Philip's Moon Map (Tube) May 23 2021 Philip's Moon Map is a completely new large-format map of the near side of the Moon. It has been specially drawn for Philip's by Dr John Murray, a research lecturer at the UK's Open University, who is an expert on the lunar surface. The map is not only a highly accurate and clear representation of the Moon but also a practical guide for lunar observers. More than 500 physical features - craters, seas, mountain ranges, peaks, valleys and rilles (elongated depressions) - are named and indexed, and the landing sites of unmanned and manned spacecraft are also marked. The observer can readily identify objects seen through binoculars or a telescope, or pick targets for a programme of observation. The chart includes a small map of the far side of the Moon (never visible from the Earth). Next to the map is a practical guide to lunar observing. This concise and informative text describes the various types of feature to observe, and is illustrated with drawings and photographs. Tips are given as to the best point in the lunar cycle to observe the most interesting of these features. Guidelines on drawing

or photographing the Moon are also included. Colour artworks explain the Moon's orbit, and why its phase (the proportion of the Moon that is visible from Earth) changes during the course of a month. Also explained, with the help of illustrations, are the path of the Moon during the course of the year and why lunar and solar eclipses occur. **The Map That Changed the World** Feb 17 2021 In 1793, a canal digger named William Smith made a startling discovery. He found that by tracing the placement of fossils, which he uncovered in his excavations, one could follow layers of rocks as they dipped and rose and fell—clear across England and, indeed, clear across the world—making it possible, for the first time ever, to draw a chart of the hidden underside of the earth. Smith spent twenty-two years piecing together the fragments of this unseen universe to create an epochal and remarkably beautiful hand-painted map. But instead of receiving accolades and honors, he ended up in debtors' prison, the victim of plagiarism, and virtually homeless for ten years more. *The Map That Changed the World* is a very human tale of endurance and achievement, of one man's dedication in the face of ruin. With a keen eye and thoughtful detail, Simon Winchester unfolds the poignant sacrifice behind this world-changing discovery.

The Return Of A. J. Raffles Jul 25 2021 This play produced by the Royal Shakespeare Company has as its chief characters A. J. Raffles, the literary creation some seventy odd years ago of E. W.
