Heroic Wives Rituals, Stories and the Virtues of Jain Wifehood Oct 27 2022 Although in Hinduism it is mainly used to refer to widow immolation, the term 'sati' means 'true woman' - a female hero. Whitney Kelting has learned that in Jainism satis appear as subjects of devotional hymns. This seems paradoxical, given that Jain spirituality is to disengage oneself from worldly existence and Jain devotionalism is usually directed toward those souls who have reached perfect detachment. In fact, however, there is a vast corpus of popular texts, many of them written by prominent scholar-monks between the 16th and 18th centuries, illustrating the distinctly worldly virtues of devoted Jain wives. In this fieldwork-based study, Kelting explores the ways in which Jain women use sati narratives and rituals to understand wifehood as a choice, which these women's ongoing ritual practices continually shape. She focuses on eight well-known Jain sati narratives, recorded in both formal ritual contexts and in informal retellings, and also as read aloud from printed versions. She finds that one of the principal functions of Jain sati narratives is to contribute to a discourse of wifehood, which addresses the concerns of Jain laywomen within the Jain value system and provides a fertile context in which Jain women can explore their questions of virtue and piety.

Insistent Life Jun 30 2020 "Insistent Life is the first full-length interdisciplinary treatment of the foundational principles and principles of application for engaging contemporary bioethics within the Jain tradition. The book fills a significant gap in both the fields of bioethics and Jain studies since Jainism, perhaps more so than any other South Asian tradition, is strongly focused on the ethics of birth, life, and death, with regard to humans as well as other living beings. Brianne Donaldson and Ana Bajželj analyze a diverse range of Jain texts and contemporary sources on Jain doctrines and practices, alongside bioethics, to identify Jain perspectives on bioethical issues while highlighting the complexity of their personal, professional, and public dimensions. The book also features extensive original data--represented in visual graphs--based on an international survey the authors conducted with Jain medical professionals in India and diaspora communities of North America, Europe, and Africa"--

Advanced Biometrics Jan 18 2022 This book describes a range of new biometric technologies, such as high-resolution fingerprint, finger-knuckle-print, multi-spectral backhand, 3D fingerprint, tongueprint, 3D ear, and multi-spectral iris technologies. Further, it introduces readers to efficient feature extraction, matching and fusion algorithms, in addition to developing potential systems of its own. These advanced biometric technologies and methods are divided as follows: 1. High-Resolution Fingerprint Recognition; 2. Finger-Knuckle-Print Verification; 3. Other Hand-Based Biometrics; and 4. New Head-Based Biometrics. Traditional biometric technologies, such as fingerprint, face, iris, and palmprint, have been extensively studied and addressed in many research books. However, all of these technologies have their own advantages and disadvantages, and there is no single type of biometric technology that can be used for all applications. Many new biometric technologies have been developed in recent years, especially in response to new applications. The contributions gathered here focus on how to develop a new biometric technology based on the requirements of essential applications, and how to design efficient algorithms that yield better performance.

What's the Use of Art? Jun 11 2021 Post-Enlightenment notions of culture, which have been naturalized in the West for centuries, require that art be autonomously beautiful, universal, and devoid of any practical purpose. The authors of this multidisciplinary volume seek to complicate this understanding of art by examining art objects from across Asia with attention to their functional, ritual, and everyday contexts. From tea bowls used in the Japanese tea ceremony to television broadcasts of Javanese puppet theater; from Indian wedding chamber paintings to art looted by the British army from the Chinese emperor's palace; from the adventures of a Balinese magical dagger to the political functions of classical Khmer images--the authors challenge prevailing notions of artistic value by introducing new ways of thinking about culture. The chapters consider art objects as they are involved in the world: how they operate and are experienced in specific sites, collections, rituals, performances, political and religious events and imagination, and in individual peoples' lives; how they move from one context to another and change meaning and value in the process (for example, when they are collected, traded, and looted or when their images appear in art history textbooks); how their memories and pasts are or are not part of their meaning and experience. Rather than lead to a single universalizing definition

of art, the essays offer multiple, divergent, and case-specific answers to the question "What is the use of art?" and argue for the need to study art as it is used and experienced. Contributors: Cynthea J. Bogel, Louise Cort, Richard H. Davis, Robert DeCaroli, James L. Hevia, Janet Hoskins, Kaja McGowan, Jan Mrázek, Lene Pedersen, Morgan Pitelka, Ashley Thompson.

Medieval Indian Armies (1) Dec 17 2021 This fully illustrated study explores the armies of the Hindu, Buddhist and Jain states within what are now India, Pakistan, Bangladesh, Sri Lanka and Nepal during the period AD 500-1500, as well as Afghanistan until the early 13th century AD. Following the emergence of a distinct

'medieval Indian' civilization in the Late Classical and Early Medieval periods, there was a prolonged struggle between this civilization and that of the eastern Islamic world, concluding with the rise of the Mughal Empire at the start of the 16th century. In this fully illustrated study, David Nicolle investigates the traditions and enduring conservatism of non-Islamic medieval Indian warfare, notably evident in recruitment patterns and the significance of archery and cavalry. The role and impact of war-elephants, both positive and negative, are also considered, as well as the influence of climate and weather (notably the seasonal monsoon) on warfare in this region. As well as assessing arms and armour – contrasting the advanced technology and high status of Indian weapons (especially swords) with the remarkable lack of metallic armour in the region during this period – the author also explores siege warfare and riverine and naval warfare in South Asia. This book assesses the contributing factors identified by those who have sought to explain why the huge wealth and substantial populations of the traditional non-Islamic Indian states did not prevent their persistent failure in the face of Islamic invasion and conquest.

The Philosophy of Welfare Economics of Dr.Amartya Sen and Jain Philosophy Sep 02 2020 The subject of discussion in this book is the philosophy of welfare Economics. The collective choice and the subjects of freedom through development are discussed in welfare economics. Inequality is to be reduced and basal equality has to be evolved to aid human welfare. The entitlement approach is the only solution for poverty and famine. All four subjects are woven in philosophical thought by Dr.Amartya Sen for the wellbeing of people. The book is a humble attempt at dealing with the subject of human welfare through religion. Killing is rampant in one or another form. The mantra of non-violence is the most valuable message to the world. The concept of non-killing is brought to light with the ancient agamic text of ACHARANG SUTRA. The view of Mahatma Gandhi on Ahimsa (non-violence) is compared with the Jain religious principle in modern context. It is important to be tolerant and to be able to understand others view points in the present situation. This is possible through Anantvada of Jain religion. The non-possessiveness of materialistic items and wealth are important issues discussed in the book. The Karma (deeds) are an important factor in ones life. Karma is solely responsible for the uplift or downfall of the human soul. Jain religion works for the wellbeing of the human soul.

Tantra in Practice Jul 12 2021 As David White explains in the Introduction to *Tantra in Practice*, Tantra is an Asian body of beliefs and practices that seeks to channel the divine energy that grounds the universe, in creative and liberating ways. The subsequent chapters reflect the wide geographical and temporal scope of Tantra by examining thirty-six texts from China, India, Japan, Nepal, and Tibet, ranging from the seventh century to the present day, and representing the full range of Tantric experience--Buddhist, Hindu, Jain, and even Islamic. Each text has been chosen and translated, often for the first time, by an international expert in the field who also provides detailed background material. Students of Asian religions and general readers alike will find the book rich and informative. The book includes plays, transcribed interviews, poetry, parodies, inscriptions, instructional texts, scriptures, philosophical conjectures, dreams, and astronomical speculations, each text illustrating one of the diverse traditions and practices of Tantra. Thus, the nineteenth-century Indian Buddhist Garland of Gems, a series of songs, warns against the illusion of appearance by referring to bees, yogurt, and the fire of Malaya Mountain; while fourteenth-century Chinese Buddhist manuscripts detail how to prosper through the Seven Stars of the Northern Dipper by burning incense, making offerings to scriptures, and chanting incantations. In a transcribed conversation, a modern Hindu priest in Bengal candidly explains how he serves the black Goddess Kali and feeds temple skulls lentils, wine, or rice; a seventeenth-century Nepalese Hindu praise-poem hammered into the golden doors to the temple of the Goddess Taleju lists a king's faults and begs her forgiveness and grace. An introduction accompanies each text, identifying its period and genre, discussing the history and influence of the work, and identifying points of particular interest or difficulty. The first book to bring together texts from the entire range of Tantric phenomena, *Tantra in Practice* continues the Princeton Readings in Religions series. The breadth of work included, geographic areas spanned, and expert scholarship highlighting each piece serve to expand our understanding of what it means to practice Tantra.

Shared Characters in Jain, Buddhist and Hindu Narrative Jun 23 2022 Taking a comparative approach which considers characters that are shared across the narrative traditions of early Indian religions (Brahmanical Hinduism, Jainism and Buddhism) Shared Characters in Jain, Buddhist and Hindu Narrative explores key religious and social ideals, as well as points of contact, dialogue and contention between different worldviews. The book focuses on three types of character - gods, heroes and kings - that are of particular importance to early South Asian narrative traditions because of their relevance to the concerns of the day, such as the role of deities, the qualities of a true hero or good ruler and the tension between worldly responsibilities and the pursuit of liberation. Characters (including character roles and lineages of characters) that are shared between traditions reveal both a common narrative heritage and important differences in worldview and ideology that are developed in interaction with other worldviews and ideologies of the day. As such, this study sheds light on an important period of Indian religious history, and will be essential reading for scholars and postgraduate students working on early South Asian religious or narrative traditions (Jain, Buddhist and Hindu) as well as being of interest more widely in the fields of Religious Studies, Classical Indology, Asian Studies and Literary Studies.

Interrogating Women's Leadership and Empowerment Oct 15 2021 Looking at gender through multiple lenses, this volume seeks to understand what empowerment really means to women today. It examines the situation of women in, and their contribution to, politics, business, education, social and economic development, the women's movement, health, law, insurgency and the arts. The volume analyses certain key issues of contemporary discourse including: • ownership of one's body and freedom of choice • redefinition of empowerment and leadership and how far we have achieved it • importance of equal access to education, employment and health • political participation and decision making, and • dichotomy between marginalisation of women on grounds of caste, class and religion in a society with changing laws on women's rights

Complete Awareness Apr 09 2021 The ultimate aim of any sentient being is to realize its own nature. The way to realizing one's own nature is through total perception. Humans have the innate ability to be able to perceive completely. Yet, hardly one in a few millions is ever able to do that. What stops a human being from perceiving completely? How can anyone achieve the highest state possible so that one can become one with the whole existence? The author is a true teacher, the SatGuru (or SadGuru) who teaches what not to do. Yes, the way to the Truth is not by trying to search for truth but by dropping everything false. In the same way, the way to total perception is through dropping every habit that hinders one from perceiving completely. You cannot perceive intentionally. It is not in your power. You can only stop perceiving. You can shut your eyes and stop seeing. You can shut your ears and stop hearing. You can block your nose and stop smelling. You have the power to stop perceiving, but not to start perceiving. Once you have your eyes, nose, ears or sense organs unblocked, you perceive. Sensory perceiving is basic to all organisms. There is nothing great about being humans as far as power of perceiving is concerned because every creature has power to perceive. Some can only sense through touch and some can sense touch and smell but any creature however small and insignificant it might seem, have at least one form of sensing its surroundings. Perceiving is the basis of life. In absence of ability to perceive, there is no life. Being human means something extraordinary. It means to be able to perceive beyond any other form of life around us. It means to be able to perceive totally, completely. But we rarely do so. We can hardly do so. Not only it is not in our power to be able to perceive totally, we are so much occupied in our busy lives, that we are hardly aware of our surroundings or our lives. The only way to be able to perceive totally and therefore experience this universe in a way unimaginable in our present way of living, is to drop all those things that block our senses. Only when we unblock our channels, the perception can happen so completely that we will never ever go back to the dark dungeons of ignorance and unawareness. This book lists out all those blockages that prevent total perception.

The Lives of the Jain Elders Oct 03 2020 *The Lives of the Jain Elders* by the twelfth-century Jain scholar-monk, Hemacandra, is the key synthesis of source material for the early history of Jainism. Hemacandra's epic relates the pupillary succession of the early monastic Jain community, their influence, and the legendary spread of their influence, and the asceticism of the Elders, performed in the hope of liberation from a cycle of death and rebirth. Abounding in memorable characters, and providing a rich compendium of Indian folk-tale, *The Lives of the Jain Elders* offers fascinating insight into the social life of medieval India. This new translation makes the complete work available for the first time in a European language and substantial editorial apparatus illuminates Jain belief and history.

South Asian Religions Aug 21 2019 *The religious landscape of South Asia is complex and fascinating. While existing literature tends to focus on the majority religions of Hinduism and Buddhism, much less attention is given to Jainism, Sikhism, Islam or Christianity. While not neglecting the majority traditions, this valuable resource also explores the important role which the minority traditions play in the religious life of the subcontinent, covering popular as well as elite expressions of religious faith. By examining the realities of religious life, and the ways in which the traditions are practised on the ground, this book provides an illuminating introduction to religion in South Asia.*

My Illusion My Mistake Sep 26 2022 Couples around the globe marry when in love. But in some parts of the world, and especially in India, the term 'Marriage' is quite confusing.
