*Story of Life Aug 02 2022 At first, nothing lived on Earth. It was a noisy, hot, scary place. Choking gas exploded from volcanoes and oceans of lava bubbled around the globe... Then in the deep, dark ocean, something amazing happened. This is an exciting and dramatic story about how life began and developed on Planet Earth, written especially for younger children. The authors explain how the first living cell was created, and how the cells multiply and create jellyfish and worms, and then fish with bendy necks, which drag themselves out of the water into swampy forests. They tell the story of the biggest creatures that have ever walked on land - the dinosaurs. Long after that, hairy creatures who have babies, not eggs, take over, stand on two legs and spread around the world, some of them living through cataclysmic events such as ice ages and volcanic eruptions. Everyone living today is related to these survivors. With delightful illustrations including lots of detail and humour, all carefully researched and checked, this book shows the development of life on Earth in a truly accessible and simple way. *Encyclopedia of Quality of Life and Well-Being Research Aug 29 2019 The aim of this encyclopedia is to provide a comprehensive reference work on scientific and other scholarly research on the quality of life, including health-related quality of life research or also called patient-reported outcomes research. Since the 1960s two overlapping but fairly distinct research communities and traditions have developed concerning ideas about the quality of life, individually and collectively, one with a fairly narrow focus on health-related issues and one with a quite broad focus. In many ways, the central issues of these fields have roots extending to the observations and speculations of ancient philosophers, creating a continuous exploration by diverse explorers in diverse historic and cultural circumstances over several centuries of the qualities of human existence. What we have not had so far is a single, multidimensional reference work connecting the most salient and important contributions to the relevant fields. Entries are organized alphabetically and cover basic concepts, relatively well established facts, lawlike and causal relations, theories, methods, standardized tests, biographic entries on significant figures, organizational profiles, indicators and indexes of qualities of individuals and of communities of diverse sizes, including rural areas, towns, cities, counties, provinces, states, regions, countries and groups of countries.*

*The Meaning of Life and Death Jul 01 2022 What is the point of living? If we are all going to die anyway, if nothing will remain of whatever we achieve in this life, why should we bother trying to achieve anything in the first place? Can we be mortal and still live a meaningful life? Questions such as these have been asked for a long time, but nobody has found a conclusive answer yet. The connection between death and meaning, however, has taken centre stage in the philosophical and literary work of some of the world's greatest writers: Fyodor Dostoyevsky, Leo Tolstoy, Soren Kierkegaard, Arthur Schopenhauer, Herman Melville, Friedrich Nietzsche, William James, Ludwig Wittgenstein, Marcel Proust, and Albert Camus. This book explores their ideas, weaving a rich tapestry of concepts, voices and images, helping the reader to understand the concerns at the heart of those writers' work and uncovering common themes and stark contrasts in their understanding of what kind of world we live in and what really matters in life.*

*The Death and Life of Great American Cities Apr 05 2020 Published to coincide with the 50th anniversary of its initial publication, this special edition of Jane Jacobs's masterpiece, The Death and Life of Great American Cities, features a new Introduction by Jason Epstein, the book's original editor, who provides an intimate perspective on Jacobs herself and unique insights into the creation and lasting influence of this classic. The Death and Life of Great American Cities was described by The New York Times as "perhaps the most influential single work in the history of town planning. . . . [It] can also be seen in a much larger context. It is first of all a work of literature; the descriptions of street life as a kind of ballet and the biting satiric account of traditional planning theory can still be read for pleasure even by those who long ago absorbed and appropriated the book's arguments." Jane Jacobs, an editor and writer on architecture in New York City in the early sixties, argued that urban diversity and vitality were being destroyed by powerful architects and city planners. Rigorous, sane, and delightfully epigrammatic, Jane Jacobs's tour de force is a blueprint for the humanistic management of cities. It remains sensible, knowledgeable, readable, and indispensable.*

*Light on Life Jul 21 2021* A must-have for anyone who practises yoga or is interested in the teachings of the East. B.K.S. Iyengar, whose teachings on yoga are followed throughout the world, reflects upon his lifetime's experience on the yoga path. The structure of the book follows the different aspects of that path (from *Freedom Awaits*, through *The Physical Body*, *The Energy Body*, *The Mental Body*, *The Intellectual Body*, *The Divine Body* to *Living in Freedom*) and provides a learning framework for yoga as well as an invaluable discourse on life. 'Iyengar knows what the body needs, and he's introduced to the West the Easterner's best path to health and well-being' - *TIME Magazine* 'Revelations from a lifetime of studying yoga' - *The Washington Post* 'Light on Life is rich in yoga philosophy and methodology. *Matters of Life and Death Aug 10 2020* Orentlicher uses controversial life-and-death issues as case studies for evaluating three models for translating principle into practice. Physician-assisted suicide illustrates the application of "generally valid rules," a model that provides predictability and simplicity and, more importantly, avoids the personal biases that influence case-by-case judgments. The author then takes up the debate over forcing pregnant women to accept treatments to save their fetuses. He uses this issue to weigh the "avoidance of perverse incentives," an approach to translation that follows principles hesitantly for fear of generating unintended results. And third, Orentlicher

considers the denial of life-sustaining treatment on grounds of medical futility in his evaluation of the "tragic choices" model, which hides difficult life-and-death choices in order to prevent paralyzing social conflict.

*The Math of Life and Death* Jan 27 2022 "Few of us really appreciate the full power of math--the extent to which its influence is not only in every office and every home, but also in every courtroom and hospital ward. In this ... book, Kit Yates explores the true stories of life-changing events in which the application--or misapplication--of mathematics has played a critical role: patients crippled by faulty genes and entrepreneurs bankrupted by faulty algorithms; innocent victims of miscarriages of justice; and the unwitting victims of software glitches"--Publisher marketing.

*The Little Book of Life and Death* Sep 03 2022 In this book the author of *On Having No Head* investigates the most poignant problem our life poses - what lies at the end of it. He asks us to check four things. First, that to discover whether we are perishable, we must first discover what we are. Second, that outsiders are in no position to tell us this: they can only tell us what we look like at a distance. Third, that what we are is obvious as soon as we dare to look. And fourth, that we turn out to be in all respects the opposite of what we had been told. This revolutionary conclusion is arrived at by doing the nine "tests for Immortality" that form the backbone of the book. Then, our identity and immortality having been firmly established, we apply this knowledge to the fact of ageing and of dying itself, thus realizing their infinite potential for joy. Finally, the book explores in detail the true resurrection life - life lived in a Heaven which is none other than this earthly scene perceived as it is. 'The "open secret" is no longer secret. Douglas Harding's *Little Book of Life and Death* makes the insights of the sages accessible to all. Courageous, personal and inspiring, this book asks the most difficult questions about life and death, and to our - and apparently even the author's - amazement, answers them. Like Harding's classic book *On Having No Head*, this work is written in a down-home, heartfelt style. Read this book. Do the "experiments" which are Harding's unique and powerful contribution to what might be called the technology of enlightenment. Get ready to die, and to live anew.' Rober W. Fuller. Former president, Oberlin College. 'The literature on dying will never be the same again.' Ram Dass

*Icons of Life May 07 2020 Icons of Life tells the engrossing and provocative story of an early twentieth-century undertaking, the Carnegie Institution of Washington's project to collect thousands of embryos for scientific study. Lynn M. Morgan blends social analysis, sleuthing, and humor to trace the history of specimen collecting. In the process, she illuminates how a hundred-year-old scientific endeavor continues to be felt in today's fraught arena of maternal and fetal politics. Until the embryo collecting project-which she follows from the Johns Hopkins anatomy department, through Baltimore founding homes, and all the way to China-most people had no idea what human embryos looked like. But by the 1950s, modern citizens saw in embryos an image of "ourselves unborn," and embryology had developed a biologically based story about how we came to be. Morgan explains how dead specimens paradoxically became icons of life, how embryos were generated as social artifacts separate from pregnant women, and how a fetus thwarted Gertrude Stein's medical career. By resurrecting a nearly forgotten scientific project, Morgan sheds light on the roots of a modern origin story and raises the still controversial issue of how we decide what embryos mean.*

*A More Exciting Life Mar 29 2022 One of the things we all deeply crave, and all richly deserve, is a more exciting life. We know well enough that many things have to be routine, hard and a little bit boring. But we also rightly sense that, if only we can find a way, our lives could be rendered intermittently more joyful, intense, thrilling and beautiful. This is a guide to the more exciting life we know could be ours. It isn't about the outward things we might do: travel, parachute out of airplanes or learn a foreign language. This is a book of psychology and about how we can nurture a sense of inner liberation, accept our desires and aspirations and then have the courage to set ourselves free. Perhaps for too long we have resigned ourselves to things that aren't fair or necessary, we have felt too constricted (and perhaps unloved) to communicate well with others and the proper expansion of our characters has been sacrificed for the sake of compliance. Now is a chance to recover some of our spirit, and to become open to the full intensity, beauty and mystery of life and to the richness of our own possibilities. Here is a guide to that more exciting life we know should - and can - be ours.*

*Sanctity of Life and Human Dignity Jan 15 2021 'Sanctity of life' and 'human dignity' are two bioethical concepts that play an important role in bioethical discussions. Despite their separate history and content, they have similar functions in these discussions. In many cases they are used to bring a difficult or controversial debate to an end. They serve as unquestionable cornerstones of morality, as rocks able to weather the storms of moral pluralism. This book provides the reader with analyses of these two concepts from different philosophical, professional and cultural points of view. Sanctity of Life and Human Dignity presents a comparative analysis of both concepts.*

*The Little Book of Life Hacks Dec 26 2021 Clever little ways to improve your daily life!*

*The Art of Life Nov 24 2021 In our individualized society we are all artists of life – whether we know it or not, will it or not and like it or not, by decree of society if not by our own choice. In this society we are all expected, rightly or wrongly, to give our lives purpose and form by using our own skills and resources, even if we lack the tools and materials with which artists' studios need to be equipped for the artist's work to be conceived and executed. And we are praised or censured for the results – for what we have managed or failed to accomplish and for what we have achieved and lost. In our liquid modern society we are also taught to believe that the purpose of the art of life should be and can be happiness – though it's not clear what happiness is, the images of a happy state keep changing and the state of happiness remains most of the time something yet-to-be-reached. This new book by Zygmunt Bauman – one of the most original and influential social thinkers writing today – is not a book of designs for the art of life nor a 'how to' book: the construction of a design for life and the way it is pursued is and cannot but be an individual responsibility and individual accomplishment. It is instead a brilliant account of conditions under which our designs-for-life are chosen, of the constraints that might be imposed on their choice and of the interplay of design, accident and character that shape their implementation. Last but not least, it is a study of the ways in which our society – the liquid modern, individualized society of consumers – influences (but does not determine) the way we construct and narrate our life trajectories.*
