**The End of Law Apr 09 2021** Augustine posed two questions that go to the heart of the nature of law. Firstly, what is the difference between a kingdom and a band of robbers? Secondly, is an unjust law a law at all? These two questions force us to consider whether law is simply a means of social control, distinguished from a band of robbers only by its size, or whether law is a social institution justified by its orientation towards justice. The End of Law applies Augustine's questions to modern legal philosophy as well as offering a critical theory of natural law that draws on Augustine's ideas. McIlroy argues that such a critical natural law theory is realistic but not cynical about law's relationship to justice and to violence, can diagnose ways in which law becomes deformed and pathological, and indicates that law is a necessary but insufficient instrument for the pursuit of justice. Positioning an examination of Augustine's reflections on law in the context of his broader thought, McIlroy presents an alternative approach to natural law theory, drawing from critical theory, postmodern thought, and political theologies in conversation with Augustine. This insightful book will be fascinating reading for law students and legal philosophers seeking to understand the perspective and commitments of natural law theory and the significance of Augustine. Readers with an interest in interdisciplinary approaches to legal theory will also find this book a stimulating read.

**A People's History of Riots, Protest and the Law Mar 28 2020** This book examines how movements from below pose challenges to the status quo. The 2010s have seen an explosion of protest movements, sometimes characterised as riots by governments and the media. But these are not new phenomena, rather reflecting thousands of years of conflict between different social classes. Beginning with struggles for democracy and control of the state in Athens and ancient Rome, this book traces the common threads of resistance through the Middle Ages in Europe and into the modern age. As classes change so does the composition of the protestors and the goals of their movements; the one common factor being how groups can mobilise to resist unbearable oppression, thereby developing a crowd consciousness that widens their political horizons and demonstrates the possibility of overthrowing the existing order. To appreciate the roots and motivations of these so-called deviants the author argues that we need to listen to the sound of the crowd. This book will be of interest to researchers of social movements, protests and riots across sociology, history and international relations.

Book one examines Anglo-Saxon law, goes on to consider the changes in law introduced by the Normans, then moves to the twelfth-century Age of Glanvill followed by the thirteenth century Age of Bracton. Book two takes up different areas of English law by topic, including land tenure, marriage and wardship, fealty, the ranks of men both free and unfree, aliens, Jews, excommunicates, women, and the churches and the King, before turning to the various jurisdictions of that decentralised era.

**International Investment Law and the Right to Regulate** Nov 23 2019 The book considers the ways in which the international investment law regime intersects with the human rights regime, and the potential for clashes between the two legal orders. Within the human rights regime states may be obligated to regulate, including a duty to adopt regulation aiming at improving social standards and conditions of living for their population. Yet, states are increasingly confronted with the consequences of such regulation in investment disputes, where investors seek to challenge regulatory interferences for example in expropriation claims. Regulatory measures may for instance interfere with the investment by imposing conditions on investors or negatively affecting the value of the investment. As a consequence, investors increasingly seek to challenge regulatory measures in international investment arbitration on the basis of a bilateral investment treaty. This book sets out the nature and the scope of the right to regulate in current international investment law. The book examines bilateral investment treaties and ICSID arbitrations looking at the indicative parameters that are granted weight in practice in expropriation claims delimiting compensable from non-compensable regulation. The book places the potential clash between the right to regulate and international investment law within a theoretical framework which describes the stability-flexibility dilemma currently inherent within international law. Lone Wandahl Mouyal goes on to set out methods which could be employed by both BIT-negotiators and adjudicators of investment disputes, allowing states to exercise their right to regulate while at the same time providing investors with legal certainty. The book serves as a valuable tool, an added perspective, for academics as well as for practitioners dealing with aspects of international investment law.

**What About Law?** Dec 29 2022 "What About Law?" succeeds where so many legal guidebooks fail... [it] skilfully demystifies the law and ably proves its argument. The law is, indeed, all around us - and this book will whet your appetite to find out how and why." - Alex Wade, *The Times* (of the previous edition) Law is one of the few subjects that the school leaver, choosing a degree course, will have very little real understanding of. This book comes to the rescue by clearly setting out what a prospective law student can expect and why a student should choose to study law. This new edition is updated to reflect the reality of studying law today, highlighting changes due to Brexit and reforms to constitutional law. The book covers the compulsory subjects every law student has to study: contract, criminal, property and trusts law, and brings them up to date. With a clear core structure and approach it takes a case from each of these subjects to illustrate legal issues and methodology. The writing style is accessible and has the audience - novices to law - firmly in mind. *What About Law?* shows how the study of law can be fun, intellectually stimulating and challenging. It introduces prospective students to the legal system, legal reasoning, critical thinking and argument. Written by a team of experienced teachers, this book should be read by every student about to embark on the study of law.

**The Passing-On Problem in Damages and Restitution Under EU Law** Feb 07 2021 'Passing-on' occurs when harm or loss incurred by a business is passed on to burden that business's customers or the next level of the supply chain. In this authoritative book Magnus Strand provides the first comprehensive examination of passing-on in EU law damages and restitution. The analysis covers a broad range of contexts including competition damages and the repayment of charges. The book offers a systematic examination of the key questions facing parties in a passing-on situation: When can downstream claimants bring an action? How can claimants demonstrate sufficient proximity to the original harmful act or unjustified transaction? Will a possibility of passing-on be relevant to the estimation of the award? These questions are assessed for actions against the EU, a Member State and private individuals. Key features of this book include: \* specific EU law focus and guidance that will be relevant to lawyers throughout the EU\* a multi-faceted analysis of the defence of passing-on and the position of potential claimants downstream in the supply chain\* practical suggestions for consistent approaches to passing-on in EU law across existing and future contexts. This timely work will be an invaluable point of reference for practitioners working in damages and restitution law, but also in other fields of commercial law, including competition law and consumer law. Legislators and policy-makers in the EU and beyond will also benefit from the lucid analysis of the various policy choices made in the EU and US.

**Environmental Change, Forced Displacement and International Law** Feb 19 2022 This book explores the increasing concern over the extent to which those suffering from forced cross-border displacement as a result of environmental change are protected under international human rights law. Formally they are not entitled to admission or stay in a third state country, a situation that has been identified as an international "legal protection gap". The book seeks to provide answers to two basic questions: whether and to what extent existing international law protects cross-border environmental displacement, and whether and how existing formalized regional complementary protection standards can interpretively solidify and conceptualize protection for cross-border environmental displacement. The discussion outlines that the protection of the human person is not only an ex post facto obligation of states, but must be increasingly seen as an ex ante one. The analysis further suggests that the European Union regionally orientated protection regime can help states to consolidate an evolving protection paradigm of proactive and reactive measures being erected at the international level. It can also narrow the identified legal protection gaps. In so doing, it helps states to reconceptualise protection as a holistic and dynamic enterprise. This book will be of great interest to academics in law, political science and human rights, policy makers and civil society organisations both at national and international level.

**Research Handbook on Climate Disaster Law** Aug 01 2020 Climate change has thrust us into a "no-analog" future in which climate disasters threaten to cause extraordinary damage, with little precedent to guide policymakers and private actors. Addressing such risks requires a firm grounding in disaster risk reduction, climate change policy, and environmental law. This *Research Handbook* provides readers with that integrated foundation, investigating topics in international law as well as domestic programs from countries around the world. Because climate disasters affect both government and non-government actors, the *Research Handbook* covers issues of both public and private law. We know from the scientific literature and recent experience that the laws addressing natural disasters are insufficient to confront disasters amplified by climate change. The *Research Handbook* acknowledges that the majority of disasters are susceptible in some way to changes in the earth's climate and explores the barriers to, and opportunities for, finding legal solutions to the risks posed by such disasters. It shows that climate change must be considered in order to fully understand disaster risk and the respective legal and policy responses. The *Research Handbook* also emphasizes the moral responsibility we have to move as quickly as possible to create a carbon-free economy. This work will be of great appeal to legal scholars, practitioners, and policymakers who are interested in environmental law or climate change as it relates to international and domestic law and policy.

**European Union Law in Context** Oct 27 2022 This textbook provides an explanatory and contextual view of EU law and its impact in a simple and easily accessible yet analytical manner. It illustrates the power struggles behind a given EU law act, to allow for full understanding of how it developed. This allows the student to understand EU law as a force in the increasingly globalized world, rather than as technical and doctrinal subject. The textbook begins by setting the scene of EU integration, how we got there and why it is important. Thereafter it explores the constitutional framework for understanding EU law in context and by discussing inter alia, division of competences, accountability, legitimacy, enforcement, human rights, participation rights and so on as well as the general principles of the EU and citizenship rights. Subsequently the textbook explores the essentials of the internal market as well as the principles of competition law. It also discusses free movement rights and links to the growing "Area of Freedom, Security and Justice". Finally the textbook offers fresh insights on the external dimension of EU law and the role of the EU in the world today before concluding with an outlook on the future of EU law including the consequences of events such as Brexit.

**The New Terrain of International Law** Feb 25 2020 A compelling new look at the role of today's international courts In 1989, when the Cold War ended, there were six permanent international courts. Today there are more than two dozen that have collectively issued over thirty-seven thousand binding legal rulings. *The New Terrain of International Law* charts the developments and trends in the creation and role of international courts, and explains how the delegation of authority to international judicial institutions influences global and domestic politics. *The New Terrain of International Law* presents an in-depth look at the scope and powers of international courts operating around the world. Focusing on dispute resolution, enforcement, administrative review, and constitutional review, Karen Alter argues that international courts alter politics by providing legal, symbolic, and leverage resources that shift the political balance in favor of domestic and international actors who prefer policies more consistent with international law objectives. International courts name violations of the law and perhaps specify remedies. Alter explains how this limited power--the power to speak the law--translates into political influence, and she considers eighteen case studies, showing how international courts change state behavior. The case studies, spanning issue areas and regions of the world, collectively elucidate the political factors that often intervene to limit whether or not international courts are invoked and whether international judges dare to demand significant changes in state practices.

**The Birth of the English Common Law** Aug 21 2019 This book provides a challenging interpretation of the emergence of the common law in Anglo-Norman England, against the background of the general development of legal institutions in Europe. In a detailed discussion of the emergence of the central courts and the common law they administered, the author traces the rise of the writ system and the growth of the jury system in twelfth-century England. Professor van Caenegh attempts to explain why English law is so different from that on the Continent and why this divergence began in the twelfth century, arguing that chance and chronological accident played the major part and led to the paradox of a feudal law of continental origin becoming one of the most typical manifestations of English life and thought. First published in 1973, *The Birth of the English Common Law* has come to enjoy classical status, and in a preface Professor van Caenegh discusses some recent developments

in the study of English law under the Norman and earliest Angevin kings.
