Sorcery for Beginners May 30 2020 Five-hundred years ago, sorcery began to fade from the world. As technology prevailed, combustion engines and computers replaced enchanted plows and spell books. Real magicians were

hunted almost to extinction. Science became the primary system of belief, and the secrets of spell-casting were forgotten. That is ... until now. Sorcery for Beginners is no fantasy or fairy tale. Written by arcane arts preservationist and elite mage Euphemia Whitmore (along with her ordinary civilian aide Matt Harry), this book is a how-to manual for returning magic to an uninspired world. It's also the story of Owen Macready, a seemingly average 13-year-old who finds himself drawn into a centuries-long war when he uses sorcery to take on a school bully. Owen's spell casting attracts the attention of a ruthless millionaire and a secret society of anti-magic mercenaries, all of whom wish to use Sorcery for Beginners to alter the course of world history forever.

Sailing: A Beginner's Guide Apr 21 2022 Sailing: A Beginner's Guide takes the reader

step-by-step from his or her first sail to an almost intuitive mastery of small boat handling. the delightful drawings combined with the author's appealing writing style successfully explain topics in manageable double page spreads. The book unravels the mysteries of reading the wind, guides the reader through his or her first tenuous steps aboard, and then beyond to navigation, safety, seamanship and even trailering, conveying the magic as well as the nuts and bolts of sailing. It is a gentle introduction for those who are just starting out, and will provide many evocative images for those who already sail. It's all here, more successfully captured than ever before in one book. Inspirational for novice and old hand alike. 'A learn-to-sail book with heart' - WoodenBoat 'A real winner...a masterful blend of straightforward text with delightful and instructive illustrations' - Cruising World 'Teaches sailing with flair and poetry' - SAIL Carpentry for Beginners Nov 04 2020 REPRINT. pp.200. B & W illustrations. This book is intended for the home craftsman who wants to make all sorts of things in wood from a table lamp to a rabbit hutch. To the tradesman carpentry refers to the constructional woodwork of a house-the roof, flooring, and so on. To the man in the street, however, it generally means the making of almost every thing in wood; hence the general character of the designs we give. We give a range of comparatively simple designs for objects to make which we know from experience to be in

everyday demand; small general items, pieces of furniture, and garden woodwork. These are followed by instructions on the use of tools, and the everyday processes involved in woodwork-making doors, hinging, fitting locks, and cutting joints.

Zen Mind, Beginner's Mind Jun 23 2022 "In the beginner's mind there are many possibilities, but in the expert's there are few." So begins this most beloved of all American Zen books. Seldom has such a small handful of words provided a teaching as rich as has this famous opening line of Shunryu Suzuki's classic. In a single stroke, the simple sentence cuts through the pervasive tendency students have of getting so close to Zen as to completely miss what it's all about. An instant teaching on

the first page. And that's just the beginning. In the thirty years since its original publication, Zen Mind, Beginner's Mind has become one of the great modern Zen classics, much beloved, much re-read, and much recommended as the best first book to read on Zen. Suzuki Roshi presents the basics—from the details of posture and breathing in zazen to the perception of nonduality—in a way that is not only remarkably clear, but that also resonates with the joy of insight from the first to the last page. It's a book to come back to time and time again as an inspiration to practice.

[A Beginner's Guide to Mathematical Logic](#) Nov 16 2021 Written by a creative master of mathematical logic, this introductory text combines stories of great philosophers, quotations, and riddles with the fundamentals of mathematical logic. Author Raymond Smullyan offers clear, incremental presentations of difficult logic concepts. He highlights each subject with inventive explanations and unique problems. Go for Beginners Dec 29 2022 Go is an ancient, subtly beautiful game of territory. But with its nearly endless possibilities and challenges, it is more than just another game; it is a way of life for tens of millions of players throughout the world. Embodying four thousand years of Oriental thought and culture, go is the oldest game in the world still played in its original form. Go is the kind of game that one can learn in a day—and spend a lifetime perfecting. It is more art than science: in order to surround and capture the opponent's territory, one needs intuition, flexibility, and acute perception combined with a sharp analytical mind. Each player is a partner in an exercise of coexistence; each player needs the other for self-enlightenment and for enjoyment. But then, too, go is a game whose strategy has been compared to the tactics of guerilla warfare. Go can be all things to all people; it is simple, elegant, and unexpectedly beautiful. This book contains an introduction; a brief example game; a clear, leisurely explanation of the rules; and illustrations of the simplest techniques of good play and of some easy and some more difficult problems the player will encounter. The appendixes include a concise list of rules, a glossary of technical terms, and a list of international and American go organizations. Among go players, Go for Beginners is known as the best beginner's book available.
