Achieving the Circular Economy Oct 22 2021 Urbanisation and climate change are pushing cities to find novel pathways leading to a sustainable future. The urban context may be viewed as a new experimentation space to accelerate the transition to a circular economy. Urban symbiosis and the circular economy are emerging concepts attracting more and more attention within the urban context. Moreover, new business models are emerging around sharing and peer-to-peer practices, which are challenging existing roles of actors in society. These developments are having an important impact on the flows of resources and the use of the city infrastructure, and each research area has taken a different perspective in the analysis of such impacts. This Special Issue aims to explore what a "circular city" could constitute and how and why cities engage in circularity. This Special Issue includes seven

high-quality papers on the theories and practices of circular cities. Actors, concepts, methods, tools, the barriers to and enablers of circular cities are discussed and a solid base and inspiration for the future development of circular cities are provided.

Pricing Decisions in Small Business May 17 2021 These studies, which originated from research on approximately 100 firms earned on at the University of Kentucky under a grant from the Small Business Administration, are an empirical examination of decision making in the small firm. The practices revealed by the investigation have been analyzed within the theoretic framework of managerial economics. The studies make suggestions for improvements that take into account the limited resources of small firms. A third study, *Investment Decisions in Small Business* by Martin B. Solomon, will be published at a later date. *Pricing Decisions in Small Business* points out that pricing is more flexible but that competition is more limited than economists have assumed. Though he already makes some adjustment of prices according to the market, the businessman could profit from greater flexibility in his thinking, especially in the consideration of relative changes in costs and revenues.

How to Start and Manage a Successful Auto Repair Business Dec 04 2022 The auto repair business is available to all men and women who wish to be successful in the lucrative auto repair industry. Every detail you will need will be included in this guide with easy to understand, step by step instructions. I will cover everything you will need to know about the location, the building, the layout of the office, the shop, and the parking area. I will even tell you how to park customers' vehicles to prevent damage and to also allow the manager to assess work load and determine the status of vehicles. You will learn how to arrange the work space for maximum efficiency. I will also share with you the details for developing an effective office team, shop team and professional team. In addition, you will receive tips on dealing with customers and customer related issues. There is also a section dedicated to general business practices. It covers business structures, creative marketing and advertising, and business resources available to you which will help you fine tune your business. After reading this guide from cover to cover you will possess all of the necessary knowledge to successfully start and manage your own auto repair facility. You will be a huge success in the auto repair business and, of this, I am 110% certain!!!

Narrative and Discursive Approaches in Entrepreneurship Jun 05 2020 . . . the four books comprising the series would certainly be a valuable addition to any entrepreneurship library. However, each book also stands alone as an individual purchase. Lorraine Warren, *International Journal of Entrepreneurial Behaviour and Research* The book delivers what it promises: a map of the uses of narrative methods in entrepreneurship studies. It is both an interesting contribution to the field and an important methodological handbook for all entrepreneurship researchers who are thinking of adopting qualitative methods in their inquiries. However, it may also be read with advantage by other researchers using ethnography as their main methodological approach to social studies. . . The aim of the book is to show how narratives can enrich entrepreneurship studies, a goal that in my opinion is aptly fulfilled. Monika Kostera, *Scandinavian Journal of Management* . . . the contributors in this text breathe fresh and imaginative linguistic resources and narrative/discursive frames of reference into the inquiry of entrepreneurial activities. The anecdote, the narrative, the metaphorical, the discursive and the dramaturgical are significant therefore, not only because they bring to the surface voices, emotions, processes and the relationality of (everyday) entrepreneurial activity that have possibly been previously silenced. But also, to paraphrase Steyaert, these approaches highlight the controversial and interactive aspects of the research process. . . The text is welcome because it treats narrative in a serious and scholarly way. Denise Fletcher, *International Small Business Journal* In their edited book *Narrative and Discursive Approaches in Entrepreneurship*, Daniel Hjorth and Chris Steyaert provide a fascinating glimpse into a perspective on entrepreneurship that will be enlightening for many readers. Entrepreneurship authors typically talk about theory, methods, and data as if a straight-forward linear process united them all, and making sense of entrepreneurship was simply a matter of knowing how to interpret one's findings. By contrast, the authors in this volume propose narrative and discursive approaches in which the contributing authors emphasize rich description, reflexive conceptualization, and interpretations offered as part of the story itself. They draw upon an international set of cases, including Russia, Sweden, Denmark, Norway, Venezuela, and North America. The cases themselves make for fascinating reading, quite apart from what we learn about the difficulties of imposing a particular interpretation on a given story. For example, taxi drivers in

Caracas, management consultants in Denmark, and women entrepreneurs in northern Norway all make for fascinating narratives from which to understand the entrepreneurial process. Unlike many edited books which have no plot, the editors have included opening and closing sections that link the chapters, offer alternative readings of them, and propose new and expansive ways of thinking about entrepreneurship. Howard Aldrich, University of North Carolina at Chapel Hill, US Daniel Hjorth and Chris Steyaert set out to advance the study of entrepreneurship by refocusing the lens of discovery from economics, management and marketing to other paradigmatic stances in social sciences and humanities like anthropology and literary studies. The result is a provocative collection of chapters that inspire the reader to consider and explore new ideas and research practice that incorporate both the context and place of entrepreneurship. From the perceptive insights of the editors to the rigorous and provocative discourse of the chapters and thoughtful responses in the conclusion emerges a story, in the best of storytelling tradition, about how a linguistic turn can rouse new insights. The editors ask, how do these texts move you? they entice, provoke, challenge, stimulate and guide. Their implications should be far reaching and required reading for any student of t
