Business Plan for Setting Up a Shop Selling Genetically Modified Food Jun 16 2021 Project Report from the year 2011 in the subject Business economics - Company formation, Business Plans, grade: A, University of Newcastle, language: English, abstract:

Genemod Shop is a company whose ideas of formation dates back to October 2010, when four undergraduate students taking accounting, horticulture, marketing and business management engaged in an entrepreneurial discussion. Scheduled to start its operations in May 2011, its main purpose is to provide quality and timely food to students the University of reading. It will provide Purple tomatoes, British blackcurrant berries, Tomato puree and some GM vegetables as the main GM food. The name Genemod was arrived at after considering many options one being the combination of Genetic and Modified to get Genemod hence the company name. On the market opportunity, with the current trend in food consumption, it has been realized that genetically modified food remains the best option both at home and commercial residents. Students in the university travel to the supermarkets to get food which should be availed near their halls of residents. The university has many halls of resident including student village, hillside court, Martindale court and Mackinder hall among others which represents a good market to be exploited. The company seeks a capital of £10,000 for the start up. This will be raised from member's contributions, loan from financial institution and venture capitalists' contributions. Repayment of the loan will begin immediately within two months of its operations. The shop faces competition from two main suppliers who bring fruits and vegetables to the school compound on Mondays and Wednesdays. Some students go to the supermarkets to buy the food hence this constitutes another competitor.

The Impact of Sales Promotions Increasing Revenue at 7-Eleven Stores in Singapore Nov 09 2020 Scientific Study from the year 2012 in the subject Business economics - Miscellaneous, printed single-sided, grade: A, University of Cambridge, language: English, comment: Very good, abstract: Profit maximization has since time immemorial been the ultimate goal of every business. This can be realized by increasing the sales volume. In order to achieve this goal, businesses may employ various different methods some of which are direct while others are indirect (Rizvi, Nazi & Malik,2011). Sales promotion is one of these methods and it is roughly defined as a diverse collection of effective incentive tools that are mainly used in the short term in order to stimulate a quicker as well as greater purchase of specific products or services by customers as noted by Kotler (1998). Advertisement expenditure grew by 4% between 2004 and 2005 in Singapore (Ang,2007). In this paper, we propose a research aimed at investigating the effectiveness of promotion activities in increasing sales at 7-Eleven stores in Singapore. 1.1.Problem statement The concept of sales promotion is often employed in grocery retailing and therefore takes up a considerable share of financial resources that retailers spend on their marketing initiatives (Persson,1995, p.5).The popularity of sale promotion application has of late became a source of inquiry by both retailers and product manufacturers. Despite the huge sums of money spend annually on sales and promotions, the economics and dynamics of sales promotions are poorly understood. As a result, there is a significantly huge knowledge gap to be filled. This study therefore attempt to adequately contribute to this effort but with a specific focus

on the effectiveness of promotion activities in increasing sales at 7-Eleven stores in Singapore. The aim of this research would therefore be to improve our knowledge on the exact dynamic of sales promotion in increasing the profitability at sales at 7-Eleven stores in Singapore. This research would therefore

Taxing Profit in a Global Economy Mar 26 2022 The international tax system is in dire need of reform. It allows multinational companies to shift profits to low tax jurisdictions and thus reduce their global effective tax rates. A major international project, launched in 2013, aimed to fix the system, but failed to seriously analyse the fundamental aims and rationales for the taxation of multinationals' profit, and in particular where profit should be taxed. As this project nears its completion, it is becoming increasingly clear that the fundamental structural weaknesses in the system will remain. This book, produced by a group of economists and lawyers, adopts a different approach and starts from first principles in order to generate an international tax system fit for the 21st century. This approach examines fundamental issues of principle and practice in the taxation of business profit and the allocation of taxing rights over such profit amongst countries, paying attention to the interests and circumstances of advanced and developing countries. Once this conceptual framework is developed, the book evaluates the existing system and potential reform options against it. A number of reform options are considered, ranging from those requiring marginal change to radically different systems. Some options have been discussed widely. Others, particularly Residual Profit Split systems and a Destination Based Cash-Flow Tax, are more innovative and have been developed at some length and in depth for the first time in this book. Their common feature is that they assign taxing rights partly/fully to the location of relatively immobile factors: shareholders or consumers.

Transportation, Knowledge and Space in Urban and Regional Economics Mar 02 2020 This collection of 16 original research chapters by international scholars addresses the complementary roles of transportation and knowledge and their spatial manifestations in modern urban and regional economies. The authors provide research from North America, Europe and Asia. While the studies employ sophisticated methods and theory, there is a strong element of practical applications and policy implications in each chapter as well. This book will be of interest to communities of research and practice in urban and regional economics and planning, regional science and economic geography, transportation research, planning and management and the knowledge economy.

Specialty Shop Retailing Oct 21 2021 Unlike other books on retailing, Specialty Shop Retailing is aimed at the reader who has a dream of opening a store, but little background in this type of business. The book takes into account the fact that their motivation is often not primarily monetary, but rather the intangible benefits of creating your own business and working with people and products that you love. This new and improved 3rd edition includes material about selling on the Internet, including eBay storefronts; online marketing and customer service improvements; and changes in the retailing field, such as competing with big box retailers and the demise of the sales rep system.

Bookseller Aug 07 2020 Vols. for 1871-76, 1913-14 include an extra number, The Christmas bookseller, separately paged and not included in the consecutive numbering of the regular series.

Service Profit Chain Oct 28 2019 In this pathbreaking book, world-renowned Harvard Business School service firm experts James L. Heskett, W. Earl Sasser, Jr. and Leonard A. Schlesinger reveal that leading companies stay on top by managing the service profit chain. Why are a select few service firms better at what they do -- year in and year out -- than their competitors? For most senior managers, the profusion of anecdotal "service excellence" books fails to address this key question. Based on five years of painstaking research, the authors show how managers at American Express, Southwest Airlines, Banc One, Waste Management, USAA, MBNA, Intuit, British Airways, Taco Bell, Fairfield Inns, Ritz-Carlton Hotel, and the Merry Maids subsidiary of ServiceMaster employ a quantifiable set of relationships that directly links profit and growth to not only customer loyalty and satisfaction, but to employee loyalty, satisfaction, and productivity. The strongest relationships the authors discovered are those between (1) profit and customer loyalty; (2) employee loyalty and customer loyalty; and (3) employee satisfaction and customer satisfaction. Moreover, these relationships are mutually reinforcing; that is, satisfied customers contribute to employee satisfaction and vice versa. Here, finally, is the foundation for a powerful strategic service vision, a model on which any manager can build more focused operations and marketing capabilities. For example, the authors demonstrate how, in Banc One's operating divisions, a direct relationship between customer loyalty measured by the "depth" of a relationship, the number of banking services a customer utilizes, and profitability led the bank to encourage existing customers to further extend the bank services they use. Taco Bell has found that their stores in the top quadrant of customer satisfaction ratings outperform their other stores on all measures. At American Express Travel Services, offices that ticket quickly and accurately are more profitable than those which don't. With hundreds of examples like these, the authors show how to manage the customer-employee "satisfaction mirror" and the customer value equation to achieve a "customer's eye view" of goods and services. They describe how companies in any service industry can (1) measure service profit chain relationships across operating units; (2) communicate the resulting self-appraisal; (3) develop a "balanced scorecard" of performance; (4) develop a recognitions and rewards system tied to established measures; (5) communicate results company-wide; (6) develop an internal "best practice" information exchange; and (7) improve overall service profit chain performance. What difference can service profit chain management make? A lot. Between 1986 and 1995, the common stock prices of the companies studied by the authors increased 147%, nearly twice as fast as the price of the stocks of their closest competitors. The proven success and high-yielding results from these high-achieving companies will make The Service Profit Chain required reading for senior, division, and business unit managers in all service companies, as well as for students of service management.
