**Using Story to Enrich Learning and Teaching** Jun 29 2022 Story is everywhere in human lives and cultures and it features strongly in the processes of teaching and learning. Story can be called narrative, case study, critical incident, life history, anecdote, scenario, illustration or example, creative writing, storytelling; it is a unit of communication, it is in the products of the media industries, in therapy and in our daily acts of reflecting. Stories are 'told' in many ways - they are spoken, written, filmed, mimed or acted, presented as cartoons and in new media formats and through all these, they are associated with both teaching and learning processes but in different ways and at different levels. As a result of growing interest and simultaneous confusion about story, it is timely to untangle the various meanings of story so that we can draw out and extend its value and use. Using Story aims to clarify what we mean by story, to seek out where story occurs in education and life and to explore the processes by which we learn from story. In this way the book intends to 'bring story into the open' and improve its use. Building on her wealth of experience in the field, Jenny Moon explores the theory of story and demonstrates both its current uses and new ways in which to enrich and enliven teaching, learning and research processes. Ideal for anyone involved in

education, personal or professional development or with a more general interest in story, the book begins by considering the range of what is meant by story, and then considers the theory behind the meanings. In the large final part of the book, Jenny provides a rich patchwork of different uses of story in education that cut across forms of story, story activities, disciplines and applications all of which will aid the use of story.

**Life Stages and Native Women** Oct 22 2021 A rare and inspiring guide to the health and well-being of Aboriginal women and their communities. The process of "digging up medicines" - of rediscovering the stories of the past - serves as a powerful healing force in the decolonization and recovery of Aboriginal communities. In *Life Stages and Native Women*, Kim Anderson shares the teachings of fourteen elders from the Canadian prairies and Ontario to illustrate how different life stages were experienced by Metis, Cree, and Anishinaabe girls and women during the mid-twentieth century. These elders relate stories about their own lives, the experiences of girls and women of their childhood communities, and customs related to pregnancy, birth, post-natal care, infant and child care, puberty rites, gender and age-specific work roles, the distinct roles of post-menopausal women, and women's roles in managing death. Through these teachings, we learn how evolving responsibilities from infancy to adulthood shaped women's identities and place within Indigenous society, and were

integral to the health and well-being of their communities. By understanding how healthy communities were created in the past, Anderson explains how this traditional knowledge can be applied toward rebuilding healthy Indigenous communities today.

**Teaching Through the Art of Storytelling** Apr 15 2021 As communicators in a culture saturated with storylines, we have the profound opportunity to invite our students into the masterful Story of

God. There are a variety of ways to invite our students into this Story, but this book discusses and explores how to teach through one of Jesus' most powerful modes of communication--fictional storytelling. Rabbinical storytelling (otherwise known as Jewish Agada) embraces the narrative of Scripture and invites its listeners into understanding and participation. Our Rabbi, Jesus, employed this mode of communication through his parables. Approaching the topic as a theologian, philosopher and artist, Jon invites and teaches how to create modern-day parables that illuminate the message of Jesus. These stories do not simply illustrate the message; they are, in fact, the message. Whether hoping to articulate deep theological concepts or relevant topics, teaching through the art of fictional storytelling has the potential to engage and invite our students into The Story. In this book: •You will learn how to create your own fictional stories (modern day parables) that use a realistic setting, engaging characters and a thought provoking plot to communicate a specific topic. •You are given practical worksheets that offer guidance in developing such stories •Jon includes a variety of stories he has developed over his years of youth ministry and offers them as a resource to any youth pastor/communicator. "I found myself wrapped up in its pages and receiving personal learning. It's a rarity in youth ministry as it has the potential of impacting not only youth but also their youth leaders." -- Dan Kimball - author of They Like Jesus but Not the Church

**The Call of Stories** Jan 05 2023 From the Pulitzer Prize-winning author of Children of Crisis, a profound examination of how listening to stories promotes learning and self-discovery. As a professor emeritus at Harvard University, a renowned child psychiatrist, and the author of more than forty books, including The Moral Intelligence of Children, Robert Coles knows better than anyone the transformative power of learning and literature on young minds. In this "persuasive" book (The New York Times Book Review), Coles convenes a virtual symposium of college, law, and medical school students to explore the phenomenon of storytelling as a source of values and character. Here are transcriptions of classroom conversations in which Coles and his students discuss the impact of particular works of literature on their moral development. Here also are Coles's intimate personal reflections on his experiences in the civil rights movement, his child psychiatry practice, and his interactions with his own literary mentors including William Carlos Williams and L.E. Sissman. The life lessons learned from these stories are of special resonance to doctors and teachers looking to apply them in classroom and clinical environments. The rare public intellectual to be honored with a MacArthur Award, a Presidential Medal of Freedom, and a National Humanities Medal, Robert Coles is a true national treasure, and The Call of Stories is, in the words of National Book Award winner Walker Percy, "Coles at his wisest and best."

**Teaching Stories** Sep 20 2021 When nearly everyone else is telling kids no—"No, do it this way....No, I don't want to hear what you think....No, sit down and pay attention"—Judy Logan says yes, to a child's passions, interests, and hopes. The results have been news-making; her students blossom academically, winning essay contests,

prizes, and entrance to the country's best colleges. Armed with a strong sense of who they are and what they think, her students also blossom personally—resisting peer pressure, understanding racial and gender stereotypes, and connecting to the world in which they live. Drawing on over thirty years "knee deep in adolescence" as a teacher in a public middle school, Judy Logan shows that it is the very vulnerability of adolescence that makes it a time of tremendous opportunity for emotional, intellectual, and social growth. Uniting creativity and compassion, Logan's vivid classroom stories bring into focus for all parents numerous effective strategies for working with adolescents. Above all, Judy Logan is a compelling storyteller who loves and respects her students and the work of learning. Eye-opening and inspirational, the stories she has to tell take the simple human drama of day-to-day classroom life and create an all-embracing vision of the possibilities of public education in America.

Teaching the Short Story Jan 31 2020 The short story is moving from relative neglect to a central position in the curriculum; as a teaching tool, it offers students a route into many complex areas, including critical theory, gender studies, postcolonialism and genre. This book offers a practical guide to the short story in the classroom, covering all these fields and more.

Rethinking Class Size: The complex story of impact on teaching and learning Oct 02 2022 The debate over whether class size matters for teaching and learning is one of the most enduring, and aggressive, in education research. Teachers often insist that small classes benefit their work. But many experts argue that evidence from research shows class size has little impact on pupil outcomes, so does not matter, and this dominant view has informed policymaking internationally. Here, the lead researchers on the world's biggest study into class size effects

present a counter-argument. Through detailed analysis of the complex relations involved in the classroom they reveal the mechanisms that support teachers' experience, and conclude that class size matters very much indeed. Drawing on 20 years of systematic classroom observations, surveys of practitioners, detailed case studies and extensive reviews of research, Peter Blatchford and Anthony Russell contend that common ways of researching the impact of class size are limited and sometimes misguided. While class size may have no direct effect on pupil outcomes, it has, they say, significant force through interconnections with classroom processes. In describing these connections, the book opens up the everyday world of the classroom and shows that the influence of class size is everywhere. It impacts on teaching, grouping practices and classroom management, the quality of peer relations, tasks given to pupils, and on the time teachers have for marking, assessments and understanding the strengths and challenges for individual pupils. From their analysis, the authors develop a new social pedagogical model of how class size influences work, and identify policy conclusions and implications for teachers and schools.

**Hidden in His Own Story** May 17 2021 Hidden in His Own Story is an invitation to reconsider and re-imagine both the humanity and divinity of Jesus. It is an invitation to people who are not familiar with the Bible stories and have only heard them through other sources, also to many who have rejected traditional interpretations of the stories as religious dogma, and to many people who are so steeped in the stories that they have become cliché. Even the most clever storyteller or writer of fiction can never totally disguise or deny their personal influence on the story. And most of us have had the experience of someone beginning a story with, "I know a person who . . ." when in fact that "person" is the one telling the story. Why not imagine the

same when Jesus says, "Once there was a man . . . ?"

**Narrative Matters** Mar 03 2020 In recent years there has been a massive revival of interest internationally in what story can offer to education. This book covers a range of issues at the heart of teaching history, such as the use of talk, the pitfalls of narrative as a pedagogical tool, translating curriculum content into lessons, story telling and story making. It also questions what it means to teach, the difficulties for teachers of remaining constructively critical of policy, and their own practice, during periods of national legislation and change.

From Story to Judgment: The Four Question Method for Teaching and Learning Social Studies Jan 13 2021 The Four Question Method identifies the questions that drive the thinking that real people do when they take the human world seriously. The authors, Jonathan Bassett and Gary Shiffman, have figured out how to describe and teach what it takes to answer those questions well. This inquiry method gives educators a way to integrate content 'coverage' - through storytelling! - with practice in thinking skills that are central to history and its affiliated academic disciplines, together called social studies. The Four Question Method helps teachers to plan more effectively and students to learn more effectively. It provides guidance for writing research essays. And it transfers: the skills our students practice will work for them when they encounter and make their own history.
