Fred Hoyle's Universe Jan 13 2021 Fred Hoyle was one of the most widely acclaimed and colourful scientists of the twentieth century, a down-to-earth Yorkshireman who combined a brilliant scientific mind with a relish for communication and controversy. Best known for his steady-state theory of cosmology, he described a universe with both an infinite past and an infinite future. He coined the phrase 'big bang' to describe the main competing theory, and sustained a long-running, sometimes ill-tempered, and typically public debate with his scientific rivals. He showed how the elements are formed by nuclear reactions inside stars, and explained how we are therefore all formed from stardust. He also claimed that diseases fall from the sky, attacked Darwinism, and branded the famous fossil of the feathered Archaeopteryx a fake. Throughout his career, Hoyle played a major role in the popularization of science. Through his radio broadcasts and his highly successful science fiction novels he became a household name, though his outspokenness and support for increasingly outlandish causes later in life at times antagonized the scientific community. Jane Gregory builds up a vivid picture of Hoyle's role in the ideas, the organization, and the popularization of astronomy in post-war Britain, and provides a fascinating examination of the relationship between a maverick scientist, the scientific establishment, and the public. Through the life of Hoyle, this book chronicles the triumphs, jealousies, rewards, and feuds of a rapidly developing scientific field, in a narrative animated by a cast of colourful astronomers, keeping secrets, losing their tempers, and building their careers here on Earth while contemplating the nature of the stars.

The English Catalogue of Books: v. [1]. 1835-1863 Aug 27 2019

Microbes, Music and Me Apr 03 2020 John Postgate describes this autobiography as essentially 'a book about doing science', and while it is an entertaining account of his life in the UK and abroad as he rose to international prominence in microbiology, it is also a book about playing and listening to his beloved jazz. Away from lab and lecture hall, Professor Postgate (brother of the late Oliver Postgate, creator of Bagpuss and the Clangers) has taken enormous pleasure in his hobby, playing cornet over the years with many musicians, some of whom became prominent names in jazz. His articles and reviews for magazines such as Gramophone and Jazz Journal have been as widely appreciated in jazz circles as his contributions to the understanding of certain key microbiological processes, including the sulphur cycle and nitrogen fixation, have been in the world of microbiology.

The Philosophy of Psychology Sep 28 2019 What is the relationship between common-sense, or 'folk', psychology and contemporary scientific psychology? Are they in conflict with one another? Or do they perform quite different, though perhaps complementary, roles? George Botterill and Peter Carruthers discuss these questions, defending a robust form of realism about the commitments of folk psychology and about the prospects for integrating those commitments into natural science. Their focus throughout the book is on the ways in which cognitive science presents a challenge to our common-sense self-image - arguing that our native conception of the mind will be enriched, but not overturned, by science. The Philosophy of Psychology is designed as a textbook for upper-level undergraduate and beginning graduate students in philosophy and cognitive science, but as a text that not only surveys but advances the debates on the topics discussed, it will also be of interest to researchers working in these areas.

You Are Awesome Nov 03 2022 CHILDREN'S BOOK OF THE YEAR 2019 SUNDAY TIMES NUMBER ONE BESTSELLER "A very funny and inspiring read! Brilliantly practical with a wide variety of examples that make it relevant for both boys and girls (and adults)!" - online customer review "A truly inspiring book for the younger generation!" - online customer review "Genuinely funny and engaging. There are messages in this book for both adults and children. It's a must read." - online customer review "An awesome book about becoming awesome. How inspiring it is to

know that there's a path to awesomeness and that anyone - absolutely anyone - can go down that path. This book shows you how." - Carol Dweck, Professor of Psychology, Stanford University This positive and empowering guide, by bestselling mindset author Matthew Syed, will help boys and girls build resilience, fulfil their potential and become successful, happy, awesome adults. I'm no good at sport ... I can't do maths ... I really struggle with exams ... Sound familiar? If you believe you can't do something, the chances are you won't try. But what if you really could get better at maths, or sport or exams? In fact, what if you could excel at anything you put your mind to? You Are Awesome can help you do just that, inspiring and empowering young readers to find the confidence to realise their potential. The first children's book from Times journalist, two-time Olympian and best-selling mindset author Matthew Syed, it uses examples of successful people from Mozart to Serena Williams to demonstrate that success really is earned rather than given, and that talent can be acquired. With hard work and determination, practice and self-belief, and, most importantly, a Growth Mindset, there's no reason why anyone can't achieve anything. Practical, insightful and positive, this is the book to help children build resilience, embrace their mistakes and grow into successful, happy adults. Also available: The You Are Awesome Journal. Whether setting out your goals, planning the best practice ever, keeping calm with breathing exercises or making paper aeroplanes to understand marginal gains, you'll love the brilliant activities in The You Are Awesome Journal - it's the perfect companion to You Are Awesome!

The Dublin Notebook May 05 2020 Hopkins's 'Dublin Notebook' provides intimate and rare access to the Jesuit poet's private, poetic, religious, and academic thoughts and words during his final years in Dublin. In February 1884, Hopkins moved to Dublin from England to become a Professor of Classics at University College (entrusted to the Jesuits in 1883) and a Fellow at the recently-established Royal University of Ireland, an examining institution. He lived at UC's St. Stephen's Green campus until 8 June 1889, when he died of typhoid. The 'Dublin Notebook' is a unique repository of personal memoranda, drafts of poems, lecture outlines, spiritual meditation notes, and academic notes, and sheds new light on the circumstances that produced Hopkins's 'Sonnets of Desolation' in the mid-1880s. The contents include pages in which he tallied examination marks and commented on students' performances; intermittent musical jottings; lists of correspondents to whom he owed letters; attendance records; drafts of a short biography for publication; a commentary on Cicero; and preliminary versions of 'Sibyl's Leaves', one of his most exceptional poems. This edition, Volume VII in the Collected Works of Gerard Manley Hopkins, provides readers with a digitized facsimile of the manuscript, a detailed transcription of each page, and scholarly resources such as a historical and cultural introduction to Hopkins's Dublin years; an analysis of the notebook's contents; the editors' explanation of the manuscript and its challenges; translations of and citations for all classical quotations; and thorough annotations (including transcriptions of his musical compositions). Other resources include a Biographical Register; documents related to Hopkins's academic appointments; sample examinations that he set for the Royal University; and edited versions of his study of Cicero's 'On Duty' and his biographical notice of Richard Watson Dixon, the Pre-Raphaelite poet. The 'Dublin Notebook' sheds new light on Hopkins's life and inner torments, his wide-ranging artistic talents (and musical aspirations), his involvement in Ireland's vexed 'troubles' in the late nineteenth century, his harrowing spiritual and emotional condition, and the busy life of a burdened Classics professor.
