Jamaica Inn Jul 21 2021 AN UNFORGETTABLE STORY OF MURDER, MYSTERY AND PASSION, FROM THE BESTSELLING AUTHOR OF REBECCA In the bitter November wind, Mary Yellan crosses Bodmin Moor to Jamaica Inn. Her mother's dying wish was that she take refuge

there, with her Aunt Patience. But when Mary arrives, the warning of the coachman echoes in her mind: Jamaica Inn has a desolate power, and behind its crumbling walls Patience is a changed woman, cowering before her brooding, violent husband. When Mary discovers the inn's dark secrets, the truth is more terrifying than anything she could possibly imagine, and she is forced to collude in her uncle's murderous schemes. Against her will, she finds herself powerfully attracted to her uncle's brother, a man she dares not trust.

Paper Knowledge Nov 12 2020 Paper Knowledge is a remarkable book about the mundane: the library card, the promissory note, the movie ticket, the PDF (Portable Document Format). It is a media history of the document. Drawing examples from the 1870s, the 1930s, the 1960s, and today, Lisa Gitelman thinks across the media that the document form has come to inhabit over the last 150 years, including letterpress printing, typing and carbon paper, mimeograph, microfilm, offset printing, photocopying, and scanning. Whether examining late nineteenth century commercial, or "job" printing, or the Xerox machine and the role of reproduction in our understanding of the document, Gitelman reveals a keen eye for vernacular uses of technology. She tells nuanced, anecdote-filled stories of the waning of old technologies and the emergence of new. Along the way, she discusses documentary matters such as the relation between twentieth-century technological innovation and the management of paper, and the interdependence of computer programming and documentation. Paper Knowledge is destined to set a new agenda for media studies.

PROC REPORT by Example May 07 2020 PROC REPORT by Example: Techniques for Building Professional Reports Using SAS provides real-world examples using PROC REPORT to create a wide variety of professional reports. Written from the point of view of the programmer who produces the reports, this book explains and illustrates creative techniques used to achieve the desired results. Each chapter focuses on a different concrete example, shows an image of the final report, and then takes you through the process of creating that report. You will be able to break each report down to find out how it was produced, including any data manipulation you have to do. The book clarifies solutions to common, everyday programming challenges and typical daily tasks that programmers encounter. For example: obtaining desired report formats using style templates supplied by SAS and PROC TEMPLATE, PROC REPORT STYLE options, and COMPUTE block features employing different usage options (DISPLAY, ORDER, GROUP, ANALYSIS, COMPUTED) to create a variety of detail and summary reports using BREAK statements and COMPUTE blocks to summarize and report key findings producing reports in various Output Delivery System (ODS) destinations including RTF, PDF, XML, TAGSETS.RTF embedding images in a report and combining graphical and tabular data with SAS 9.2 and beyond Applicable to SAS users from all disciplines, the real-life scenarios will help elevate your reporting skills learned from other books to the next level. With PROC REPORT by Example: Techniques for Building Professional Reports Using SAS, what seemed complex will become a matter of practice. This book is part of the SAS Press program.

The Rust Programming Language (Covers Rust 2018) Oct 12 2020 The official book on the Rust programming language, written by the Rust development team at the Mozilla Foundation, fully updated for Rust 2018. The Rust Programming Language is the official book on Rust: an open source systems programming language that helps you write faster, more reliable software. Rust offers control over low-level details (such as memory usage) in combination with high-level ergonomics, eliminating the hassle traditionally associated with low-level languages. The authors of The Rust Programming Language, members of the Rust Core Team, share their knowledge and experience to show you how to take full advantage of Rust's features--from installation to creating robust and scalable programs. You'll begin with basics like creating functions, choosing data types, and binding variables and then move on to more advanced concepts, such as: Ownership and borrowing, lifetimes, and traits Using Rust's memory safety guarantees to build fast, safe programs Testing, error handling, and effective refactoring Generics, smart pointers, multithreading, trait objects, and advanced pattern matching Using Cargo, Rust's built-in package manager, to build, test, and document your code and manage dependencies How best to use Rust's advanced compiler with compiler-led programming techniques You'll find plenty of code examples throughout the book, as well as three chapters dedicated to building complete projects to test your learning: a number guessing game, a Rust implementation of a command line tool, and a multithreaded server. New to this edition: An extended section on Rust macros, an expanded chapter on modules, and appendixes on Rust development tools and editions.

How to Read a Paper Aug 02 2022 How to Read a Paper describes the different types of clinical research reporting, and explains how to critically appraise the publications. The book provides the tools to find and evaluate the literature, and implement the findings in an evidence-based, patient-centered way. Written for anyone in the health care professions who has little or no knowledge of

evidence-based medicine, it provides a clear understanding of the concepts and how to put them into practice at the basic, clinical level. Changes for the 4th edition The fourth edition will include two new chapters on important developments in health care research and delivery, but otherwise retains its original style, size, and scope. New chapter on quality improvement – describing papers on quality improvement projects using ebm methods; this will extend the readership to non clinical health care professionals working in hospitals and family practice, and to nurse specialists and practice nurses working in this field New chapter on complex interventions - how to set up research projects involving both qualitative and quantitative methodology (known as mixed methods) Thorough revision and updating of existing chapters and references New illustrations – diagrammatic representations of ebm concepts

Deep Learning Feb 02 2020 An introduction to a broad range of topics in deep learning, covering mathematical and conceptual background, deep learning techniques used in industry, and research perspectives. “Written by three experts in the field, *Deep Learning* is the only comprehensive book on the subject.” —Elon Musk, cochair of OpenAI; cofounder and CEO of Tesla and SpaceX *Deep learning* is a form of machine learning that enables computers to learn from experience and understand the world in terms of a hierarchy of concepts. Because the computer gathers knowledge from experience, there is no need for a human computer operator to formally specify all the knowledge that the computer needs. The hierarchy of concepts allows the computer to learn complicated concepts by building them out of simpler ones; a graph of these hierarchies would be many layers deep. This book introduces a broad range of topics in deep learning. The text offers mathematical and conceptual background, covering relevant concepts in linear algebra, probability theory and information theory, numerical computation, and machine learning. It describes deep learning techniques used by

practitioners in industry, including deep feedforward networks, regularization, optimization algorithms, convolutional networks, sequence modeling, and practical methodology; and it surveys such applications as natural language processing, speech recognition, computer vision, online recommendation systems, bioinformatics, and videogames. Finally, the book offers research perspectives, covering such theoretical topics as linear factor models, autoencoders, representation learning, structured probabilistic models, Monte Carlo methods, the partition function, approximate inference, and deep generative models. Deep Learning can be used by undergraduate or graduate students planning careers in either industry or research, and by software engineers who want to begin using deep learning in their products or platforms. A website offers supplementary material for both readers and instructors.

The Yellow Wallpaper Illustrated Jul 29 2019 The story details the descent of a young woman into madness. Her supportive, though misunderstanding husband, John, believes it is in her best interests to go on a rest cure after experiencing symptoms of "temporary nervous depression". The family spends the summer at a colonial mansion that has, in the narrator's words, "something queer about it". She and her husband move into an upstairs room that she assumes was once a nursery. Her husband chooses for them to sleep there due to its multitude of windows, which provide the air so needed in her recovery. In addition to the couple, John's sister Jennie is present; she serves as their housekeeper. Like most nurseries at the time the windows are barred, the wallpaper has been torn, and the floor is scratched. The narrator attributes all these to children, as most of the damage is isolated to their reach. Ultimately, though, readers are left unsure as to the source of the room's state, leading them to see the ambiguities in the unreliability of the narrator. The narrator devotes many journal entries to describing the wallpaper in the room - its "yellow" smell, its "breakneck" pattern, the missing patches, and the way it

leaves yellow smears on the skin and clothing of anyone who touches it. She describes how the longer one stays in the bedroom, the more the wallpaper appears to mutate, especially in the moonlight. With no stimulus other than the wallpaper, the pattern and designs become increasingly intriguing to the narrator. She soon begins to see a figure in the design, and eventually comes to believe that a woman is creeping on all fours behind the pattern. Believing she must try to free the woman in the wallpaper, the woman begins to strip the remaining paper off the wall. After many moments of tension between John and his sister, the story climaxes with the final day in the house. On the last day of summer, she locks herself in her room to strip the remains of the wallpaper. When John arrives home, she refuses to unlock the door. When he returns with the key, he finds her creeping around the room, circling the walls and touching the wallpaper. She excitedly exclaims, "I've got out at last... in spite of you and Jane", causing her husband to faint as she continues to circle the room, creeping over his inert body each time she passes it, believing herself to have become the personification of the woman trapped behind the yellow wallpaper.

How to Read a Paper Oct 04 2022 The best-selling introduction to evidence-based medicine In a clear and engaging style, *How to Read a Paper* demystifies evidence-based medicine and explains how to critically appraise published research and also put the findings into practice. An ideal introduction to evidence-based medicine, *How to Read a Paper* explains what to look for in different types of papers and how best to evaluate the literature and then implement the findings in an evidence-based, patient-centred way. Helpful checklist summaries of the key points in each chapter provide a useful framework for applying the principles of evidence-based medicine in everyday practice. This fifth edition has been fully updated with new examples and references to reflect recent developments and current practice. It also includes two new chapters on applying evidence-based medicine with patients

and on the common criticisms of evidence-based medicine and responses. *How to Read a Paper* is a standard text for medical and nursing schools as well as a friendly guide for everyone wanting to teach or learn the basics of evidence-based medicine.

Reinventing Development Aug 29 2019 Global development actors such as the World Bank and the International Monetary Fund claim that the shift to the poverty reduction strategy framework and emphasis on local participation address the social cost of earlier adjustment programs and help put aid-receiving countries back in control of their own development agenda. Drawing on the case of Ghana, Lord Mawuko-Yevugah argues that this shift and the emphasis on partnerships between donors and poor countries, local participation, and country ownership simultaneously represents a substantive departure from earlier versions of neo-liberalism and an attempt by global development actors and local governing and social elites to justify, and legitimize the neo-liberal policy paradigm. This book shows how the new architecture of aid has important implications in three distinct but related ways: the discursive construction and production of post-colonial societies; the changing focus of Western aid and development policy interventions; and the reproduction of the politics of inclusive exclusion. The author provides detailed and original research on the new development paradigm and develops a critical theoretical approach to re-think conventional analyses of the new discourses on aid whilst offering a fresh, alternative interpretation of changes in international aid relations.

Accountability in Higher Education Jan 15 2021 The latest volume in the Routledge International Studies in Higher Education series, *Accountability in Higher Education* takes an in-depth look at

accountability initiatives around the world. Various evaluations, reporting schemes, and indicator systems have been initiated both to inform the public about higher education performance and to help transform universities and colleges and improve their functioning. This edited collection provides a comparative analysis of the promises, perils and paradoxes of accountability, and the potential effect on power structures and higher education autonomy, trust and the legitimacy of the sector. Part I describes how accountability is perceived and understood in different regions of the world, identifies some of the most common elements in established accountability initiatives, especially related to quality assurance, and provides direction for possible future development. Part II focuses on responses to new demands for accountability at institutional, national and international levels, and provides practical guidance for handling accountability going forward, emphasizing the dynamic relationship between international development, government strategies and organizational change. This volume is a must-have resource for HE managers, administrators, policy makers, researchers, HE graduate students and those interested or involved with HE accountability practices.

Regulation and Governance of Mutual Funds Jun 27 2019 This book provides a detailed analysis of mutual fund regulations and governance in the UK from the investor protection perspective. It comprehensively describes mutual funds by their function, social utility, and legal attributes, examining the level of protection provided to retail investors under existing regulations. Mutual funds are externally managed with fund ownership separated out from their management, which carries a potential conflict of interest between the self-interests of the fund management and each fund's investors. The book provides an in-depth analysis of this agency problem in the mutual fund industry, comparing the competing governance models in the UK and the US and the supervision of management activities. In the UK, it investigates the main governance mechanisms, including

disclosure, the effectiveness of voting rights, and the role of the Financial Conduct Authority in protecting investors. It also considers the role of prudential regulations in protecting mutual fund investors, with a particular focus on risk management and mutual fund liquidity crisis. The book further investigates the impact of the withdrawal of the UK from the European Union (Brexit) on the industry and what this means for the future of the undertakings for collective investment in transferable securities (UCITS) in the UK. The concept of mutual funds is still not clearly understood, so this book will clearly define the different legal and practical aspects of mutual funds. It will be the first substantial study of mutual fund governance mechanisms under the existing mutual fund laws and regulations in the UK.

Introduction to the Hong Kong Basic Law Dec 14 2020 Effective since China's resumption of sovereignty on 1 July 1997, the Hong Kong Basic Law lays down the general policies and system of government for Hong Kong under the "one country, two systems" formula. It guarantees Hong Kong a high degree of autonomy, enshrines the rights and freedoms of residents, and preserves a separate common law system with an independent judiciary. This introduction traces the origins of the Hong Kong Basic Law and the concepts and legal issues that surround it. Drawing on the experience of the first 15 years, it then analyses the content of the Hong Kong Basic Law, especially in relation to Hong Kong's political system, the judiciary, and human rights. Intended especially for students at all levels in law, politics, and other disciplines, this book—the only introductory guide of its kind to the subject—will also appeal to the general reader interested in Hong Kong's experience under "one country, two systems". "Danny Gittings's *Introduction to the Hong Kong Basic Law* makes a significant contribution to an important subject. It is expressed in reader-friendly terms. The insights that it provides are of value not only to lawyers but also to the general public." —The Hon. Mr. Justice

Kemal Bokhary, Permanent Judge of the Hong Kong Court of Final Appeal (1997–2012), Non-Permanent Judge (2012–). "This well-researched and very readable introduction explains the history, practices and future of the Basic Law—Hong Kong's key constitutional document. It also explores how far the Basic Law is able to address the many political and legal issues now facing Hong Kong. The book is suitable for a wide range of readers. Students of Hong Kong law at all levels will find it essential reading. General readers with an interest in Hong Kong's governance will find in it a lucid and accurate guide—and a timely one as the debate about implementing democracy intensifies." —Professor Fu Hualing, Faculty of Law, University of Hong Kong. "Many of us approach law books with trepidation. But Gittings, a legal academic, used to be a journalist and this shows in his ability to make the book accessible to the general reader. [...] The Basic Law will continue to be central to issues facing the city for years to come. This book enables the reader to quickly acquire a much better understanding of them." — South China Morning Post "As Professor Gittings points out in his book, which includes a chapter on what might happen after Hong Kong's 50-year autonomy ends, readability was a key aim. Acronyms are kept to a minimum and details set up neatly and comprehensively in footnotes so that the main text is kept as clean as possible." — Hong Kong Lawyer

How to Write a Good Scientific Paper Nov 05 2022 Many scientists and engineers consider themselves poor writers or find the writing process difficult. The good news is that you do not have to be a talented writer to produce a good scientific paper, but you do have to be a careful writer. In particular, writing for a peer-reviewed scientific or engineering journal requires learning and executing a specific formula for presenting scientific work. This book is all about teaching the style and conventions of writing for a peer-reviewed scientific journal. From structure to style, titles to tables, abstracts to author lists, this book gives practical advice about the process of writing a paper and getting it published.

The Green Book Apr 05 2020 This new edition incorporates revised guidance from H.M Treasury which is designed to promote efficient policy development and resource allocation across government through the use of a thorough, long-term and analytically robust approach to the appraisal and evaluation of public service projects before significant funds are committed. It is the first edition to have been aided by a consultation process in order to ensure the guidance is clearer and more closely tailored to suit the needs of users.

Relativity: The Special and General Theory Mar 05 2020 Albert Einstein, a Nobel laureate, has changed the world with his research and theories. He is regarded as the founder of modern physics. Besides ‘Relativity’, he worked on Photoelectric effect, Brownian motion, Special relativity, and Mass-Energy equivalence ($E=mc^2$). They reformed the views on time, space and matter. Allert Einstein developed the general theory of ‘Relativity’. He published ‘Relativity: The Special and the General Theory’ in German. Its first English translation was published in 1920. The book deals with

the special theory of relativity, the general theory of relativity, and the considerations on the universe as a whole The book gives an exact insight into the theory of Relativity. It covers, the system of Co-ordinates; The Lorentz Transformation; The experiment of Fizeau; Minkowski's four dimensional space; The Gravitational Field; Gaussian Co-ordinates; The structure of space, and lot many other scientific concepts thus will be highly beneficial to the Readers. A must have book for everyone related to modern physics.

The Algorithmic Foundations of Differential Privacy Aug 10 2020 The problem of privacy-preserving data analysis has a long history spanning multiple disciplines. As electronic data about individuals becomes increasingly detailed, and as technology enables ever more powerful collection and curation of these data, the need increases for a robust, meaningful, and mathematically rigorous definition of privacy, together with a computationally rich class of algorithms that satisfy this definition. Differential Privacy is such a definition. The Algorithmic Foundations of Differential Privacy starts out by motivating and discussing the meaning of differential privacy, and proceeds to explore the fundamental techniques for achieving differential privacy, and the application of these techniques in creative combinations, using the query-release problem as an ongoing example. A key point is that, by rethinking the computational goal, one can often obtain far better results than would be achieved by methodically replacing each step of a non-private computation with a differentially private implementation. Despite some powerful computational results, there are still fundamental limitations. Virtually all the algorithms discussed herein maintain differential privacy against adversaries of arbitrary computational power -- certain algorithms are computationally intensive, others are efficient. Computational complexity for the adversary and the algorithm are both discussed. The monograph then turns from fundamentals to applications other than query-release, discussing differentially private methods for mechanism design and machine learning. The vast majority of the literature on differentially private algorithms considers a single, static, database that is subject to many analyses.

Differential privacy in other models, including distributed databases and computations on data streams, is discussed. The Algorithmic Foundations of Differential Privacy is meant as a thorough introduction to the problems and techniques of differential privacy, and is an invaluable reference for anyone with an interest in the topic.

The Yellow Wallpaper Illustrated Jan 27 2022 "The Yellow Wallpaper" is a short story by American writer Charlotte Perkins Gilman, first published in January 1892 in The New England Magazine.[1] It is regarded as an important early work of American feminist literature, due to its illustration of the attitudes towards mental and physical health of women in the 19th century. Narrated in the first person, the story is a collection of journal entries written by a woman whose physician husband (John) has rented an old mansion for the summer. Forgoing other rooms in the house, the couple moves into the upstairs nursery. As a form of treatment, the unnamed woman is forbidden from working, and is encouraged to eat well and get plenty of air, so she can recuperate from what he calls a "temporary nervous depression - a slight hysterical tendency", a diagnosis common to women during that period

East Asia and Pacific Economic Update April 2014 Oct 31 2019 Developing countries in the East Asia Pacific region will see stable economic growth this year, bolstered by a recovery in high-income

economies and the market's modest response so far to the Federal Reserve's tapering of its quantitative easing, according to the East Asia Pacific Economic Update. Developing East Asia will grow by 7.1 percent this year, largely unchanged from 2013, the report says. As a result, East Asia remains the fastest growing region in the world, despite a slowdown from the average growth rate of 8.0 percent from 2009 to 2013. In China, growth will ease slightly, to 7.6 percent this year from 7.7 percent in 2013. Excluding China, the developing countries in the region will grow by 5.0 percent, slightly down from 5.2 percent last year.

How To Survive Peer Review Mar 29 2022 How to Survive Peer Review is a practical handbook designed to help anybody who wants to get their work published in a scientific journal, wants to apply for research funds or who has to undergo formal appraisals at work. It will also help people who have been asked to review articles, abstracts or grant applications. These activities are an essential part of scientific life, yet they virtually never get covered in professional training. It is often difficult even to get any helpful information about the processes from journals, meetings or funders. For the first time, this book brings together all you need to know, with authoritative advice from three authors who have researched peer review extensively and have considerable practical experience as researchers, editors and reviewers.
