Mac OS X Snow Leopard: The Missing Manual Sep 13 2020 For a company that promised to "put a pause on new features," Apple sure has been busy-there's barely a feature left untouched in Mac OS X 10.6 "Snow Leopard." There's more speed, more polish, more refinement-but still no manual. Fortunately, David Pogue is back, with the humor and expertise that have made this the #1 bestselling Mac book for eight years straight. You get all the answers with jargon-free introductions to: Big-ticket changes. A 64-bit overhaul. Faster everything. A rewritten Finder. Microsoft Exchange compatibility. All-new QuickTime Player. If Apple wrote it, this book covers it. Snow Leopard Spots. This book demystifies the hundreds of smaller enhancements, too, in all 50 programs that come with the Mac: Safari, Mail, iChat, Preview, Time Machine. Shortcuts. This must be the tippiest, trickiest Mac book ever written. Undocumented surprises await on every page. Power usage. Security, networking, build-your-own Services, file sharing with Windows, even Mac OS X's Unix chassis-this one witty, expert guide makes it all crystal clear.

The Rust Programming Language (Covers Rust 2018) May 10 2020 The official book on the Rust programming language, written by the Rust development team at the Mozilla Foundation, fully updated for Rust 2018. The Rust Programming Language is the official book on Rust: an open source systems programming language that helps you write faster, more reliable software. Rust offers control over low-level details (such as memory usage) in combination with high-level ergonomics, eliminating the hassle traditionally associated with low-level languages. The authors of The Rust Programming Language, members of the Rust Core Team, share their knowledge and experience to show you how to take full advantage of Rust's features--from installation to creating robust and scalable programs. You'll begin with basics like creating functions, choosing data types, and binding variables and then move on to more advanced concepts, such as: Ownership and borrowing, lifetimes, and traits Using Rust's memory safety guarantees to build fast, safe programs Testing, error handling, and effective refactoring Generics, smart pointers, multithreading, trait objects, and advanced pattern matching Using Cargo, Rust's built-in package manager, to build, test, and document your code and manage dependencies How best to use Rust's advanced compiler with compiler-led programming techniques You'll find plenty of code examples throughout the book, as well as three chapters dedicated to building complete projects to test your learning: a number guessing game, a Rust implementation of a command line tool, and a multithreaded server. New to this edition: An extended section on Rust macros, an expanded chapter on modules, and appendixes on Rust development tools and editions.

Mindstorms Oct 27 2021 In this revolutionary book, a renowned computer scientist explains the importance of teaching children the basics of computing and how it can prepare them to succeed in the ever-evolving tech world. Computers have completely changed the way we teach children. We have Mindstorms to thank for that. In this book, pioneering computer scientist Seymour Papert uses the invention of LOGO, the first child-friendly programming language, to make the case for the value of teaching children with computers. Papert argues that children are more than capable of mastering computers, and that teaching computational processes like de-bugging in the classroom can change the way we learn everything else. He also shows that schools saturated with technology can actually improve socialization and interaction among students and between students and teachers. Technology changes every day, but the basic ways that computers can help us learn remain. For thousands of teachers and parents who have sought creative ways to help children learn with computers, Mindstorms is their bible.

The Day Trader Oct 03 2019 The S&P futures pit is the ultimate arena for traders. It is a place where trading titans make split-second decisions on huge amounts of money, and fortunes appear and vanish with the blink of an eye. Successful day traders are brilliant, aggressive-and lucky. Lewis J. Borsellino is all three. And now he is telling his story. The nation's top S&P futures trader, Borsellino takes you inside the world of the day trader. Chronicling Borsellino's incredible run on the floor of the Chicago Mercantile Exchange, *The Day Trader* offers a rare behind-the-scenes look at his everyday strategies and tactics. Raised to be a fierce and fearless competitor, Borsellino felt at home the first day he walked into the chaos and excitement of the Merc. In *The Day Trader*, he offers both a compelling story as well as an inside look at day trading and the S&P market. Borsellino outlines exactly what contributed to his unparalleled success-a rare blend of discipline, drive, intelligence, and an uncanny ability to read and interpret the market. *The Day Trader* is also a candid memoir of a second generation Italian American who learned tough life lessons from his father. The senior statesman of the S&P pit, Borsellino offers vivid firsthand accounts of the unique dynamics of the trading floor, the fortunes won and lost in the crash of 1987, the FBI investigation that rocked the futures trading industry, and the tense political battles between Merc titans Leo Melamed and Jack Sandner. He also shares war stories from the floor, many involving top traders such as Richard Dennis and George Soros. Finally, Borsellino chronicles the latest phase of his career, as he moves beyond the beloved trading pit to the challenges and opportunities of the electronic trading arena. More than the success story of one the nation's most respected traders, *The Day Trader* offers practical insights into the futures markets, pit trading, market psychology, fundamental and technical analysis, and risk. It is a rare opportunity to see inside the mind of one of today's most brilliant traders. LEWIS J. BORSELLINO is the top S&P futures trader in the United States with a career that has spanned an unprecedented 18 years. His long-term success puts him into the trading pantheon that features such luminaries as Paul Tudor Jones, Victor Niederhoffer, and bond trader Tom Baldwin. Borsellino is a frequent contributing commentator on CNN and CNBC where he is regarded as the "biggest and best trader" in S&Ps. PATRICIA CRISAFULLI COMMINS is a freelance business writer and former correspondent for Reuters America Inc. She has also written for *The Christian Science Monitor* and the *Wall Street Journal*.
