God Without Being Jan 15 2021 Jean-Luc Marion is one of the world's foremost philosophers of religion as well as one of the leading Catholic thinkers of modern times. In God Without Being, Marion challenges a fundamental premise of traditional philosophy, theology, and metaphysics: that God, before all else, must be. Taking a characteristically postmodern stance and engaging in passionate dialogue with Heidegger, he locates a "God without Being" in the realm of agape, or Christian charity and love. If God is love, Marion contends, then God loves before he actually is. First translated into English in 1991, God Without Being continues to be a key book for discussions of the nature of God. This second edition contains a new preface by Marion as well as his 2003 essay on Thomas Aquinas. Offering a controversial, contemporary perspective, God Without Being will remain essential reading for scholars and students of philosophy and religion. "Daring and profound. . . . In matters most central to his thesis, [Marion]'s control is admirable, and his attunement to the nuances of other major postmodern thinkers is impressive."—Theological Studies "A truly remarkable work."—First Things "Very rewarding reading."—Religious Studies Review

Bretherick's Handbook of Reactive Chemical Hazards Mar 29 2022 'Bretherick' is widely accepted as the reference work on reactive chemical hazards and is essential for all those working with chemicals. It attempts to include every chemical for which documented information on reactive hazards has been found. The text covers over 5000 elements and compounds and as many again of secondary entries involving two or more compounds. One of its most valuable features is the extensive cross referencing throughout both sections which links similar compounds or incidents not obviously related. The fifth edition has been completely updated and revised by the new Editor and contains documented information on hazards and appropriate references up to 1994, although the text still follows the format of previous editions. Volume 1 is devoted to specific information on the stability of the listed compounds, or the reactivity of mixtures of two or more of them under various circumstances. Each compound is identified by an UPAC-based name, the CAS registry number, its empirical formula and structure. Each description of an incident or violent reaction gives reference to the original literature. Each chemical is classified on the basis of similarities in structure or reactivity, and these groups are listed alphabetically in Volume 2. The group entries contain a complete listing of all the compounds in Volume 1 assigned to that group to assist cross referral to similar compounds. Volume 2 also contains hazard topic entries arranged alphabetically, some with lists. Appendices include a fire related data table for higher risk chemicals, indexes of registry numbers and chemical names as well as reference abbreviations and a glossary.

The Origins of Religions Oct 31 2019 This attractively illustrated volume is the first comprehensive work for general readers on the origins of humankind's religious nature. By examining the footprints along the course of humanity's religious journey, Julien Ries is able to effectively counter attempts to root the origins of religion in evolutionary, ethnological, and sociological causes. His study uncovers the presence of a religious sense in humankind from our very first appearance on earth and shows that an inner religious structure is in fact an essential characteristic of our being human: homo religiosus. The Origins of Religions opens with a look at prehistoric man's first steps on the planet, then moves on to examine the cultic rituals, artistic expression, and expanding mythology that developed throughout the Paleolithic and Neolithic epochs. In these simple yet immensely meaningful religious practices we find the precursors to the development of systematic religion in the cultures of Sumero-Babylonia, pharaonic Egypt, China, Indo-Europe, and India, which in turn culminates in the birth of the three great monotheistic religions - Judaism, Christianity, and Islam.

Joseph Banks' Florilegium Jul 29 2019 The extraordinary botanical engravings of flora discovered on Captain Cook's first voyage, published for the first time in book form *Fantasies. Ediz. italiana e inglese* Oct 12 2020 When Rudolph Giuliani's administration cracked down on Times Square strip clubs in the 1990s, a whole new burlesque movement was born in New York, concentrating less on the strip and more on the tease. The young New York photographer Lisa Kereszi, then an assistant to Nan Goldin, was there with her camera to catch it all happening. She began by shooting Show World, a club that was in the process of being closed down by the new laws. In her flash,

Kereszi caught abandoned lockers, dressing rooms filled with old shoes and costumes and the grimy elegance of the empty theater--which was never meant to be seen by the light of day. Simultaneously, she began to photograph the new burlesque scene--which went underground in the late 1990s and has since evolved into a conceptually sophisticated, funny and rebellious medium. More pinup than porn, in just a few years, the new burlesque is no longer invisible, and has been gleefully appropriated into mainstream culture by way of Hollywood and the print media. A graduate of Yale University's MFA program, Kereszi's editorial work has appeared in books and magazines, including *The New York Times Magazine*, *Nest*, *Harper's*, *Wallpaper* and *GQ*; she is represented by Yancey Richardson Gallery in New York.

But by the late '70s, there was a new youth culture, one whose followers formed violent gangs, and were known as 'scallies,' 'trendies' and 'dressers' until the name Casuals finally stuck. Definitively tracing the roots of this inner-city Liverpool movement through first-person interviews with the main 'faces' of the gangs, Casuals explains how these hooligans evolved through the working-class fascination with sharp dressing to form bitter rivalries across England. With 16 pages of photos.

Paratextualizing Games Aug 10 2020 Gaming no longer only takes place as a ›closed interactive experience‹ in front of TV screens, but also as broadcast on streaming platforms or as cultural events in exhibition centers and e-sport arenas. The popularization of new technologies, forms of expression, and online services has had a considerable influence on the academic and journalistic discourse about games. This anthology examines which paratexts gaming cultures have produced - i.e., in which forms and formats and through which channels we talk (and write) about games - as well as the way in which paratexts influence the development of games. How is knowledge about games generated and shaped today and how do boundaries between (popular) criticism, journalism, and scholarship have started to blur? In short: How does the paratext change the text?

Japanese Ghost Stories May 31 2022 The dead wreak revenge on the living, paintings come alive, spectral brides possess mortal men and a priest devours human flesh in these chilling Japanese ghost stories retold by a master of the supernatural. Lafcadio Hearn drew on the phantoms and ghouls of traditional Japanese folklore - including the headless 'rokuro-kubi', the monstrous goblins 'jikininki' or the faceless 'mujina' who stalk lonely neighbourhoods - and infused them with his own memories of his haunted childhood in nineteenth-century Ireland to create these terrifying tales of striking and eerie power. Today they are regarded in Japan as classics in their own right. Edited with an introduction by Paul Murray

Poems I Will Never Release Sep 22 2021 This book is dedicated to the complex artistic trajectory of Chiara Fumai, who played a significant role in the development of

performance and feminist aesthetics in the twenty-first century and who died prematurely in 2017, at the age of only thirty-nine. Conceived as a critical monograph on Fumai's work as a visual artist, performer, DJ and music curator, 'Poems I Will Never Release' is the first volume to trace the entirety of her artistic path: from her scathing video performances and large-scale installations, to her more intimist practices of automatic writing and collage and her incursions into music. Almost 500 pages long, the volume is divided into three main chapters. The first of these brings together essays by prominent writers, curators and artists who examine Chiara Fumai's work from various perspectives, highlighting its intersections with anarchism, feminism, ideological forms and discourses of power and oppression, the animal rights movement, theater, surrealism and esotericism. The second chapter presents an imposing iconographic apparatus that documents Chiara Fumai's entire artistic production, from 2007 to 2017, while the third offers an exhaustively detailed chronology and bibliography.
