Food systems for an urbanizing world Mar 21 2021 Food Systems for an Urbanizing World is a joint report prepared by the World Bank and FAO. It aims to stimulate discussion and suggest pathways to support local and national governments, and civil society and private sector actors in their efforts to improve the performance and capacity of food systems. The report describes the diversity and ever-changing nature of food systems, with interlinked traditional, modern and informal channels that respond to different market segments and different consumer preferences. It also underscores the importance of targeting support to the type of city and food system. The task is not an easy one. Data are weak and empirical analysis is weaker. As cities' engagement in urban food issues is relatively new, the institutions, governance mechanisms and capacities needed for effective design, implementation and delivery of this agenda must be strengthened. Finding effective ways to prioritize, mobilize and coordinate contributions from multiple sectors will be essential for achieving food system goals.

Platform Business Models Jan 31 2022 This book introduces platform firms as unique business models. Leveraging on the early literature on network economics and strategy frameworks, this book explores how platform business firms evolve in the modern business world. Taking a strategic perspective, this book engages the reader with core concepts, case studies, and frameworks for analyzing platform business firms. This book differentiates platform business firms from traditional pipeline firms; explores engagement with different actors, value creation, and operations of platforms; elucidates resources and capabilities of platform firms that provide them sustained competitive advantage; analyzes performance levers in operating platform business models, including complementarities with other business models; and discusses the sustainability of platform business models, in the face of regulatory and societal challenges, among others. The book is designed as a

primer for entrepreneurs setting up and operating platform business firms, senior managers in large corporations repurposing their resources to initiate network dynamics in their businesses, early career managers, and professionals engaging with myriad platform firms for their professional and personal needs. This book intends to provide a decision-maker with a portfolio of decisions to make to create, operate, sustain, and generate value out of a platform business firm. It is also useful for policy professionals to appreciate the economics and policy implications of regulating and governing platforms in a post-digital world.

Managing Risks in Commercial and Retail Banking Sep 14 2020 A practical guide to the practices and procedures of effectively managing banking risks *Managing Risks in Commercial and Retail Banking* takes an in-depth, logical look at dealing with all aspects of risk management within the banking sector. It presents complex processes in a simplified way by providing real-life situations and examples. The book examines all dimensions of the risks that banks face—both the financial risks—credit, market, and operational—and the non-financial risks—money laundering, information technology, business strategy, legal, and reputational. Focusing on methods and models for identifying, measuring, monitoring, and controlling risks, it provides practical advice backed up by solid theories, without resorting to the use of complicated mathematical and statistical formulas. Author Amalendu Ghosh exposes topics that are usually absent in books on managing banking risk—such as design of control framework, risk management architecture, credit risk rating, risk-based loan pricing, portfolio analysis, business continuity planning, and corporate governance. Author has extensive experience with a variety of major banks and institutions worldwide and brings a fresh perspective in the wake of the global finance crisis. Presents a novel approach using models of the credit risk rating of different types of borrowers, the methodology for assigning weights for deriving the rating, and the scoring process. Covers the essentials of corporate governance and options for credit risk assessment in line with the recommendations made in the New Basel Capital Accord. Explains the methodology of risk-based internal audit, including techniques to enable bank branches to switch over from the old transaction-based audit methods. With its logical sequence of the aspects of risk management, the book's layout is ideal for presentations, making it a handy tool for risk management training.

The Retail Revival Jun 11 2020 Traditional retail is becoming increasingly volatile and challenged as a business model. Brick-and-mortar has shifted to online, while online is shifting into pop-up storefronts. Virtual stores in subway platforms and airports are offering new levels of convenience for harried commuters. High Street and Main Street are becoming the stuff of nostalgia. The Big Box is losing ground to new models that attract consumers through their most-trusted assistant—the smartphone. What's next? What's the future for you—a retailer—who is witnessing a tsunami of change and not knowing if this means grasping ahold of new opportunity or being swept away? The Retail Revival answers these questions by looking into the not-so-distant retail past and by looking forward into a

future that will continue to redefine retail and its enormous effect on society and our economies. Massive demographic and economic shifts, as well as historic levels of technological and media disruption, are turning this once predictable industry—where “average” was king—into a sea of turbulent change, leaving consumer behavior permanently altered. Doug Stephens, internationally renowned consumer futurist, examines the key seismic shifts in the market that have even companies like Walmart and Procter & Gamble scrambling to cope, and explores the current and future trends that will completely change the way we shop. The Retail Revival provides no-nonsense clarity on the realities of a completely new retail marketplace—realities that are driving many industry executives to despair. But the future need not be dark. Stephens offers hope and guidance for any businesses eager to capitalize on these historic shifts and thrive. Entertaining and thought-provoking, The Retail Revival makes sense of a brave new era of consumer behavior in which everything we thought we knew about retail is being completely reimaged. Praise for The Retail Revival “It doesn’t matter what type of retail you do—if you sell something, somewhere, you need to read Doug Stephens’ The Retail Revival. Packed with powerful insights on the changing retail environment and what good retailers should be thinking about now, The Retail Revival is easy to read, well-organized and provides essential food for thought.” —Gregg Saretsky, President and CEO, WestJet “This book captures in sharp detail the deep and unprecedented changes driving new consumer behaviors and values. More importantly, it offers clear guidance to brands and retailers seeking to adapt and evolve to meet entirely new market imperatives for success.” —John Gerzema, Author of Spend Shift and The Athena Doctrine “The Retail Revival is a critical read for all marketing professionals who are trying to figure out what’s next in retail... Doug Stephens does a great job of explaining why retail has evolved the way it has, and the book serves as an important, trusted guide to where it’s headed next.” —Joe Lampertius SVP, Shopper Marketing, Momentum Worldwide and Owner, La Spezia Flavor Market “Doug Stephens has proven his right to the moniker ‘Retail Prophet.’ With careful analysis and ample examples, the author makes a compelling case for retailers to adapt, change and consequently revive their connection with consumers. Stephens presents actionable recommendations with optimism and enthusiasm—just the spoonful of sugar we need to face the necessary changes ahead.” —Kit Yarrow, Ph.D., Consumer Psychologist; Professor, Golden Gate University; Co-Author, Gen BuY: How Tweens, Teens and Twenty-Somethings are Revolutionizing Retail “Doug Stephens doesn’t just tell you why retail is in the doldrums, he tells you why retail is a major signpost for the larger troubles of our culture and provides a compelling, inspiring vision for a future of retail—and business, and society.” —Eric Garland, author of Future Inc.: How Businesses Can Anticipate and Profit from What’s Next

Retail Internationalization Sep 26 2021 The doctoral thesis investigates various strategies in the area of going and being international of retail firms which is of undisputable relevance due to the fairly narrow research status and the increasing internationalization of retail activities. Issues are investigated concerning the choice of retail market entry modes, i.e., the form of institutional arrangements that retailers use when entering foreign markets, the retail format transfer, i.e., the management of internal processes and the external marketing program elements and the coordination of retail activities, i.e., the implementation of the marketing program by the organizational structure. Regarding this, three important research questions are addressed:1) How do

choose retailers their market entry mode in the area of conflict between full and shared-controlled modes and how is this decision influenced by the internal and external environment? 2) How can international retailers transfer their retail format successfully to foreign countries by standardizing or adapting the internal and external elements of their retail format? 3) How can retailers successfully coordinate the implementation of their retail marketing program to culturally diversified markets? These questions are investigated on the basis of established theories applied from the international management literature such as institutional theory, the resource-based view and the profit maximization theory. On the basis of comprehensive primary and secondary datasets, important implications are drawn for research and practice.

Retailing in the 21st Century Nov 28 2021 With crisp and insightful contributions from 47 of the world's leading experts in various facets of retailing, *Retailing in the 21st Century* offers in one book a compendium of state-of-the-art, cutting-edge knowledge to guide successful retailing in the new millennium. In our competitive world, retailing is an exciting, complex and critical sector of business in most developed as well as emerging economies. Today, the retailing industry is being buffeted by a number of forces simultaneously, for example the growth of online retailing and the advent of 'radio frequency identification' (RFID) technology. Making sense of it all is not easy but of vital importance to retailing practitioners, analysts and policymakers.

Transnational Securities Regulation May 23 2021 The book provides an analysis of the emergence, evolution, and transformation of transnational securities regulation and of the influences from and the interactions between global regulatory powers in the field. Combining insights from law and political science, the work employs a two-tier complementary "on-the-books" and "in-action" approach. The more classical "on-the-books" approach draws on scholarship in United States and European Union securities regulation; transnational regulation and global administrative law; regime complexity; global governance studies; and the regulatory production of the International Organisation of Securities Commissions (IOSCO). The law in-action approach leverages the author's experience as Compliance senior professional in a multinational financial institution as well as research interviews with senior IOSCO staff. The author's findings enable the reader to develop an original understanding of IOSCO, its standards, and its unique place in the transnational regulatory arena. They also challenge the doxa that the US are the only driving regulatory power in the securities area when in fact, other regulatory powers are emerging - for the time being, the EU. The balance has shifted and regulatory compromises are achieved at different points in the rule making process.

The Market Makers Apr 09 2020 The huge expansion of new marketplaces and new retailers over the last fifty years has created a retail revolution. These large and globally sophisticated retailers have harnessed the new technologies in communications and logistics to build consumer markets around the world and to create suppliers, new types of manufacturers, that provide consumers with whatever goods they want to buy. These global retailers are at the hub of the new global economy. They are the new Market Makers, and they have changed the way the global economy works. Despite the fact that this retail revolution unfolded right before our eyes, this book is the first to describe the market-making capabilities of these retailers. In eleven chapters by leading scholars, *The Market Makers* provides a detailed and highly readable analysis of how retailers have become the leading drivers of the new global economy.

Successful Business Models in the Fashion Retail Industry. Strategic Audit of H&M compared to ZARA Nov 16 2020 Research Paper (undergraduate) from the year 2008 in the subject Business economics - Business Management, Corporate Governance, grade: 1,3, University of Applied Sciences Berlin, course: Strategic Management, language: English, abstract: In the increasingly competitive and changing fashion retail market the two European fashion retailers Hennes & Mauritz (H&M) and ZARA have explored the

market possibilities in different ways: Both companies have chosen unique and very opposite business models and growth strategies which had enabled them to expand quickly and successfully beyond its own borders. Whereas H&M focuses on outsourcing production, ZARA relies on controlling every step of the value chain. Whereas H&M follows an aggressive marketing and PR strategy, ZARA does virtually no advertising. But both companies known for their “fast fashion” dress fashionable people around the globe and compete for the title of the largest clothing retailer in Europe in a league of their own. Thus, two main questions arise: What makes both companies so successful and what are the fundamental differences and similarities in their business models? The following assignments starts with presenting the background and development of both companies and giving a short overview about the clothing retail industry. Chapter two explores the business models of H&M and ZARA in terms of the whole value chain. Based chapter two, the assignment ends with summarizing both business strategies to provide a reasonable answer to the key question: If you would have 100 euro to invest, in which company would you invest in: H&M or ZARA?

Antitrust in the Groceries Sector & Liability Issues in Relation to Corporate Social Responsibility Feb 17 2021 The book provides an analysis of the grocery retail market in a very large number of countries with an international report written by an economist. The second part of the book offers the analysis of liability issues in relation to non-compliance with CSRs with an international report by a British barrister. Both topics are very timely.

Globalization and Standards Feb 06 2020 The changes following more than two decades of economic reforms and globalization of the Indian economy – at state, corporate sector, and consumer level – raise interesting questions on the ways in which the stakeholders will continue to engage on the world stage, politically, socially and economically. One key feature of global trade over this period has been the growing importance of not only product standards but, importantly, labor, environmental, food safety and social standards. Being essentially a non-tariff barrier, standards have often become critical to market access and essential to sustained competitiveness. This has a clear impact on the manner in which both global and Indian business is conducted now and in the future. It also underlines the need for a new area of enquiry that addresses the following questions: How are the Indian public and private actors – the state, domestic firms, local consumers and society – influencing and being influenced by such standards? Do standards really matter in an overwhelmingly informal production sphere, with consumers deeply segmented on the basis of a highly skewed distribution of income and with the rural population becoming further marginalized? We have limited knowledge about the challenges faced and strategies pursued by these key domestic actors, both public and private. How have they been able to drive these processes and what are their implications for larger concerns with inequalities and the conditions of the poor? How does the omnipresent informality influence compliance, encourage multiple standards and affect the chances of addressing institutional dysfunctionality? What role does regulation play? These are some of the issues dealt with in the book, which has chapters focusing on aspects of specific sectors such as microfinance, pharmaceuticals, automobiles, tea trading, the role of the state and changing consumer influence. We have limited knowledge about the challenges faced and strategies pursued by these key domestic actors, both public and private. How have been they able to drive these processes and what are the consequences of these changes for the Indian economy, other emergent economies and for

the rest of the developing world? In particular, what are their implications for the wider Indian society, especially on concerns with informality, inequalities and the conditions of the poor? How does informality in its omnipresent form influence compliance, encourage multiple standards and chances of addressing institutional dysfunctionality? What role does regulation play? These are some of the issues dealt within the book wherein chapters focus on aspects of specific sectors, trading, role of the state and changing influence of the consumer.

The End of Online Shopping Jun 04 2022 Retail is going through difficult times and is suffering the consequences of both the economic crisis and the digitization of society. Fundamentally, there is a bigger problem: stores cannot keep up with the changing behavior of customers who are connected 24/7, customers for whom there is no distinction between online and offline. *The End of Online Shopping: The Future of New Retail in an Always Connected World* describes how the smart, the sharing, the circular, and the platform economy are shaping a new era of always connected retail. Retailers urgently need to innovate if they want to stay relevant in a world dominated by marketplaces and sharing platforms. The book contains inspiring examples from different industries -- which include the usual suspects such as Amazon, Alibaba, and Google, but also local startups -- and covers all aspects of the customer journey, from orientation and selection to delivery. *The End of Online Shopping* provides an excellent overview of shopping trends and developments worldwide, and offers readers indispensable insights into the future of retail.

Liberalisation of Natural Gas Markets Jan 19 2021 This book investigates the overall natural gas reform performance of Turkey, addressing both shortfalls and setbacks that have prevented Turkey from the fulfillment of the regulatory implementation since 2001, and how the prospectively liberalised natural gas market can effectively operate at all levels. Although eighteen years have passed since the introduction of the first legislation as a basis for a more liberalised Turkish natural gas market, the completion of the reform process still suffers from a lack of enforcement. The book offers recommendations to address this, the main one being that policy makers should give due consideration to the consolidation of EMRA's independent role with appropriate safeguards laid out to prevent attempts of regulatory misuse. The book concludes by suggesting that there is a compelling need to move forward with a consolidated reform sooner rather than later if Turkey genuinely wishes to take a leadership position in the race to become an efficient gas hub and be part of Europe's single energy market.

Wal-Mart Going Global Mar 01 2022 Seminar paper from the year 2010 in the subject Business economics - Operations Research, grade: 1,0, Anglia Ruskin University, course: International Business, language: English, abstract: With Wal-Mart being one of the biggest retailers in the world, serving customers in more than 8,650 retail units in 15 countries, as stated by the company (Wal-Mart, 2010), it makes the perfect example to look at in terms of globalisation and the impacts and strategies that relate to it. A very brief explanation by Holm and Sørensen (1995, p. 12) defines globalisation as “The intensification of economic, political, social and cultural relations across borders”. In my opinion this phrase is too superficial to actually explain all the outcomes and interrelations of the complexity of globalisation. It is also unknown regarding how to measure the degree on relations across the world and also their intensification as well as whether relationships exist between the economic, political, social and cultural relations. I believe that a definition should also be addressed about the technological and financial transformation that is currently taking place, the geographical reallocation of production and the emerging of a „powerless nation state“. Others see the phenomena of globalisation rather simple. Levitt (2006, p. 133) stated that “The world’s needs and desires have been irrevocably homogenised”, which leads one to believe that consumer tastes around the world appear to merge. While this is also referred to as the ‘simultaneous theory of internationalisation’, it means that standardised products, services and strategies can be used around the globe. Keeping in mind of Levitt’s thesis, this paper first gives a general overview of the impacts of globalisation on Wal-Mart as this is important to understand ongoing argumentation. Later, it will concentrate on Wal-Mart’s presence in Germany, explaining the market entry into the country while concurrently focusing on strategies used and outcomes of the company’s actions in Germany.

Individual Investors and Volatility Dec 18 2020 We show that retail trading activity has a positive effect on the volatility of stock returns. To identify this effect, we use a reform of the French stock market that triggers a drop in retail trading activity by raising the relative cost of speculative trading for retail investors. The daily return volatility of the stocks affected by the reform falls by twenty basis points (a quarter of the sample standard deviation of the return volatility) relative to other stocks. For affected stocks, we also find a significant decrease in the magnitude of return reversals and the price impact of trades. We argue that these findings are consistent with the view that some retail investors behave as noise traders.

Handbook of Research on Retailing Jul 25 2021 The advent of e-commerce and the rise of hard discounters have put severe pressure on traditional retail chains. Boundaries are blurring: traditional brick & mortar players are expanding their online operations and/or setting up their own discount banners, while the power houses of online retail are going physical, and hard discounters get caught up in the Wheel of Retailing. Even successful companies cannot sit back and rest, but need to prepare for the next wave of change. In the face of this complexity, it is all the more important to take stock of current knowledge, based on insights and experience from leading scholars in the field. What do we know from extant studies, and what are the ensuing best practices? What evolutions are ahead, and will current recipes still work in the future? This Handbook sheds light on these issues.
