Based on existing evidence, both types of addiction produce negative impacts on individuals' physical, mental, social and financial well-being, and share certain common mechanisms, which involve a dysfunction of the neural reward system and specific gene transcription factors. [Easy WP Guide WordPress Manual](#) Dec 02 2022 It might be easier to say what this guide isn't, rather than what it is. It isn't an in depth look at every single function available within the WordPress dashboard. Nor is it a guide to help you develop or modify WordPress themes. It's an easy to follow WordPress manual that will help you to get an overall understanding of how you use the various features within the WordPress Dashboard to keep your website or blog updated. The official WordPress Codex is great if you want to get really involved in developing your own WordPress theme or modifying your site with plugins, but it can be a bit daunting for those users who just want a simple guide to using the Content Management side of WordPress or just need to update their site pages every so often. The Easy WP Guide will teach you how to add content to your website and keep it updated, simply and easily. This version has been completely updated for use with WordPress 4.2.

**Healing the Wounds of Gukurahundi in Zimbabwe** Sep 26 2019 This book is based on a participatory action research project carried out with a group of former Zimbabwe People's revolutionary Army (ZPRA) which was the armed wing of the Zimbabwe African People's Union (ZAPU) which was led by the late Joshua Nkomo. ZPRA was the primary target of Gukurahundi, a pogrom by the Mugabe government which left an estimated 20 000 civilians dead and countless others tortured in the early 1980s in Matebeleland, Zimbabwe. It has been almost 30 years since the violence ended, but there has never been an official healing and reconciliation programme or truth commission into the atrocities. The government chose the path of amnesia by granting a blanket amnesty to all involved. The regime has enforced a culture of silence over the event through repression and intimidation. The book is a culmination of a two year journey, by the group and the author, of an exploration of group-based self-healing approaches to the pain caused by the violence of Gukurahundi.

**Terror Flyers** Oct 08 2020 Terror Flyers examines the "lynch justice" (Lynchjustiz) committed against American airmen in Nazi Germany during World War II. Using engaging first-person accounts of downed pilots, as well as previously unused primary sources, Terror Flyers challenges the notion that such lynchings were exclusively the domain of Nazi party officials and soldiers. New evidence reveals ordinary German people executed Lynchjustiz as well. Initially occurring as a spontaneous reaction to the devastation of the Allied air campaign against the cities of the Third Reich, Lynchjustiz offered the Nazi regime a unique propaganda opportunity to harness the outrage of the German population. Fueled by inspiration from America's own history of the lynching of African Americans, Nazi propaganda exploited the very same imagery found in US publications to escalate the anger of the German people. Drawing heavily on the accounts of the downed airmen themselves, testimonies from the "flyer trials" held in Dachau during 1945-48, and rarely seen Nazi propaganda, Terror Flyers offers a new narrative of this previously overlooked aspect of the Allied campaign in Europe and suggests that at least 3,000 cases of lynch justice likely occurred between 1943 and 1945.

**Videogame Graphics, BigData & Analytics** Apr 13 2021 ABSTRACT The purpose of this coffee shop read is to attempt to highlight the criticality of videogames as a component of the "Convergence" of some amazing technologies (in particular: Cloud, Gaming/MMOG, Gamification and BigData) that is clear to many inside the IT world. I am not a deep technical "guru" I am a businessman that seeks to understand these technologies in order to find a mean by which they can be leveraged ultimately for commercial gain. This short book is the output from my investigation of videogames and Massively Multi-user Online Games (MMOG) and is written in as much a chronological order as could be achieved to try to take other business, non-IT, and non-programming literate readers on the journey I took which resulted in a deepening of my understanding of why the once humble graphics processing capabilities have become part of the bedrock for our future exploitation of computer processing as a whole. In doing so it is hoped this short book has answered some seemingly simple questions during the journey, namely: Why GPU's were developed? Why triangles are so important to graphics processing? Why high degrees of parallelism are becoming increasingly important? How GPU's are being utilized to deliver significant gains in industries and market sectors far beyond the original design criteria for the GPU? and Why GPU's cannot wholly replace CPU's and that the future is most likely a symbiosis of the two capabilities leveraging each for their inherent strengths? For much more on the Convergence of these technologies please review my website: [www.eamonnkillian.com](http://www.eamonnkillian.com)

**Earth Care Manual** Aug 06 2020 The long-awaited exploration of permaculture specifically for cooler Northern Hemisphere climates is finally here! Already regarded as the definitive book on the subject, The

Earth Care Manual is accessible to the curious novice as much as it is essential for the knowledgeable practitioner. Permaculture started out in the 1970s as a sustainable alternative to modern agriculture, taking its inspiration from natural ecosystems. It has always placed an emphasis on gardening, but since then it has expanded to include many other aspects, from community design to energy use. It can be seen as an overall framework that puts a diversity of green ideas into perspective. Its aims are low work, high output, and genuine sustainability.

*The Elephant in the Room* Jan 11 2021 I write this book to do something that most would consider unwise as a current employee of the Seventh-day Adventist Church. I call or appeal for systematic change--change in policies that have kept the financial support from tithe and other sources to Adventist elementary and other sources to Adventist schools at minimal. Please don't think of me as a brave one who dares to go where many have not gone before. I am not... I speak out because we need policy changes at every level. "Fairness is not giving everyone the same thing but to give each person what he or she needs to succeed." Many businesses are rethinking how to move forward post the pandemic. We, too, as a church, need to do the same. In the Old Testament, God instructed his people to pass on their faith to their children by intentionally teaching them God's statutes and commandments (Deuteronomy 6:4-8 and Isaiah 54:13). Similarly, the Christian Church receives its marching orders from Jesus in the Great Commission found in Matthew 28:16-20. Jesus directs the church to make disciples of all nations by baptizing and teaching. Church schools are needed to partner with parents and the church as a whole to educate children. Ellen G. White, cofounder of the Seventh-day Adventist Church, who earlier encouraged the Seventh-day Church to focus on foreign missions, stated--in addressing church schools in the book Testimonies for the Church, volume 6--that the children are not to be neglected. She writes, "We cannot call ourselves true missionaries if we neglect those at our very doors who are at the most critical age and who need our aid to secure knowledge and experience that will fit them for the service of God." Her solution to financing church schools is simple: "Let all share the expense." Enrollment in Christian elementary and secondary schools have been dropping nationwide. Many families in North America, especially new immigrant families, are not able to afford the tuition to send their children to church schools. Several church schools have closed. In this book, Dr. Sadrail Saint-Ulyse, an ordained minister and educator of the Seventh-day Adventist Church, addresses the challenges of operating Christian schools at the elementary and secondary levels after serving for nearly twenty-five years as a pastor and educator, with the hope that the burden of operating church schools can be shared by the entire church--local, state, national, and worldwide--to alleviate this burden. The book challenges parents, teachers, principals, school boards, church members, and church leaders at every level to make the needed policy changes to ensure that church schools are financed in a sustainable manner.

**The Impact of Plain Language on Legal English in the United Kingdom** Apr 01 2020 This volume offers insights into the ways in which plain language has influenced the language of the law in the United Kingdom, critically reflecting on its historical development and future directions. The book opens with an overview of the theoretical frameworks underpinning plain language and a brief history of plain language initiatives as a foundation from which to outline ongoing debates on the opportunities and challenges of using plain language in the legal domain. The volume details strands where plain language has had considerable impact thus far on legal English in the UK, notably in legislative drafting, but it also explores areas in which plain language has made fewer inroads, such as the language of court judgments and that of online terms and conditions. The book looks ahead to unpack highly topical areas within the plain language debate, including the question of design and visualisation and the ramifications of digitalisation, contributing to ongoing conversations on the importance of plain language both in the UK and beyond. This book will be of particular interest to students and scholars interested in the intersection of language and the law as well as related disciplinary areas such as applied linguistics and English for Specific Purposes.

**Distortion and Subversion** Jun 15 2021 An Open Access edition of this book will be available on the Liverpool University Press website and the OAPEN library. At the turn of the 21st century, the Brazilian punk and hardcore music scene joined forces with political militants to foster a new social movement that demanded the universal right to free public transportation. These groups collaborated in numerous venues and media: music shows, protests, festivals, conferences, radio stations, posters, albums, slogans, and

digital and printed publications. Throughout this time, the single demand for free public transportation reconceptualized notions of urban space in Brazil and led masses of people across the country to protest. This book shows how the anti-capitalist, anti-bourgeoisie stance present in the discourse of a number of Brazilian bands that performed from the late 1990s to the beginning of the 21st century in the underground music scenes of Florianópolis and São Paulo encountered a reverberation in the rhetoric emanating from the Campaign for the Free Fare, subsequently known as the Free Fare Movement (Movimento Passe Livre, or MPL). This allowed the engaged bands and the movement for free public transportation to contribute to each other's development. The book also includes reflections on the Bus Revolt that occurred in the northeastern city of Salvador, unveiling traces of the punk and anarcho-punk movements, and the Revolution Carnivals that occurred in the city of Belo Horizonte, an event that mixed lectures, vegetarianism, protests, soccer, and punk rock music.

This document includes nine studies showcasing applied practices and successful initiatives in support of enhancing small-scale fisheries value chains, post-harvest operations and trade, based on the recommendations contained in the SSF Guidelines. Cases presented have been chosen on the basis that they can be emulated elsewhere by small-scale fishery proponents including, but not limited to, national

administrations, non-governmental organizations, civil society organizations, private enterprises, development agencies and intergovernmental bodies. An analysis of enabling conditions as well as related challenges and opportunities are discussed in each case. The document supports the 2030 Agenda for Sustainable Development – specifically SDG 14.b: “provide access for small-scale artisanal fishers to marine resources and markets”; and SDG 2.3: “by 2030 double the agricultural productivity and the incomes of small-scale food producers, particularly women, indigenous peoples, family farmers, pastoralists and fishers, including through secure and equal access to land, other productive resources and inputs, knowledge, financial services, markets and opportunities for value addition and non-farm employment”.
