of applications—to help readers apply principles to their own real-world problems. Less Mathematical/Theoretical Derivations—More Focus on Practical Application Because both students and professionals must grasp theory almost immediately in this ever-changing electronic era, this book—now completely in decimal outline format—uses a phenomenological approach to problems, making advanced concepts easier to understand. After a decade teaching advanced thermodynamics, the authors infuse their own style and tailor content based on their observations as professional engineers, as well as feedback from their students. Condensing more esoteric material to focus on practical uses for this continuously evolving area of science, this book is filled with revised problems and extensive tables on thermodynamic properties and other useful information. The authors include an abundance of examples, figures, and illustrations to clarify presented ideas, and additional material and software tools are available for download. The result is a powerful, practical instructional tool that gives readers a strong conceptual foundation on which to build a solid, functional understanding of thermodynamics engineering.

Social Aspects of Early Christianity, Second Edition Sep 13 2020 Comments on the First Edition... Those concerned with Christian beginnings will find Malherbe stimulating and incisive on the New Testament. Robert M. Grant, Journal of Religion The author is a scholar of great learning. I found the footnotes to be extremely useful, and the challenge of the book that a new consensus has emerged is a genuine contribution to continuing debate. Robin Scroggs, Journal of the American Academy of Religion An interesting and informed introduction to an important new development in the study of earliest Christianity. - Victor P. Furnish, Perkins Journal The book constitutes a major challenge to the depictions of early Christianity - especially of the Pauline Wing in earlier scholarly work. - Howard Clark Kee, Reflection

The Routledge International Handbook on Hate Crime Nov 08 2022 This edited collection brings together many of the world's leading experts, both academic and practitioner, in a single volume handbook that examines key international issues in the field of hate crime. Collectively it examines a range of pertinent areas with the ultimate aim of providing a detailed picture of the hate crime 'problem' in different parts of the world. The book is divided into four parts: An examination, covering theories and concepts, of issues relating to definitions of hate crime, the individual and community impacts of hate crime, the controversies of hate crime legislation, and theoretical approaches to understanding offending. An exploration of the international geography of hate, in which each chapter examines a range of hate crime issues in different parts of the world, including the UK, wider Europe, North America, Australia and New Zealand. Reflections on a number of different perspectives across a range of key issues in hate crime, examining areas including particular issues affecting different victim groups, the increasingly important influence of the Internet, and hate crimes in sport. A discussion of a range of international efforts being utilised to combat hate and hate crime. Offering a strong international focus and comprehensive coverage of a wide range of hate crime issues, this book is an important contribution to hate crime studies and will be essential reading for academics, students and practitioners interested in this field.

The Theology of the Acts of the Apostles Jan 06 2020 Who are the people of God? Luke's purposes in the Acts of the Apostles are to identify the church, to establish the legitimacy of its gospel and to demonstrate that God was an active force in history. He wanted to show that the communities of Jewish and Gentile Christians are the true heirs of God's promises to Israel. He gives the history of the early church from the last decades of the first century as the communities become separated from their Jewish origins, and Paul plays the lead role. Acts offers an apologetic for the mixed mission of the church: to Jews and Gentiles. Luke was an eyewitness to some of what he

reports, but his authorship and views have been questioned. This is a theological interpretation of the history of the church within history: Luke is an artist, a narrator rather than a systematic theologian, but writes about the roles of God, Christ and the Holy Spirit, and of the church.
