*Link Reversal Algorithms Aug 05 2022 Link reversal is a versatile algorithm design technique that has been used in numerous distributed algorithms for a variety of problems. The common thread in these algorithms is that the distributed system is viewed as a graph, with vertices representing the computing nodes and edges representing some other feature of the system (for instance, point-to-point communication channels or a conflict relationship). Each algorithm assigns a virtual direction to the edges of the graph, producing a directed version of the original graph. As the algorithm proceeds, the virtual directions of some of the links in the graph change in order to accomplish some algorithm-specific goal. The criterion for changing link directions is based on information that is local to a node (such as the node having no outgoing links) and thus this approach scales well, a feature that is desirable for distributed algorithms. This monograph presents, in a tutorial way, a representative sampling of the work on link-reversal-based distributed algorithms. The algorithms considered solve routing, leader election, mutual exclusion, distributed queueing, scheduling, and resource allocation. The algorithms can be roughly divided into two types, those that assume a more abstract graph model of the networks, and those that take into account more realistic details of the system. In particular, these more realistic details include the communication between nodes, which may be through asynchronous message passing, and possible changes in the graph, for instance, due to movement of the nodes. We have not attempted to provide a comprehensive survey of all the literature on these topics. Instead, we have focused in depth on a smaller number of fundamental papers, whose common thread is that link reversal provides a way for nodes in the system to observe their local neighborhoods, take only local actions, and yet cause global problems to be solved. We conjecture that future interesting uses of link reversal are yet to be discovered. *The Rose Gardener Dec 05 2019 A dark secret hangs over the old rose gardener's house in the village of Le Variouf. And all the clues seem to point to its inhabitants' past—to the years of World War II, when the idyllic island of Guernsey was occupied by German troops... The young teacher Franca Palmer is at the end of her rope. Her marriage is reaching a crisis point, and she barely feels capable of continuing to face the demands of her career, her husband, and day-to-day life. In a mad rush she leaves her comfortable home in Berlin and flees to the island of Guernsey in the English Channel; there she rents herself a room in the old rose gardener's house in the village of Le Variouf. In a short time, a peculiar, guarded friendship develops between her and her host, Beatrice Shaye. The older woman has lived on the charmingly situated property for many years with Helene Feldmann—tied together by fate in a relationship that is marked with repugnance and hatred. The two women appear to be bound to one another in a mysterious, incomprehensible way—dating back to the year 1940, when during the occupation of the Channel Islands by German troops, Helene and her husband Erich, a high-ranking officer, took Beatrice in as if she was their own child. From the beginning, the Feldmanns competed for Beatrice's favor, all the more so since, where his wife was concerned, Erich felt only contempt. So it was that with his death on May 1st, 1945, an agonizing phase in both women's lives came to an end. But nevertheless, a shadow still hangs over the house. And one day, another May 1st, there is again a death in Le Variouf.*

*Rhett & Link's Book of Mythicality May 22 2021 "Internetainers" Rhett & Link met in first grade when their teacher made them miss recess for writing profanity on their desks, and they have been best friends ever since. Today, their daily YouTube talk show, Good Mythical Morning, is the most-watched daily talk show on the Internet, and nearly 12 million subscribers tune in to see the guys broadcast brainy trivia, wild experiments, and hilarious banter (not to mention the occasional cereal bath). Now the award-winning comedians are finally bringing their "Mythical" world to the printed page in their first book. A hilarious blend of autobiography, trivia, and advice, Rhett & Link's Book of Mythicality: A Field Guide to Curiosity, Creativity, and Tomfoolery will offer twenty ways to add "Mythicality" to your life, including: Eat Something That Scares You Make a Bold Hair Choice Invent Something Ridiculous Say "I Love You" Like It's Never Been Said Speak at Your Own Funeral The goal of these offbeat prompts? To learn new things, laugh more often, and earn a few grown-up merit badges along the way. Heartfelt and completely original, this book will be the perfect gift for anyone looking for a fresh dose of humor and fun.*

*Pearseus Jun 30 2019 Justice without compassion is but tyranny The series that has reached #1 on Amazon! In the second book of the Pearseus series, the handful of humans that crash-landed on Pearseus three hundred years ago have by now colonized a large part of the planet, rebuilding their civilization from scratch. In the process, they have created a dystopia for themselves, splitting into three competing factions: the Capital, the Loyalists and the Democracies, all embroiled in endless intrigue and constant warfare. An uneasy truce between the three parties still holds - barely. While man turns against man, the First, Pearseus' indigenous people, wage their own war against a shadowy enemy; an ancient conflict that threatens to engulf and destroy all of humanity. Following an unspeakable crime, the men and women of Pearseus struggle to live and love as their world crumbles all around them. But can love be found in the ruins of humanity's civilization?*

*RF Photonic Technology in Optical Fiber Links May 02 2022 In many applications, radio frequency (RF) signals need to be transmitted and processed without being digitalized. Optical fiber provides a transmission medium in which RF modulated optical carriers can be transmitted and distributed with very low loss, making it more efficient and less costly than conventional electronic systems. This volume presents a review of RF photonic components, transmission systems, and signal processing examples in optical fibers from leading academic, government, and industry scientists working in this field. It also introduces the reader to various related technologies such as direct modulation of laser sources, external modulation techniques, and detectors. The text is aimed at engineers and scientists engaged in the research and development of optical fibers and analog RF applications. With an emphasis on design, performance and practical application, this book will be of particular interest to those developing systems based on this technology.*

*The Green Book Feb 28 2022 This new edition incorporates revised guidance from H.M Treasury which is designed to promote efficient policy development and resource allocation across government through the use of a thorough, long-term and analytically robust approach to the appraisal and evaluation of public service projects before significant funds are committed. It is the first edition to have been aided by a consultation process in order to ensure the guidance is clearer and more closely tailored to suit the needs of users.*

Readers will gain fundamental knowledge on which cancer types are related to obesity. In addition, this updated resource provides significant knowledge for clinicians on when to act, along with specific management guidelines for patients, as well as how to understand potential risk factors and how to directly or indirectly minimize these risks. The book also provides never-before-published scientific data for any researcher in the field, identifying molecular mechanisms and links behind the development of malignancy and promoting research in new and effective target pathways in developing therapeutic strategies. Provides essential knowledge on how to understand the link between obesity and cancer and why and how this occurs Presents a significant knowledge base for clinicians on when to act, along with patient management guidelines for patients with obesity and potential risk factors Contains new scientific data and findings for researchers that identify the molecular mechanisms and links behind the development of malignancy

**Immunisation against infectious diseases Mar 20 2021** This is the third edition of this publication which contains the latest information on vaccines and vaccination procedures for all the vaccine preventable infectious diseases that may occur in the UK or in travellers going outside of the UK, particularly those immunisations that comprise the routine immunisation programme for all children from birth to adolescence. It is divided into two sections: the first section covers principles, practices and procedures, including issues of consent, contraindications, storage, distribution and disposal of vaccines, surveillance and monitoring, and the Vaccine Damage Payment Scheme; the second section covers the range of different diseases and vaccines.

**The Critical Link 4 Nov 08 2022** This book is a collection of papers presented in Stockholm, at the fourth Critical Link conference. The book is a well-balanced mix of academic research and texts of a more practical, professional character. The introducing article explicitly addresses the issue of professionalism and how this has been dealt with in research on interpreting. The following two sections provide examples of recent research, applying various theoretical approaches. Section four reports on the development of current, more or less local standards. Section five raises issues of professional ideology. The final section tells about new training initiatives and programmes. All contributions were selected because of their relevance to the theme of professionalisation of interpreting in the community. The volume is the fourth in a series, documenting the advance of a whole new empirical and professional field. It is of central interest for all people involved in this development, interpreters, researchers, trainers and others.

**The Link Jun 10 2020** For more than a century, scientists have raced to unravel the human family tree and have grappled with its complications. Now, with an astonishing new discovery, everything we thought we knew about primate origins could change. Lying inside a high-security vault, deep within the heart of one of the world's leading natural history museums, is the scientific find of a lifetime - a perfectly fossilized early primate, older than the previously most famous primate fossil, Lucy, by forty-four million years. A secret until now, the fossil - "Ida" to the researchers who have painstakingly verified her provenance - is the most complete primate fossil ever found. Forty-seven million years old, Ida rewrites what we've assumed about the earliest primate origins. Her completeness is unparalleled - so much of what we understand about evolution comes from partial fossils and even single bones, but Ida's fossilization offers much more than that, from a haunting "skin shadow" to her stomach contents. And, remarkably, knowledge of her discovery and existence almost never saw the light of day. With exclusive access to the first scientists to study her, the award-winning science writer Colin Tudge tells the history of Ida and her place in the world. A magnificent, cutting-edge scientific detective story followed her discovery, and The Link offers a wide-ranging investigation into Ida and our earliest origins. At the same time, it opens a stunningly evocative window into our past and changes what we know about primate evolution and, ultimately, our own.

**The Weakest Link May 10 2020** The Weakest Link looks at one of the biggest issues in cyber security- how to protect organisations from their own employees. Many cyber threats don't involve hackers using clever software to penetrate company networks; threats can often involve employees acting in ways that, accidentally or deliberately, leak information or damage assets without a hacker being involved at all. Emerging technologies and behavioural changes - driven by cloud computing and people using their own smartphones and tablets for work - are starting to make these threats more common and far more serious. Written to help anyone understand how information security has become the responsibility of individual employees, it shows exactly what they can do to protect company systems and data. Effective solutions need to go beyond simple security awareness and show how to create a complete culture of security. Individuals can then use this learned behaviour to keep themselves digitally safe at work and in their personal lives.

**Frank Auerbach Aug 01 2019** Born in Berlin in 1931 to Jewish parents, the eight-year-old Auerbach was sent to England in 1939 to escape the Nazi

regime. His parents stayed behind and died in a concentration camp in 1943. Now in his eighties, Auerbach is still producing his distinctly sculptural paintings of friends, family and surroundings in north London, where he has made his home since the war. The art historian and curator Catherine Lampert has had unique access to the artist since 1978 when she first became one of his sitters. With an emphasis on Auerbach's own words, culled from her conversations with him and archival interviews, she provides a rare insight into his professional life, working methods and philosophy. Auerbach also reflects on the places, people and inspirations that have shaped his life. These include his experiences as a refugee child, finding his way in the London art world of the 1950s and 1960s, his friendships with Lucian Freud, Francis Bacon and Leon Kossoff, among many others, and his approaches to looking and painting throughout his career. For anyone interested in how an artist approaches his craft or his method of capturing reality this is essential reading.

**Laser Inter-Satellite Links Technology Jun 03 2022** State of the art resource covering key technologies and related theories of inter-satellite links Inter-Satellite Links Technology explores satellite networking as a growing topic in the field of communication technology, introducing the definition, types, and working frequency bands of inter-satellite links, discussing the number of orbital elements of the spacecraft motion state under two-body motion and their conversion relationship, and establishing the basic demand model for inter-satellite link network, chain topology model, and transmission protocol model. The book focuses on the analysis and introduction of the principles and error sources of microwave and laser inter-satellite ranging, including the basic composition, workflow, and constraints of the laser inter-satellite link, and related design principles of the inter-satellite laser transmitter and receivers. Later chapters also discuss theories and methods of acquisition, alignment, and tracking, the impact of alignment errors on performance, and inter-satellite link modulation and its implementation. Specific sample topics covered in Inter-Satellite Links Technology include: Pulse position modulation (PPM), Differential Pulse Position Modulation (DPPM), Digital Pulse Interval Modulation (DPIM), and Double-head pulse interval modulation (DH-PIM) Basic demand model of inter-satellite link network application, including basic configuration of constellations and inter-satellite transmission networks Inter-satellite ranging accuracy, principles of microwave inter-satellite ranging, and analysis of microwave ranging error sources Effect of tracking error on the beam distribution at the receiving end and influence of tracking and pointing error on communication error rate Inter-Satellite Links Technology serves a completely comprehensive resource on the subject and is a must-have reference for experts and scholars in aerospace, along with graduates and senior undergraduates in related programs of study.
