Making College Work Aug 18 2021 Practical solutions for improving higher education opportunities for disadvantaged students Too many disadvantaged college students in America do not complete their coursework or receive any college credential, while others earn degrees or certificates with little labor market value. Large numbers of these students also struggle to pay for college, and some incur debts that they have difficulty repaying. The authors provide a new review of the causes of these problems and offer promising policy solutions. The circumstances affecting disadvantaged students stem both from issues on the individual side, such as weak academic preparation and financial pressures, and from institutional failures. Low-income students disproportionately attend schools that are underfunded and have weak performance incentives, contributing to unsatisfactory

outcomes for many students. Some solutions, including better financial aid or academic supports, target individual students. Other solutions, such as stronger linkages between coursework and the labor market and more structured paths through the curriculum, are aimed at institutional reforms. All students, and particularly those from disadvantaged backgrounds, also need better and varied pathways both to college and directly to the job market, beginning in high school. We can improve college outcomes, but must also acknowledge that we must make hard choices and face difficult tradeoffs in the process. While no single policy is guaranteed to greatly improve college and career outcomes, implementing a number of evidence-based policies and programs together has the potential to improve these outcomes substantially.

Decision Making for Student Success Mar 13 2021 Each year, many students with affordable college options and the academic skills needed to succeed do not enroll at all, enroll at institutions where they are not well-positioned for success, or drop out of college before earning a credential. Efforts to address these challenges have included changes in financial aid policy, increased availability of information, and enhanced academic support. This volume argues that the efficacy of these strategies can be improved by taking account of contemporary research on how students make choices. In *Decision Making for Student Success*, scholars from the fields of behavioral economics, education, and public policy explore contemporary research on decision-making and highlight behavioral insights that can improve postsecondary access and success. This exciting volume will provide scholars, researchers, and higher education administrators with valuable perspectives and low-cost strategies that they can employ to improve outcomes for underserved populations.

United States Code Sep 26 2019 Preface 2012 edition: The United States Code is the official codification of the general and permanent laws of the United States. The Code was first published in 1926, and a new edition of the code has been published every six years since 1934. The 2012 edition of the Code incorporates laws enacted through the One Hundred Twelfth Congress, Second session, the last of which was signed by the President on January 15, 2013. It does not include laws of the One Hundred Thirteenth Congress, First session, enacted between January 3, 2013, the date it convened, and January 15, 2013. By statutory authority this edition may be cited "U.S.C. 2012 ed." As adopted in 1926, the Code established prima facie the general and permanent laws of the United States. The underlying statutes reprinted in the Code remained in effect and controlled over the Code in case of any discrepancy. In 1947, Congress began enacting individual titles of the Code into positive law. When a title is enacted into positive law, the underlying statutes are repealed and the title then becomes legal evidence of the law. Currently, 26 of the 51 titles in the Code have been so enacted. These are identified in the table of titles near the beginning of each volume. The Law Revision Counsel of the House of Representatives continues to prepare legislation pursuant to 2 USC 285b to enact the remainder of the Code, on a title-by-title basis, into positive law. The 2012 edition of the Code was prepared and published under the supervision of Ralph V. Seep, Law Revision Counsel. Grateful acknowledgment is made of the contributions by all who helped in this work, particularly the staffs of the Office of the Law Revision Counsel and the Government Printing Office. -- John. A. Boehner, Speaker of the House of Representatives, Washington, D.C., January 15, 2013--

Supporting Students' College Success Sep 30 2022 The

importance of higher education has never been clearer.

Educational attainment—the number of years a person spends in school—strongly predicts adult earnings, as well as health and civic engagement. Yet relative to other developed nations, educational attainment in the United States is lagging, with young Americans who heretofore led the world in completing postsecondary degrees now falling behind their global peers. As part of a broader national college completion agenda aimed at increasing college graduation rates, higher education researchers and policy makers are exploring the role of intrapersonal and interpersonal competencies in supporting student success.

Supporting Students' College Success: The Role of Assessment of Intrapersonal and Interpersonal Competencies identifies 8 intrapersonal competencies (competencies involving self-management and positive self-evaluation) that can be developed through interventions and appear to be related to persistence and success in undergraduate education. The report calls for further research on the importance of these competencies for college success, reviews current assessments of them and establishes priorities for the use of current assessments, and outlines promising new approaches for improved assessments.
